BioHorizons Global Symposium Scheduled for April

The future is now: Transforming dental implantology today

BIRMINGHAM, Ala. — February 16, 2026 — Registration is open for the BioHorizons Global Symposium, scheduled for April 16-18, 2026, at the Fontainebleau in Miami Beach, Florida. Clinicians and their teams can learn about leading-edge topics with personalized learning experiences presented by more than 40 internationally respected speakers.

Topics will be focused around five key areas:

- Advances in hard and soft tissue regeneration
- Immediate implant therapy and scannable anatomic abutments for enhanced clinical efficiency and outcomes
- Innovations in full-arch reconstruction, including remote anchorage and FP1 solutions
- Digital integration in surgical and prosthetic rehabilitation
- Optimizing practice growth and clinical outcomes, including a workshop on enhancing your practice's business operations and marketing

"We are extremely pleased to come to Miami Beach for the iconic BioHorizons Global Symposium," said Steve Boggan, BioHorizons president and CEO. "This meeting brings insights from renowned speakers, enriching workshops, and the latest in cutting-edge implant and regenerative technology. Attendees throughout the world will gain valuable skills and enjoy connecting with peers in an unforgettable venue."

An Early Bird rate is available for clinicians through **February 19, 2026**. Attendees can earn 16 CE credits from the Scientific Program; separate rates are available for additional CE-accredited workshops.

According to Dr. Homa Zadeh, scientific chairman for the Global Symposium, "Our focus was to design a program that addresses the real challenges and opportunities implant practitioners face every day. Attendees can expect an inspiring, immersive educational experience — one that blends scientific rigor, practical innovation and the collective wisdom of leaders shaping the future of implant dentistry."

Several opportunities for networking with peers, including "Havana Nights" – the end-of-Symposium celebration planned for Saturday night, are also available.

Visit symposium.biohorizons.com for more information, including tuition and Early Bird rate details.
