Some of the statements in this presentation may constitute “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933, Section 21E of the Securities Exchange Act of 1934 and the Private Securities Litigation Reform Act of 1995. Words such as “will,” “expect,” “believe,” “estimate,” “continue,” “anticipate,” “intend,” “plan” and similar expressions are used to identify these forward-looking statements. Forward-looking statements discuss management’s current expectations and projections relating to our financial position, results of operations, plans, objectives, future performance and business. All forward-looking statements are subject to known and unknown risks, uncertainties and other important factors that may cause actual results to be materially different, including risks relating to our ability to manage growth, fund performance, risk, changes in our regulatory environment and tax status, market conditions generally, our ability to access suitable investment opportunities for our clients, our ability to maintain our fee structure, our ability to attract and retain key employees, our ability to consummate planned acquisitions and successfully integrate the acquired business with ours, our ability to manage our obligations under our debt agreements, defaults by clients and third-party investors on their obligations to us, our ability to comply with investment guidelines set by our clients, and our ability to receive distributions from Hamilton Lane Advisors, L.L.C. to fund our payment of dividends, taxes and other expenses.

The foregoing list of factors is not exhaustive. For more information regarding these risks and uncertainties as well as additional risks that we face, you should refer to the “Risk Factors” detailed in the item 1A of our Annual Report on form 10-K for the fiscal year ended March 31, 2018, and in our subsequent reports or other information filed from time to time with the Securities and Exchange Commission. The forward-looking statements included in this presentation are made only as of the date presented. We undertake no obligation to update or revise any forward-looking statement as a result of new information or future events, except as otherwise required by law.

The S&P 500 Total Return Index is a capitalization-weighted index of 500 U.S. large cap stocks that assumes all dividends and distributions are reinvested.

The MSCI World Index is a free float-adjusted market capitalization weighted index that is designed to measure the equity performance of developed markets.

All opinions, estimates and forecasts of future performance or other events contained herein are based on information available to the Company as of the date of this presentation and are subject to change. Past performance of the investments described herein is not indicative of future results. In addition, nothing contained herein shall be deemed to be a prediction of future performance. The information included in this presentation has not been reviewed or audited by independent public accountants. Certain information included herein has been obtained from sources that the Company believes to be reliable but the accuracy of such information cannot be guaranteed.

Certain of the performance results included herein do not reflect the deduction of any applicable advisory or management fees, since it is not possible to allocate such fees accurately in a vintage year presentation or in a composite measured at different points in time. A client’s rate of return will be reduced by any applicable advisory or management fees, carried interest and any expenses incurred. The Company’s fees are described in Part 2 of our Form ADV, a copy of which is available upon request.

Any tables, graphs or charts relating to past performance included in this presentation are intended only to illustrate the performance of the indices, composites, specific accounts or funds referred to for the historical periods shown. Such tables, graphs and charts are not intended to predict future performance and should not be used as the basis for an investment decision.

The information herein is not intended to provide, and should not be relied upon for, accounting, legal or tax advice, or investment recommendations. You should consult your accounting, legal, tax or other advisors about the matters discussed herein.

- Real Estate
- Infrastructure & Natural Resources
- VC/Growth
- Credit
- SMID Buyout
- Mega/Large Buyout

Note: Total exposure and market cap as of year end for 1999, 2007. For 2018, as of 9/30/18.
Source: Hamilton Lane Data (February 2019)

- Private markets have meaningfully expanded into strategies like infrastructure & natural resources and credit
- Private markets have grown significantly faster than public markets over the last 20 years, but still only one-tenth the size, as shown above
What is Private Equity?

A professionally managed pool of capital that invests primarily in private companies or securities

How it Works

1. **Capital Commitment**
   Investor makes a capital commitment to a fund manager in year 1

2. **Investment Period**
   Over the next 4-5 years, the fund manager calls capital for investments in portfolio companies

3. **Harvesting Period**
   Typically, in years 6-10, fund manager begins to exit portfolio company investments, sending capital back to investors in the form of distributions

**The Terms**

- **Capital Committed**: An investor's financial obligation to provide a set amount of capital to the fund
- **Capital Contributions**: Capital contributed from an investor's capital commitment to fund partnership investments, organizational expenses and management fees
- **Distributions**: Cash or stock disbursed to the investors from a fully or partially realized investment
Understanding Private Equity Exposure and Cash Flows

Example Cash Flow Profile: $10M Commitment to a Fund-of-Funds by Year

Highlights:

- Maximum cash out of pocket is roughly half of commitment
- Cash flow positive for the year in years 5-6
- Full commitment returned in form of distributions in years 7-8

Commitment ≠ Exposure

Calls and distributions are often concurrent

Please note that the data shown herein represents actual performance data for an investor who committed $10M to a Hamilton Lane Partnership Fund L.P. in 2000. The return figures shown may differ for investors who committed to the partnership at a different time or with different terms. The data shown is intended to provide information about the potential cash flows that a private equity fund can provide, and should not be considered a proxy for the performance of all private equity funds. Actual performance will vary depending on, amongst other factors, market and credit conditions and may vary significantly from the data shown herein. Past performance is not a guarantee of future results.
Strong Performance Across the Asset Class
20-Year Asset Class Risk-Adjusted Performance
Annualized Time-Weighted Return as of 9/30/2018

Indices used: Hamilton Lane All Private Markets with volatility de-smoothed; Hamilton Lane All Private Equity ex. Credit and Real Assets with volatility de-smoothed; S&P 500 Index; Russell 3000 Index; MSCI World Index; HFRI Composite Index; Hamilton Lane Private Credit with volatility de-smoothed; Credit Suisse High Yield Index; Barclays Aggregate Bond Index; Hamilton Lane Private Real Estate with volatility de-smoothed; Hamilton Lane Private Real Assets with volatility de-smoothed; FTSE/NAREIT Equity REIT Index; S&P Global Infrastructure Index; MSCI World Energy Sector Index. Geometric mean returns in USD. Assumes risk free rate of 3.6%, representing the average yield of the ten-year treasury over the last twenty years. [February 2019]
- As shown above, the worst five-year period for private credit and developed market buyouts produced positive returns.
- VC/growth strategies exhibit higher downside risk.
• Public equity returns suffer during periods of high volatility
• Private markets return premium remains consistent, even during periods marked by high volatility
Buyout Outperforms

Risk Premiums & Volatility Regimes
Based on Rolling 3-Year Periods 1990–2018

- Buyout strategies maintain more than 300 bps of outperformance, even in the most volatile environments
• Equity-focused strategies hold $1.1T of dry powder with the rest of private markets holding $779B of dry powder
• Private markets dry powder is less than 2% of estimated total global AUM
• Time to deploy capital overhang continues to hover around the long-term average across strategies
• Historically, the best time to invest is when capital overhang is greatest and investment pacing is slowest (2002 and 2009)
Just Levered Equity?

• Since the beginning of 2007, private equity net returns have outperformed both the unlevered and levered S&P 500 indices.
• Furthermore, these returns were realized with less volatility, even after desmoothing private equity volatility.
• Companies in the S&P 500 are already capitalized with some leverage - applying further leverage causes too much downside capture during a downturn.

Different for Small Cap?

- Once again, private equity outperformed both indices across risk and returns
- The Russell 2000 has greater leverage and has historically lost more value during downturns than a large cap index
- Applying further leverage to small cap companies exacerbates these losses and increases volatility

### Q1 2007–Q1 2018

Y-o-Y Drivers of Growth

Customized Separate Accounts:
- New client wins
- Client re-ups

Specialized Funds:
- Closed credit-oriented fund (2018)
- Fundraising co-investment, secondary, credit-oriented (2019) and multi-strategy products

YoY Growth

* Numbers may not tie due to rounding

¹ Reflects retroactive fees of $5.8M from our latest secondary fund
² Reflects retroactive fees of $1.1M from our latest co-investment fund

...and annual fee rates are stable
### Sticky Revenue Base with Strong Organic Growth Opportunity

- **Long-term nature of specialized funds and customized separate accounts (CSA)**
  - ~12-year average term for main primary, secondary and direct / co-investment funds
  - ~7-year average age of separate account client relationship

- **Long-term relationships**
  - Very high retention rate with CSA clients

- **Expanding relationships**
  - ~40% of our clients have products in multiple revenue categories

- **Maintaining or growing allocation requires continued commitments from investors**
  - Vast majority of CSA clients allocate additional capital
  - ~70% of our gross contributions during the last 12 months come from our existing client base

2. **Private Markets Allocation to Rise**
   - Capital Life Cycle

3. **Ongoing Capital Allocations**
   - Requires

4. **Hamilton Lane Benefits from Ongoing Increasing Fund Flows from Clients**
   - Cause

---

**Hamilton Lane** | Global Leader in the Private Markets

Page 32
• We receive performance fees across our specialized funds and from some of our CSAs

• We generally follow a "European" waterfall, which means we only receive the carried interest after all contributed capital and the preferred return has been returned to investors

• Risk of clawback is low and the cash we reflect is actual cash (not unrealized gains)

• It takes time to get to a carry position

• Our carried interest is highly diversified by geography, industry, style of investing, size of business and vintage year

Cumulative Realized Carry

- Dark blue line is 1/10 scale of light blue
Growing and Maturing Carried Interest Position

**Unrealized Carried Interest**

- **12/31/16**: $213
- **12/31/17**: $301
- **12/31/18**: $355

- **Vehicles in Unrealized Carry Position**
  - **< 5 Years**: 27%
  - **5-8 Years**: 41%
  - **8-12 Years**: 27%
  - **>12 Years**: 5%

- **USD in Millions**
  - **Unrealized Carry by Age**
    - < 5 Years: 9%
    - 5-8 Years: 12%
    - 8-12 Years: 78%
    - >12 Years: 2%

- **Realized Carry by Age**
  - < 5 Years: 27%
  - 5-8 Years: 41%
  - 8-12 Years: 12%
  - >12 Years: 5%

2018 Management and Advisory Fee Revenues Contribution
43%

Key Stats²
- ~$11B in AUM
- 30+ funds
- Fees based on committed or net investment capital
- Secondary, direct / co-investment and Strategic Opportunities funds generally earn carried interest at 10.0% to 12.5% of net profits
Distribution Management

Allows investors access to our platform, expertise and proprietary data

In-Kind Distributions

- In-kind distributions represent the “last mile” in the private markets investment process
- Dealing with in-kind stock distributions represents a challenge for LPs
- “Distribution effect” negatively impacts PE performance
- LPs unable to realize the returns advertised by the funds
- Long-term post-distribution returns demonstrate many losers and only a few big winners

Post-Distribution Management

- Successful post-distribution management requires specialized expertise
- Experienced distribution team started in 1991 as Shott Capital Management
- Process integrates specialist expertise in research, trading and operations
- Managed over 24,000 distributions totaling more than $18.9B¹
- Database compiled from 20+ years of post-venture distribution management data

² As of March 31, 2018; includes data back to 1991 as Shott Capital Management
Customized Back-Office Support

Clients have access to our data and performance analytics in real time and 24/7

Portfolio Review and Monitoring

- Quantitative and qualitative performance analysis
- Portfolio diversification and benchmarking
- Transactional data and IRR calculations
- Analytics across funds and portfolio companies for performance, valuation and exposure measurement

Investment-Level Reporting

- Underlying portfolio holdings
- Fund-specific performance and detailed diversification analysis (on a quarterly basis)
- Integrated document library to manage and catalog documents and files associated with specific investments and funds

Timely Reporting/Access to Information

- Flexible reporting and web-based interface to meet client needs
- Monthly flash reports available online
- Direct integration with Excel for on-demand analysis via iLevel's Excel add-in
- Quarterly Hamilton Lane market commentary

Enhanced Technology

- Highly secure, web-based solution providing 24/7 access to client portfolios
- Unique system automating the collection, storage, analysis and reporting of data to LPs and clients
- Unparalleled flexibility including future enhancements allowing for the exchange of data directly between GPs and LPs for dynamic, detailed information sharing
- Fully integrated with Excel
Partnering with Hamilton Lane

A collaborative partnership with Hamilton Lane

- Hamilton Lane and Client collaborate on a custom-tailored strategic plan and guidelines to meet investment needs, risk/return objectives and restrictions
- Hamilton Lane provides full transparency of investment decisions and ongoing monitoring and reporting

Approach & Implementation

- Establish portfolio objectives
- Identify a portfolio that meets risk/return objectives
- Target sub-strategies to meet investment needs
- Identify core managers as the foundation of the portfolio
- Develop meaningful portfolio construction
- Mitigate J-curve effect
- Diversify by time, manager & geography
Embracing Data & Technology

Data advantage adds real value and drives benefits for our clients

- Enhancing transparency
  - Customized reporting
  - Annual market overview

- Providing industry insights to clients
  - Data collection & reporting
  - Quarterly & monthly newsletters

- Partnering with cutting-edge technology providers

Today, this large U.S. public pension fund has become one of our biggest clients.

Program continued to evolve, benefitting from our full spectrum of private markets solutions.

Tailored client service and strong performance resulted in subsequent specialized mandates.

Relationship began in 1994 with our team advising on the core building blocks of a portfolio.

Why Product?

Our Perspective

Ability to offer investment solutions across the entire spectrum of private markets prospects

Our size, scope and extensive GP relationships enable us to build differentiated funds

Limited Partner Perspective

Opportunity to access the asset class either broadly or strategy-specific in a diverse way

Access to GPs and opportunities not broadly available

Obtain targeted exposure to complement an existing private markets portfolio (eg, secondaries and co-investments)
Our Diverse Roles

Product Development

• Cross-functional coordination on fund strategy and allocation targets
• Leverage competitive intelligence
• Create messaging
• Create pitch books
• Contribute to legal documents

Fundraising

• Collaborate with Business Development with general and customized material
• Participate in finals presentations
• Coordinate with legal on documentation for new commitments
• Respond to RFPs

Investor Relations

• Quarterly updates for LPs & consultants (presentations, calls, meetings)
• Visit LPs to maintain strong relationships
• Respond to inquiries and ad hoc requests
• Team of 12 product investor relations professionals
Our Limited Partner investor base represents a diverse group of clients by geography and institution type.

**Geography by Committed Capital**

Allows for thoughtful deal selection, portfolio construction and preferred terms
Lowering Our Clients’ Costs

Better Fund Terms

We negotiate terms on behalf of all Hamilton Lane clients

- Often making up a significant portion of a fund based on aggregate client commitments
- Success in reducing management fees, carried interest & other terms for our clients
- Examples:

<table>
<thead>
<tr>
<th>Hamilton Lane as % of Fund</th>
<th>Proposed Term</th>
<th>Hamilton Lane Clients</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mid Buyout Fund</td>
<td>27%</td>
<td>2.00% mgmt fee</td>
</tr>
<tr>
<td>Distressed Debt Fund</td>
<td>21%</td>
<td>65% mgmt fee offset</td>
</tr>
</tbody>
</table>

Legal Costs/Savings

We include legal costs in our pricing

- Typical legal expense incurred by LP for a single fund = $25-35K
- Typical client invests in 6-8 funds per year

All data based on sample client portfolio. For illustrative purposes only, actual results may vary.

¹ Approximate legal economic savings of those funds that make up sample client portfolio.
² Hypothetical example calculated based on sample client portfolio of 23 funds invested over three years at a legal expense of $25K per fund.
Why Does the Secondary Market Exist?

The liquidity landscape for private market interests has continued to expand...

Private Equity Fund Investments
- Long-term commitment
- Illiquid by nature
- Life of fund is typically 12+ years
- Asset class has seen sustained growth

Private Equity Fund Investments
- Mechanism for liquidity for an illiquid asset class
- Offers investors the option to sell and transfer interest in a fund/asset to another investor

![Diagram showing the evolution of the primary and secondary market.](Image)
Co-Investments

How They Work

- Co-investors invest directly in portfolio company, alongside lead sponsor
- Most co-investments are minority, passive positions that are made on same terms as GP

Size of Market

$350-$450 billion

Estimated Co-investment Capital Since 2007*

Market Dynamics

With LP demand for co-investments strong, capabilities of co-investors differentiate

- Responsiveness
- Ease of interaction
- Access to capital

HL Advantages

HL is an attractive co-investment partner of choice to GPs

- 23 years co-investing
- $3.5B CI fund capital invested
- 22 dedicated co-investment professionals
- $32.9B primary capital commitments in 20181

**Multiple Avenues of Profitable Growth Ahead**
Strategy Definitions

All Private Markets – Hamilton Lane’s definition of “All Private Markets” includes all private commingled funds excluding fund-of-funds, and secondary fund-of-funds.

Co/Direct Investment Funds – Any PE fund that primarily invests in deals alongside another financial sponsor that is leading the deal.

Corporate Finance/Buyout – Any PE fund that generally takes a control position by buying a company.

Credit – This strategy focuses on providing debt capital.

Distressed Debt – Includes any PE fund that primarily invests in the debt of distressed companies.

EU Buyout – Any buyout fund primarily investing in the European Union.

Fund-of-Funds (FoF) – A fund that manages a portfolio of investments in other private equity funds.

Growth Equity – Any PE fund that focuses on providing growth capital through an equity investment.

Infrastructure – An investment strategy that invests in physical systems involved in the distribution of people, goods, and resources.

Late Stage VC – A venture capital strategy that provides funding to start-ups.

Mega/Large Buyout – Any buyout fund larger than a certain fund size that depends on the vintage year.

Mezzanine – Includes any PE fund that primarily invests in the mezzanine debt of private companies.

Multi-Stage VC – A venture capital strategy that provides funding to start-ups across many investment stages.

Natural Resources – An investment strategy that invests in companies involved in the extraction, refinement, or distribution of natural resources.

Origination – Includes any PE fund that focuses primarily on providing debt capital directly to private companies, often using the company’s assets as collateral.

Private Equity – A broad term used to describe any fund that offers equity capital to private companies.

Real Assets – Real Assets includes any PE fund with a strategy of either Infrastructure or Natural Resources. Real Estate funds are not included.

Real Estate – Any closed-end fund that primarily invests in non-core real estate, excluding separate accounts and joint ventures.

Real Estate Fund-of-Funds – Any fund that primarily invests in other real estate private equity funds.

ROW – Any fund with a geographic focus outside of North America and Western Europe.

ROW Equity – Includes all buyout, growth, and venture capital-focused funds, with a geographic focus outside of North America and Western Europe.

Secondary FoF – A fund that purchases existing stakes in private equity funds on the secondary market.

Seed/Early VC – A venture capital strategy that provides funding to early-stage startups.

Single Manager CI – A fund that invests capital in deals alongside a single lead general partner.

SMID Buyout – Any buyout fund smaller than a certain fund size, dependent on vintage year.

U.S. Mega/Large – Any buyout fund larger than a certain fund size that depends on the vintage year that is primarily investing in the United States.

U.S. SMID – Any buyout fund smaller than a certain fund size, dependent on vintage year that is primarily investing in the United States.

VC/Growth – Includes all funds with a strategy of venture capital or growth equity.

Venture Capital – Venture capital includes any All Private Markets funds focused on any stages of venture capital investing, including seed, early-stage, mid-stage, and late-stage investments.

Venture Debt – A venture capital strategy that provides debt financing to companies, rather than equity.

Index Definitions

Barclays U.S. Corporate Aggregate Index – Tracks the performance of U.S. fixed rate corporate debt rated as investment grade.

BoFAML High-Yield Index – The BoFAML High Yield Index tracks the performance of below investment grade U.S. dollar-denominated corporate bonds publicly issued in the U.S. domestic market.

Credit Suisse High Yield Index – The Credit Suisse High Yield index tracks the performance of U.S. sub-investment grade bonds.

Credit Suisse Leveraged Loan Index – The CS Leveraged Loan Index represents tradable, senior-secured, U.S. dollar-denominated non-investment-grade loans.

FTSE/NAREIT Equity REIT Index – The FTSE/NAREIT All Equity REIT Index tracks the performance of U.S. equity REITs.

HFRI Composite Index – The HFRI Composite Index reflects hedge fund industry performance.

MSCI Emerging Markets Index – The MSCI Emerging Markets Index is a free float-adjusted market capitalization index that is designed to measure equity market performance of emerging markets.

MSCI World Energy Sector Index – The MSCI World Energy Sector Index measures the performance of securities classified in the GICS Energy sector.

MSCI World ex U.S. Index – The MSCI World ex U.S. Index tracks large and mid-cap equity performance in developed market countries, excluding the U.S.

MSCI World Index – The MSCI World Index tracks large and mid-cap equity performance in developed market countries.

Russell 3000 Index – The Russell 3000 Index is composed of 3000 large U.S. companies, as determined by market capitalization.

Russell 3000 Net Total Return Index – The Russell 3000 Index is composed of 3000 large U.S. companies, as determined by market capitalization with net dividends reinvested.

S&P 500 Index – The S&P 500 Index tracks the 500 largest companies based on market cap of companies listed on NYSE or NASDAQ.

S&P 500 Information Technology – The S&P 500 Information Technology tracks companies included in the S&P 500 that are classified as members of the GICS information technology sector.

VIX – The Volatility Index is an index created by the Chicago Board Options Exchange (CBOE) which shows the market’s expectation of 30-day volatility.

Other

Desmoothing – A mathematical process to remove serial autocorrelation in the return stream of assets that experience infrequent appraisal pricing, such as private equity. Desmoothed returns may more accurately capture volatility than reported returns. The formula used here for desmoothing is:

\[ r_D(t) = \frac{r(t) - r(t-1) \cdot \rho}{1 - \rho} \]

\[ r_D(t) \] is the desmoothed return for period t
\[ r(t) \] is the return for period t
\[ \rho \] is the autocorrelation

PME (Public Market Equivalent) – Calculated by taking the fund cash flows and investing them in a relevant index. The fund cash flows are pooled such that capital calls are simulated as index share purchases and distributions as index share sales. Contributions are scaled by a factor such that the ending portfolio balance is equal to the private equity net asset value (equal ending exposures for both portfolios). This seeks to prevent shorting of the public market equivalent portfolio. Distributions are not scaled by this factor. The IR is calculated based off of these adjusted cash flows.

Sharpe Ratio – The Sharpe Ratio is the average return earned in excess of the risk-free rate per unit of volatility or total risk.

Time-weighted return – Time weighted Return is a measure of compound rate of growth in a portfolio.

Total Exposure – Total Exposure is equal to NAV + Unfunded Commitment.

Volatility – Volatility is a statistical measure of dispersion of return, specifically standard deviation.
The information contained in this presentation may include forward-looking statements regarding returns, performance, opinions, the fund presented or its portfolio companies, or other events contained herein. Forward-looking statements include a number of risks, uncertainties and other factors beyond our control, or the control of the fund or the portfolio companies, which may result in material differences in actual results, performance or other expectations. The opinions, estimates and analyses reflect our current judgment, which may change in the future.

All opinions, estimates and forecasts of future performance or other events contained herein are based on information available to Hamilton Lane as of the date of this presentation and are subject to change. Past performance of the investments described herein is not indicative of future results. In addition, nothing contained herein shall be deemed to be a prediction of future performance.

The information included in this presentation has not been reviewed or audited by independent public accountants. Certain information included herein has been obtained from sources that Hamilton Lane believes to be reliable, but the accuracy of such information cannot be guaranteed.

This presentation is not an offer to sell, or a solicitation of any offer to buy, any security or to enter into any agreement with Hamilton Lane or any of its affiliates. Any such offering will be made only at your request. We do not intend that any public offering will be made by us at any time with respect to any potential transaction discussed in this presentation.

Certain of the performance results included herein do not reflect the deduction of any applicable advisory or management fees, since it is not possible to allocate such fees accurately in a vintage year presentation or in a composite measured at different points in time. A client’s rate of return will be reduced by any applicable advisory or management fees, carried interest and any expenses incurred. Hamilton Lane's fees are described in Part 2 of our Form ADV, a copy of which is available upon request.

This presentation is not an offer to sell, or a solicitation of any offer to buy, any security or to enter into any agreement with Hamilton Lane or any of its affiliates. Any such offering will be made only at your request. We do not intend that any public offering will be made by us at any time with respect to any potential transaction discussed in this presentation.

Certain of the performance results included herein do not reflect the deduction of any applicable advisory or management fees, since it is not possible to allocate such fees accurately in a vintage year presentation or in a composite measured at different points in time. A client’s rate of return will be reduced by any applicable advisory or management fees, carried interest and any expenses incurred. Hamilton Lane's fees are described in Part 2 of our Form ADV, a copy of which is available upon request.

The following hypothetical example illustrates the effect of fees on earned returns for both separate accounts and fund-of-funds investment vehicles. The example is solely for illustrative purposes and is not intended as a guarantee or prediction of the actual returns that would be earned by similar investment vehicles having comparable features. The example is as follows: The hypothetical separate account or fund-of-funds consisted of $100 million in commitments with a fee structure of 1% on committed capital during the first four years of the term of the investment and then declining by 10% per year thereafter for the 12-year life of the account. The commitments were made during the first three years in relatively equal increments and the assumption of returns was based on cash flow assumptions derived from a historical database of actual private equity cash flows. Hamilton Lane modeled the impact of fees on four different return streams over a 12-year time period. In these examples, the effect of the fees reduced returns by approximately 2%. This does not include performance fees, since the performance of the account would determine the effect such fees would have on returns. Expenses also vary based on the particular investment vehicle and, therefore, were not included in this hypothetical example. Both performance fees and expenses would further decrease the return.

Hamilton Lane (UK) Limited is a wholly-owned subsidiary of Hamilton Lane Advisors, L.L.C. Hamilton Lane (UK) Limited is authorized and regulated by the Financial Conducts Authority.

Hamilton Lane Advisors, L.L.C. is exempt from the requirement to hold an Australian financial services license under the Corporations Act 2001 in respect of the financial services by operation of ASIC Class Order (03/100) U.S. SEC regulated financial service providers. Hamilton Lane Advisors, L.L.C. is regulated by the SEC under U.S. laws, which differ from Australian laws.

The calculations contained in this document are made by Hamilton Lane based on information provided by the general partner (e.g. cash flows and valuations), and have not been prepared, reviewed or approved by the general partners.
