

Q3 2016 Preliminary Earnings Results Summary

November 3, 2016

Some of the information in this presentation may contain projections or other forward-looking statements regarding future events, including but not limited to, those regarding our business outlook for the full year of 2016. These statements involve risks and uncertainties, and actual events or results may differ materially. Among the important factors that could cause actual results to differ materially from those in the forward-looking statements are our dependence on sales of our capture devices for substantially all of our revenue and the effect of a fall in sales during the holiday season; the fact that we do not expect to continue to grow in the future at the same rate as we have in the past, that we may fail to manage our growth, and profitability in recent periods might not be indicative of future performance; any inability to successfully manage frequent product introductions and transitions or to anticipate consumer preferences and successfully develop desirable products; the risks associated with our expected entrance into the consumer drone market; the effects of the highly competitive market in which we operate; the risks related to inventory, purchase commitments and long-lived assets; difficulty in accurately predicting our future customer demand; the importance of maintaining the value and reputation of our brand; and other factors detailed in the Risk Factors section of our Annual Report on Form 10-K for the year ended December 31, 2015, which is on file with the Securities and Exchange Commission, and in our Quarterly Report on Form 10-Q for the quarter ended September 30, 2016. These forward-looking statements speak only as of the date hereof or as of the date otherwise stated herein. GoPro disclaims any obligation to update these forward-looking statements.

We report gross margin, operating expenses, operating income (loss), net income (loss) and diluted net income (loss) per share in accordance with U.S. generally accepted accounting principles (GAAP) and additionally on a non-GAAP basis. Non-GAAP items exclude, where applicable, the effects of stock-based compensation, acquisition-related costs, restructuring costs and the tax impact of these items. Additionally, we report non-GAAP adjusted EBITDA. We believe that non-GAAP information is useful because it can enhance the understanding of our ongoing economic performance. We use non-GAAP reporting internally to evaluate and manage our operations. We have chosen to provide this information to investors to enable them to perform comparisons of operating results in a manner similar to how we analyze our own operating results.

A full reconciliation of GAAP to non-GAAP financial data can be found in the appendix to this slide package and in our Q3 2016 earnings press release issued on **November 3, 2016**, which should be reviewed in conjunction with this presentation.

QUARTERLY NON-GAAP INCOME STATEMENT SUMMARY

APPENDIX

To supplement our unaudited selected financial data presented on a basis consistent with GAAP, we disclose certain non-GAAP financial measures, including non-GAAP gross margin, operating expenses, operating income (loss), net income (loss), earnings (loss) per share and adjusted EBITDA. These non-GAAP measures are not in accordance with, nor serve as an alternative for GAAP. We believe that these non-GAAP measures have limitations in that they do not reflect all of the amounts associated with our GAAP results of operations. These non-GAAP measures should only be viewed in conjunction with corresponding GAAP measures.

In calculating non-GAAP financial measures, we exclude certain items to facilitate a review of the comparability of our core operating performance on a period-to-period basis. The excluded items represent stock-based compensation and other charges that we do not consider to be directly related to core operating performance. We use non-GAAP measures to evaluate the core operating performance of our business, for comparison with forecasts and strategic plans and for calculating return on investment. In addition, management's incentive compensation is determined using non-GAAP measures. Since we find these measures to be useful, we believe that investors benefit from seeing results reviewed by management in addition to seeing GAAP results. We believe that these non-GAAP measures, when read in conjunction with our GAAP financials, provide useful information to investors by facilitating:

- the comparability of our on-going operating results over the periods presented;
- the ability to identify trends in our underlying business; and
- the comparison of our operating results against analyst financial models and operating results of other public companies that supplement their GAAP results with non-GAAP financial measures.

The following are explanations of each type of adjustment that we incorporate into non-GAAP financial measures:

- Stock-based compensation expense relates to equity awards granted primarily to our workforce. We exclude stock-based compensation expense because we believe that the non-GAAP financial measures excluding this item provide meaningful supplemental information regarding operational performance. In particular, we note that companies calculate stock-based compensation expense for the variety of award types that they employ using different valuation methodologies and subjective assumptions. These non-cash charges are not factored into our internal evaluation of net income as we believe their inclusion would hinder our ability to assess core operational performance. We believe that excluding this expense provides greater visibility to the underlying performance of our business operations, facilitates comparison of our results with other periods, and may also facilitate comparison with the results of other companies in our industry.
- Acquisition-related costs include the amortization of acquired intangible assets (primarily consisting of acquired technology), the impairment of acquired intangible assets (if applicable), as well as third-party transaction costs incurred for legal and other professional services. These costs are not factored into our evaluation of potential acquisitions, or of our performance after completion of the acquisitions, because these costs are not related to our core operating performance or reflective of ongoing operating results in the period, and the frequency and amount of such costs are inconsistent and vary significantly based on the timing and magnitude of our acquisition transactions and the maturities of the businesses being acquired.
- Restructuring costs primarily include severance-related costs recorded in connection with our global workforce reduction in January 2016. We believe that excluding this expense provides greater visibility to the underlying performance of our business operations, facilitates comparison of our results with other periods, and may also facilitate comparison with the results of other companies in our industry.
- Adjustment for taxes relates to the tax effect of the adjustments that we incorporate into non-GAAP measures in order to provide a more meaningful measure of non-GAAP net income. We believe that these adjustments provide us with the ability to more clearly view trends in our core operating performance.
