

5280 Solutions to Showcase Award-Winning SharePoint Suite of Business Products at Microsoft Convergence 2010

5280 Solutions recently named as one of the '100 Companies That Matter in Knowledge Management' by KMWorld magazine

DENVER, March 30, 2010 /PRNewswire via COMTEX News Network/ -- 5280 Solutions(R), a leading provider of Enterprise Content Management (ECM) solutions for Microsoft SharePoint(R), today announced that it will be exhibiting its award-winning Dynamic Filer(R) and Dynamic Payables(TM) products at Microsoft Convergence in Atlanta, Ga., April 24-27, 2010. 5280 Solutions will demonstrate how organizations using Microsoft Dynamics can leverage SharePoint invoice automation and records management requirements.

5280 Solutions, which was recently named as one of the "100 Companies That Matter in Knowledge Management" by *KMWorld* magazine, offers products focused on document and records management, imaging, workflow and integration with Dynamics GP, NAV, AX, SL and CRM. Microsoft Dynamics users are invited to stop by booth #1132 to see how this suite of solutions leverages the power of SharePoint and Microsoft Dynamics.

Dynamic Payables (www.dynamicpayables.com) is a full-featured, Web-based payables management solution designed to automate invoice processing by providing a flexible, open and extensible workflow. By utilizing SharePoint, Windows Workflow Foundation and document-capturing capabilities, it provides users with enforceable controls, a dashboard of key performance indicators (KPIs) and reports to significantly increase the visibility of outstanding invoices, exceptions, bottlenecks, productivity issues and available discounts. Recent awards for Dynamic Payables include the Business Solutions Content Management Innovator Award and KMWorld Trend Setting Product award.

"We are very pleased with the rapid acceptance and industry recognition of our SharePoint-based invoice automation solution," said Mike Randash, Executive Vice President, 5280 Solutions. "Our partners and clients have recognized the business value of our accounts payable automation that is provided on a standard SharePoint platform and is easily integrated with existing accounting and ERP applications."

Dynamic Filer (www.dynamicfiler.com) is a low-cost document imaging solution that automates the process of scanning and filing paper documents into SharePoint from any scanner or multi-function printer (MFP). It provides barcode recognition and automated indexing, and it offers the ability to search for documents directly from existing business applications. Users can link to and search for documents from Microsoft Dynamics and other business systems using a single key. Configuration and integration are quick and easy using Dynamic Filer's point-and-click method. Dynamic Filer is Microsoft Certified and has received the KMWorld Trend Setting Product award.

Dynamic RM (www.dynamicsharepointrm.com) provides a SharePoint-based records management solution designed to manage electronic and physical records. Dynamic RM streamlines the lifecycle of records management, including file plan visualization, declaration and preservation, flexible retention rules, formal hold and consigned disposition processing workflow. Dynamic RM also addresses the complexities of physical container management.

About KMWorld

KMWorld is the leading information provider serving the Knowledge, Document and Content Management systems market.
