

5280 Solutions Named Exclusive Kofax Platinum Certified Solutions Provider

DENVER, July 2, 2007 /PRNewswire via COMTEX News Network/ -- Today, 5280 Solutions, an award-winning systems integration, software development and premier technology services organization, announced it has achieved exclusive Kofax Platinum Certified Solutions Provider (CSP) status. 5280 Solutions is now a member of a select network of Kofax partners that provide enterprise-class capture solutions based on Kofax technology.

"Achieving Kofax Platinum Certified Solutions Provider status demonstrates 5280 Solutions' technical expertise in designing and delivering exceptional client solutions while underscoring our commitment to Kofax solutions," said Troy Kloberdanz, a Sales Director of 5280 Solutions. "The Kofax capture solution enhances the value of many of our products, including Document Management Imaging Suite for SharePoint 2007 and Dynamic Payables(TM)."

5280 Solutions' Document Management Imaging Suite integrates MOSS 2007, Kofax production scanning capability, "Scan-to-SharePoint" solution and Uconnect(TM) for seamless integration of various applications. Automated digital image capture and data extraction from scanned paper are primary features of this suite that are useful for processing data while storing a document directly into SharePoint 2007.

5280 Solutions' Dynamic Payables integrates Kofax's Ascent for Invoices, Microsoft's Workflow Foundation and SharePoint along with implementation services to dramatically reduce data entry costs. Dynamics Payables is a fully integrated accounts payable solution that streamlines the processing and approval of invoices, resulting in reduced costs, increased process visibility and improved customer and vendor service.

5280 Solutions has created a Kofax to SharePoint 2007 Release Script that leverages a Service-Oriented Architecture (SOA) to transfer scanned images and their associated metadata, in real time, from Kofax's Ascent Capture 7.x to a SharePoint (MOSS 2007 and WSS 3.0) repository.

About Kofax

Kofax, a division of DICOM Group plc (LSE: DCM.L), is the world's leading provider of information capture software, according to research by Harvey Spencer Associates. Kofax products enable the automation of business processes by collecting paper documents, forms, and e-documents from throughout organizations, transforming them into retrievable information, and delivering it all into line-of-business applications, databases, and archives. The company's information capture platform is the world's most popular application of its kind and its VRS (VirtualReScan) is a de facto standard for scanning productivity. Kofax products are widely used in finance, government, insurance, healthcare, and a broad range of companies and agencies that must capture critical business information from paper and electronic documents and forms.
