NEWS RELEASE

CleanSpark's 95% Carbon-Free Bitcoin Mining Division to Showcase at Mining Disrupt®

2021-07-15

SALT LAKE CITY, July 15, 2021 (GLOBE NEWSWIRE) -- CleanSpark, Inc. (Nasdaq: CLSK) (the "Company" or "CleanSpark"), a diversified software, services and clean Bitcoin mining company, today announces its exhibition of CleanBlok at Mining Disrupt® on July 21st in Miami, Florida. CleanSpark is also a sponsor of this year's conference.

CleanBlok by CleanSpark is an Atlanta-based cryptocurrency operation running mostly on a carbon-free energy mix. Attendees are encouraged to visit CleanBlok's booth to learn how mining cryptocurrency responsibly can drive rapid ROI on energy investments while helping the planet. The Company's advanced energy software and microgrid control technologies enable energy optimization at mining centers and other power intensive operations. CleanBlok SVP Bernardo Schucman alongside other team members will be available for meetings during the event. Schucman brings more than two decades of experience as a world-renowned tech entrepreneur, consultant and blockchain engineer to the Company.

"Cryptocurrency mining is the critical support system for the blockchain and provides significant value for both the miners and the blockchain community. Mining operations can have a negative impact on the environment if non-renewables or inefficient practices are used. This is a big problem to solve, but we're well-suited to solve it with our unique and innovative microgrid solutions," says CleanSpark President and CEO Zachary Bradford.

Forward-Looking Statements

This release contains forward-looking statements as defined in the Private Securities Litigation Reform Act of 1995, including statements regarding the Company's plans and expectations for expansion of its energy initiatives, operating results, business strategy, partnership with Coinmint, deployment of miners, digital currency mining activities, the growth of its facilities and other statements regarding the expectations, beliefs, plans, intentions and strategies of the Company. The Company has tried to identify these forward-looking statements by using words such as "expect," "target," "anticipate," "believe," "could," "should," "estimate," "intend," "may," "will," "plan," "goal" and similar terms and phrases, but such words, terms and phrases are not the exclusive means of identifying such statements. Actual results, performance and achievements could differ materially from those expressed in, or implied by, these forward-looking statements due to a variety of risks, uncertainties and other factors, including, without limitation: the successful deployment of energy solutions for residential and commercial applications; the fitness of the Company's energy hardware, software and other solutions for this particular application or market; the success of its digital currency mining activities; the expectations of future revenue growth may not be realized; ongoing demand for the Company's software products and related services; the impact of global pandemics (including COVID-19) on the demand for our products and services; and other risks described in the Company's prior press releases and in its filings with the Securities and Exchange Commission (SEC), including under the heading "Risk Factors" in the Company's Annual Report on Form 10-K and any subsequent filings with the SEC. You are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date hereof, and we undertake no obligation to revise or update this press release (including any forward-looking statements contained herein) to reflect events or circumstances after the date hereof.
