Forward Looking Statements

"Safe Harbor" Statement Under the Private Securities Litigation Reform Act of 1995

This presentation contains forward-looking statements made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. These forward looking statements are based on management's current expectations and observations. Included among the factors that, in our view, could cause actual results to differ materially from the forward looking statements contained in this presentation are the following: (i) changes in demand or rates in the drybulk shipping industry; (ii) changes in the supply of or demand for drybulk products, generally or in particular regions; (iii) changes in the supply of drybulk carriers including newbuilding of vessels or lower than anticipated scrapping of older vessels; (iv) changes in rules and regulations applicable to the cargo industry, including, without limitation, legislation adopted by international organizations or by individual countries and actions taken by regulatory authorities; (v) increases in costs and expenses including but not limited to: crew wages, insurance, provisions, lube, oil, bunkers, repairs, maintenance and general, administrative and management fee expenses; (vi) the adequacy of our insurance arrangements; (vii) changes in general domestic and international political conditions; (viii) acts of war, terrorism, or piracy; (ix) changes in the condition of the Company's vessels or applicable maintenance or regulatory standards (which may affect, among other things, our anticipated drydocking or maintenance and repair costs) and unanticipated drydock expenditures; (x) the Company's acquisition or disposition of vessels; (xi) the number of offhire days needed to complete repairs on vessels and the time and amount of any reimbursement by our insurance carriers for insurance claims, including offhire days; (xii) the fulfillment of the closing conditions under, and the execution of customary additional documentation for, the Company's agreements to acquire one drybulk vessel; (xiii) the completion of definitive documentation with respect to charters; (xiv) charterers' compliance with the terms of their charters in the current market environment; and other factors listed from time to time in our public filings with the Securities and Exchange Commission including, without limitation, the Company's Annual Reports on Form 10-K for the year ended December 31, 2010 and its reports on Form 10-Q and Form 8-K.

A large red and white cargo ship is shown sailing on the ocean. The ship has a white superstructure and a red hull. The text "GENCO SHIPPING & TRADING" is visible on the side of the ship. The ship is viewed from a distance, and the water is a light blue color. The sky is a pale blue. The text "GENCO SHIPPING & TRADING" is also visible on the side of the ship.

Genco Shipping & Trading Limited Company Overview

Management

Peter Georgiopoulos *Chairman*

- Over 25 years of experience in the shipping industry
- Chairman and founder of Genco Shipping & Trading Limited
- Chairman and founder of Baltic Trading Limited
- Chairman and founder of General Maritime Corporation
- Chairman of Aegean Marine Petroleum Network
- Principal of Maritime Equity Management from 1991 to 1997

Gerry Buchanan *President*

- Over 40 years of experience in the shipping industry
- Managing director of Wallem from 1996 to 2005
- Responsible for approximately 200 vessels at Wallem
- Prior experience with Canada Steamships Lines of Montreal and Denholm of Glasgow
- Worked in Asia, India and Hong Kong for over 15 years

John C. Wobensmith *Chief Financial Officer*

- 16 years of experience in the shipping industry
- CFO since inception
- Significant experience in M&A, equity fund management and capital raising in the maritime industry
- Formerly Senior Vice President of American Marine Advisors and Vice President with First National Bank of Maryland
- Holds CFA designation

Genco Overview

- Founded in December 2004, completed IPO in July 2005
- Pro forma fleet of 53 vessels with an average age of 6.5 years after all deliveries
 - Agreements for two substantial acquisitions executed in 2010
 - Agreed to acquire 13 Supramax vessels from affiliates of Bourbon SA
 - Agreed to acquire five Handysize vessels from companies within the Metrostar Management Corporation group
- Consistent operating strategy since inception
 - Focus on all sectors of drybulk to maximize ROC
 - Maintain our fleet on time charters with reputable and credit-worthy multi-national companies
 - Operate a modern fleet and utilize well-established third party managers
 - Maintain transparency and align management's interests with shareholders
- Significant investment in Baltic Trading Limited (NYSE:BALT)
 - Fleet of nine modern drybulk vessels with an average age of 1.7 years
 - Focused on spot market employment
 - Genco owns 25.2% economic interest and 83.5% voting interest

High Quality Operations

- Extensive relationships with established drybulk charterers
- These relationships help us to:
 - Stabilize revenue through favorable contract terms
 - Minimize counterparty risk
 - Maximize fleet utilization
- We utilize three leading technical managers
 - Allows access to savings from significant economies of scale
 - In-house technical management staff actively oversees and benchmarks performance of each manager

- Total DWT capacity of 3,811,000 after all deliveries

Tables exclude vessels owned by Baltic Trading Limited

(1) Built & delivery date for the vessel being delivered in the future is an estimate based on guidance received from the seller and/or the shipyard.

GENCO CONSTANTINE

Financial Overview

Pro Forma Balance Sheet *(Excluding Baltic Trading Limited)*

Selected Financial Information

6/30/11

(Dollars in thousands)

Balance Sheet	
Cash⁽¹⁾	\$263,145
Debt⁽²⁾	\$1,652,867
Shareholders' Equity⁽³⁾	\$1,155,093
Capitalization	\$2,807,960
Debt/Capitalization	59%

See the Appendix for a reconciliation of pro forma to actual figures.

- (1) June 30, 2011 pro forma cash is reduced by \$19.1 million of estimated amortization under our three credit facilities for the third quarter of 2011 as well as the remaining \$9.9 million cash payment for the delivery of the Genco Mare which delivered in the third quarter. Pro forma cash excludes Baltic Trading Limited's cash balance of \$3.9 million.
- (2) June 30, 2011 debt includes the liability component of our convertible senior notes in the amount of \$104.3 million. Pro forma debt is reduced by \$19.1 million of estimated amortization under our three credit facilities for the third quarter of 2011, includes \$20.0 million that we have drawn down from our \$100 million credit facility for the purchase of the Genco Mare and excludes \$101.3 million of debt under Baltic Trading's credit facility.
- (3) Represents June 30, 2011 Total Genco Shipping & Trading Limited shareholders' equity which does not reflect the non-controlling portion of Baltic Trading Limited's shareholders equity in the amount of \$211.3 million.

Remaining Vessel CAPEX (Dollars in thousands)

Vessel Name	Expected Delivery ⁽¹⁾	Deposit as % of Purchase Price	Deposit Payment	Debt Financing on Delivery	Equity Payment on Delivery	Total Price
Metrostar Acquisition						
Genco Spirit	Nov 2011	10%	3,325	20,000	9,925	33,250
Total:			\$3,325	\$20,000	\$9,925	\$33,250

- Expect to drawdown \$20.0 million under the \$100 million credit facility to fund the remaining vessel from the Metrostar acquisition
- Expect to utilize cash on hand for the remaining \$9.9 million

(1) Estimated based on guidance from the seller and shipyard.

2009 2010 2011

Current Market Conditions

Recent Market Developments

- Australian coal and iron ore volumes substantially recovered
- Limited iron ore availability from India leads to increased fixtures from Brazil and Australia
 - Brazil exported 32.5 Mt of iron ore in August, a 13% YOY improvement and up almost 50% since the beginning of 2011⁽¹⁾
 - Lower prices for imported iron ore versus domestic iron ore also a factor
- Chinese iron ore inventories still remain fairly high at 92.5 Mt, however, stockpiles have decreased four out of the last five weeks⁽²⁾
- Combined fleet congestion at 55.8 million DWT or 10% of total drybulk fleet⁽³⁾
- Strong electricity production in China leads to record levels of coal imports⁽²⁾
- Daqin coal railway to undergo second scheduled maintenance of 2011⁽²⁾
 - Coal stockpiles set to decline

Short and Long Term Catalysts

- Possible pickup in Japanese imports as rebuilding efforts commence early next year
 - Electricity generated by coal-fired capacity in July increased 36% from April⁽³⁾
- Additional scrapping potential due to combination of low charter rates and high scrap steel prices
- Slippage of newbuilding vessel deliveries as financing concerns continue
- Capesize deliveries have slowed considerably in recent months as only twelve were delivered in August⁽⁴⁾
- China's twelfth five-year plan
- Iron ore trade is forecasted to reach 523mt in the second half of 2011 or 8.6% higher than the first half⁽⁵⁾
 - Brazilian exports forecasted to reach a record of 172mt in second half of 2011 or 17% higher than first half
- Volume expansion as iron ore and coal miners increase production over the next few years

Demand Side Fundamentals

- Chinese steel production increased 9.9% YOY through July 2011⁽¹⁾
- China's fixed-asset investment rose 25.0% YOY through the first eight months of 2011⁽²⁾
- Chinese infrastructure development to continue with plans to:
 - Build as many as 36 million housing units within the next five years⁽³⁾
 - Build 30,000km of railway track by 2015⁽³⁾
 - Invest \$185 billion in urban subway systems by 2015⁽³⁾
- Chinese thermal coal imports expected to more than double by 2015 to 200 Mt from 90 Mt in 2010⁽⁴⁾
- Indian iron ore exports to China have decreased 48% in July from the previous month leading to an increase in iron ore exports from Brazil and Australia⁽⁵⁾
- Indian coal imports are forecasted to increase approximately 14% in 2011 as compared to the prior year⁽⁶⁾

Increasing Iron Ore and Coal Production are Major Factors

Key Expansion Plans⁽¹⁾

(million tons)

- 1) Public statements by subject companies
- 2) Company website
- 3) Brazilian Mining Institute (IBRAM)
- 4) FBR Capital Markets
- 5) RS Platou
- 6) World Steel Association
- 7) Bloomberg

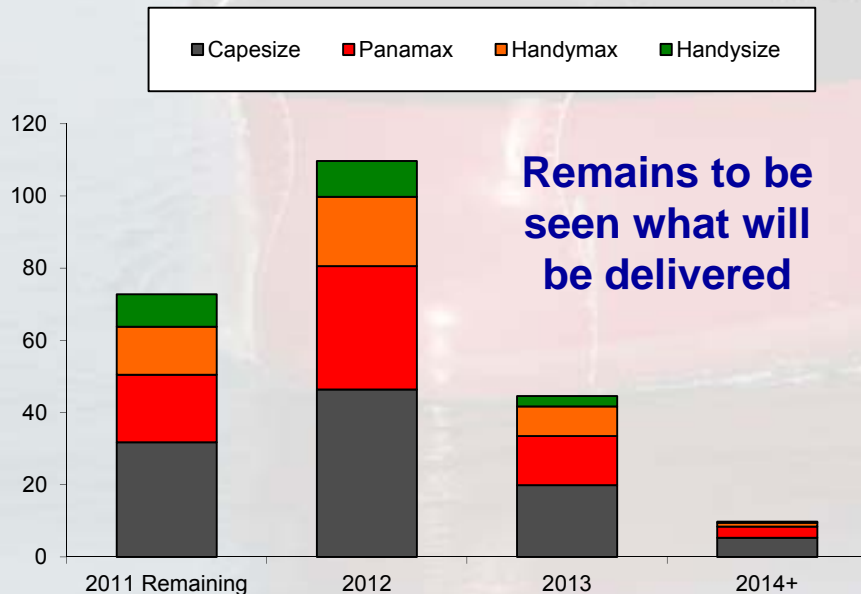

- Key iron ore expansion plans equal an increased capacity of 501 Mt per annum⁽¹⁾
 - 501 Mt represents 50.5% of total 2010 seaborne iron ore trade
- Vale's iron ore production plans are to reach annual production of 469 Mt in 2015 as compared to 308 Mt in 2010⁽²⁾
- Brazilian iron ore production is forecasted to reach 772 Mt a year by 2015 representing more than double the output of 372 Mt from 2010⁽³⁾
- FBR expects 67% increase in coal exports from Australia through 2015⁽⁴⁾
 - Represents an increase of 198 Mt
 - China's coal demand to increase 9.7% in 2011⁽⁵⁾
- The World Steel Association projects the steel market will grow 5.9% in 2011 to 1,359 Mt and 6.0% in 2012 to a new record of 1,441 Mt⁽⁶⁾
- China accounted for 45% of world steel production in 2010⁽⁶⁾
- China's power generation capacity to rise 77% by 2020 with coal accounting for 59% of generation⁽⁷⁾

Supply Side Fundamentals

- Scarce capital continues
- Depressed vessel values imply higher equity installments required from illiquid owners
- 17% of the fleet is greater than 25 years old⁽¹⁾
- 24% of the fleet is greater than 20 years old ⁽¹⁾
- 5.7 million DWT scrapped in 2010 and 17.5 million DWT scrapped in 2011 YTD⁽²⁾
 - Estimates of up to 100 Capesize vessels to be scrapped in 2011⁽³⁾
- Bangladesh demolition yards resumed operation allowing more vessels to be taken out of the market
- Newbuilding price floor supported by rising steel plate prices and Chinese currency appreciation

EBITDA Reconciliation:

Net Income attributable to Genco Shipping & Trading Limited
 + Net interest expense
 + Tax
 + Depreciation and amortization
EBITDA⁽¹⁾

(1) EBITDA represents net income attributable to Genco Shipping & Trading Limited plus net interest expense, taxes and depreciation and amortization. EBITDA is included because it is used by management and certain investors as a measure of operating performance. EBITDA is used by analysts in the shipping industry as a common performance measure to compare results across peers. Our management uses EBITDA as a performance measure in our consolidating internal financial statements, and it is presented for review at our board meetings. The Company believes that EBITDA is useful to investors as the shipping industry is capital intensive which often results in significant depreciation and cost of financing. EBITDA presents investors with a measure in addition to net income to evaluate the Company's performance prior to these costs. EBITDA is not an item recognized by U.S. GAAP and should not be considered as an alternative to net income, operating income or any other indicator of a company's operating performance required by U.S. GAAP. EBITDA is not a source of liquidity or cash flows as shown in our consolidated statement of cash flows. The definition of EBITDA used here may not be comparable to that used by other companies. The foregoing definition of EBITDA differs from the definition of Consolidated EBITDA used in the financial covenants of our 2007 Credit Facility, our \$253 Million Term Loan Credit Facility, and \$100 Million Term Loan Credit Facility. Specifically, Consolidated EBITDA substitutes gross interest expense (which includes, amortization of deferred financing costs) for net interest expense used in our definition of EBITDA, includes adjustments for restricted stock amortization and non-cash charges for deferred financing costs related to the refinancing of other credit facilities or any non-cash losses from our investment in Jinhui, and excludes extraordinary gains or losses and gains or losses from derivative instruments used for hedging purposes or sales of assets other than inventory sold in the ordinary course of business.

AVERAGE DAILY RESULTS:

Time charter equivalent (6)
 Daily vessel operating expenses per vessel (7)

- (1) Average number of vessels is the number of vessels that constituted our fleet for the relevant period, as measured by the sum of the number of days each vessel was part of our fleet during the period divided by the number of calendar days in that period.
- (2) We define ownership days as the aggregate number of days in a period during which each vessel in our fleet has been owned by us. Ownership days are an indicator of the size of our fleet over a period and affect both the amount of revenues and the amount of expenses that we record during a period.
- (3) We define available days as the number of our ownership days less the aggregate number of days that our vessels are off-hire due to scheduled repairs or repairs under guarantee, vessel upgrades or special surveys and the aggregate amount of time that we spend positioning our vessels. Companies in the shipping industry generally use available days to measure the number of days in a period during which vessels should be capable of generating revenues.
- (4) We define operating days as the number of our available days in a period less the aggregate number of days that our vessels are off-hire due to unforeseen circumstances. The shipping industry uses operating days to measure the aggregate number of days in a period during which vessels actually generate revenues.
- (5) We calculate fleet utilization by dividing the number of our operating days during a period by the number of our available days during the period. The shipping industry uses fleet utilization to measure a company's efficiency in finding suitable employment for its vessels and minimizing the number of days that its vessels are off-hire for reasons other than scheduled repairs or repairs under guarantee, vessel upgrades, special surveys or vessel positioning.
- (6) We define TCE rates as our net voyage revenue (voyage revenues less voyage expenses) divided by the number of our available days during the period, which is consistent with industry standards. TCE rate is a common shipping industry performance measure used primarily to compare daily earnings generated by vessels on time charters with daily earnings generated by vessels on voyage charters, because charterhire rates for vessels on voyage charters are generally not expressed in per-day amounts while charterhire rates for vessels on time charters generally are expressed in such amounts.
- (7) We define daily vessel operating expenses to include crew wages and related costs, the cost of insurance, expenses relating to repairs and maintenance (excluding drydocking), the costs of spares and consumable stores, tonnage taxes and other miscellaneous expenses. Daily vessel operating expenses are calculated by dividing vessel operating expenses by ownership days for the relevant period.

* Please see following page for footnotes to table. Table excludes vessels owned by Baltic Trading Limited.

Footnotes to Fleet Table (previous two pages)

- 1) Time charter rates presented are the gross daily charterhire rates before third-party commissions generally ranging from 1.25% to 6.25%. In a time charter, the charterer is responsible for voyage expenses such as bunkers, port expenses, agents' fees and canal dues.
- 2) For the vessels acquired with a below-market time charter rate, the approximate amount of revenue on a daily basis to be recognized as revenues is displayed in the column named "Net Revenue Daily Rate" and is net of any third-party commissions. Since these vessels were acquired with existing time charters with below-market rates, Genco allocated the purchase price between the respective vessels and an intangible liability for the value assigned to the below-market charter-hire. This intangible liability is amortized as an increase to voyage revenues over the minimum remaining terms of the applicable charters. The minimum remaining term for the Genco Titus is on September 16, 2011 at which point the liability will be amortized to zero and the vessel will begin earning the "Cash Daily Rate." For cash flow purposes, Genco will continue to receive the rate presented in the "Cash Daily Rate" column until the charter expires.
- 3) The charter expiration dates presented represent the earliest dates that our charters may be terminated in the ordinary course. Except for the Genco Titus, Genco Constantine, and Genco Hadrian under the terms of each contract, the charterer is entitled to extend the time charters from two to four months in order to complete the vessel's final voyage plus any time the vessel has been off-hire. The charterer of the Genco Titus and Genco Hadrian has the option to extend the charter for a period of one year. The Genco Constantine has the option to extend the charter for a period of eight months.
- 4) These charters include a 50% index-based profit sharing component above the respective base rates listed in the table. The profit sharing between the charterer and us for each 15-day period is calculated by taking the average over that period of the published Baltic Cape Index , or BCI, of the four time charter routes, as reflected in daily reports. If such average is more than the base rate payable under the charter, the excess amount is allocable 50% to each of the charterer and us. A third-party brokerage commission of 3.75% based on the profit sharing amount due to us is payable out of our share.
- 5) We have reached an agreement with Swissmarine Services S.A. on a spot market-related time charter for 10.5 to 13.5 months based on 99% of the average of the daily rates of the BCI, as reflected in daily reports. Hire is paid every 15 days in arrears net of a 5.00% third party brokerage commission. Genco maintains the option to convert to a fixed rate based on Capesize FFA values at 99%. The vessel delivered to its new charterer on June 28, 2011.
- 6) We have reached an agreement with U-Sea Bulk A/S, Copenhagen on a spot market-related time charter for the Genco Beauty based on 100% of the Baltic Panamax Index, or BPI, as reflected in daily reports, except for the initial 30 days after delivery in which hire is based on 100% of the Baltic Panamax P3A. The charter commenced on April 24, 2011. For the Genco Knight, we have reached an agreement with Swissmarine Services S.A. for 10.5 to 13.5 months that commenced on March 23, 2011 at a rate based on 100% of the BPI as reflected in daily reports. For both vessels, hire is paid every 15 days in arrears net of a 5.00% third party brokerage commission. Genco maintains the option to convert to a fixed rate based on Panamax FFA values at 100%.
- 7) We have reached an agreement with Sangamon Transportation Group on a time charter for approximately one trip via the East Coast of South America to the Far East. The vessel will earn a rate of \$13,000 per day if it discharges in the Singapore/South Korea range or \$12,750 per day if it discharges in Malaysia, Thailand, Indonesia or the Philippines. The vessel's previous time charter ended on September 11, 2011 and will deliver to charterers on or about September 25, 2011 after repositioning at which point the rate will be declared. A ballast bonus will be awarded during the repositioning period. Hire payment is to be made every 15 days in advance less a 5.00% brokerage commission.
- 8) We have reached an agreement with Pacific Basin Chartering Ltd. on two spot market-related time charters for 11 to 13.5 months with rates based on 103% and 106% of the average of the Baltic Supramax Index, or BSI, as reflected in daily reports for the Genco Predator and Genco Hunter, respectively. Hire is paid every 15 days in arrears net of a 5.00% third party brokerage commission. Genco maintains the option to convert the balance of any period to a fixed rate based on Supramax FFA values at 103% for the Genco Predator and after the initial 45 days at 106% for the Genco Hunter. The Genco Predator began on its new rate on June 16, 2011 while the Genco Hunter began on its new rate on July 5, 2011.
- 9) We have reached an agreement with Swissmarine Services S.A. on a spot market-related time charter for 3 to 5.5 months based on 95% of the BSI, as reflected in daily reports. Hire is paid every 15 days in arrears net of a 5.00% third party brokerage commission. Genco maintains the option to convert the balance of any period to a fixed rate based on Supramax FFA values at 95%. The vessel delivered to charterers on September 9, 2011.
- 10) We have reached an agreement with D/S Norden A/S on a time charter for 2.5 to 5.5 months at a rate of \$13,000 per day less a 5.00% third party brokerage commission. Hire is paid every 15 days in advance. The vessel's previous time charter ended on September 5, 2011 and is expected to deliver to its new charterer on or about September 20, 2011 after repositioning. A ballast bonus will be awarded to the vessel during the repositioning period.

Footnotes to Fleet Table (previous two pages)

- 11) We have reached an agreement with Louis Dreyfus Commodities Suisse S.A. on a time charter at a rate of \$12,000 per day less a 5.00% third party brokerage commission for 3 to 5.5 months. Hire payment is made every 15 days in advance. The vessel ended its previous time charter on July 15, 2011 and delivered to its new charterer on August 1, 2011 after repositioning. A ballast bonus was awarded to the vessel during the repositioning period.
- 12) We have reached an agreement with Setaf-Saget SAS on a time charter for 6 to 8.5 months at a rate of \$15,250 per day. Hire is paid every 15 days in advance less a 3.75% third party brokerage commission. The vessel was delivered in direct continuation from its previous time charter with Setaf-Saget SAS, which ended on June 10, 2011.
- 13) We have reached an agreement with Klaveness Chartering on spot market-related time charter for 12 to 15.5 months at a rate based on 92% of the average of the daily rates of the BSI, as reflected in daily reports. Hire payment is made every 15 days in arrears less a 5.00% third party brokerage commission. Genco maintains the option to convert the balance period to a fixed rate based on Supramax FFA values at 92%. The vessel is to begin on its new rate on or about September 18, 2011.
- 14) We have reached an agreement with Trafigura Beheer B.V. on a spot market-related time charter based on 95% of the average of the daily rates of the BSI, as reflected in daily reports. The duration of the charter is 11 to 14.5 months with payment being made every 15 days in arrears less a 5.00% third party brokerage commission. Genco maintains the option to convert to a fixed rate based on Supramax FFA values at 95%. The charter began on May 23, 2011. The vessel went into drydock for scheduled repairs on April 17, 2011 and came out of the yard on April 28, 2011.
- 15) We have reached an agreement to enter these vessels into the LB/IVS Pool whereby Lauritzen Bulkers A/S acts as the pool manager. We can withdraw up to two vessels with three months' notice and the remaining three vessels with 12 months' notice.
- 16) We have reached an agreement with Pacific Basin Chartering Ltd. on a spot market-related time charter based on 100% of the average of the daily rates of the Baltic Handysize Index, or BHSI, as reflected in daily reports. The duration of the charter is 11 to 13.5 months with hire paid every 15 days in arrears net of a 5.00% third party brokerage commission. Genco maintains the option to convert the balance of any period to a fixed rate based on Handysize FFA values. The vessel began its new rate on April 21, 2011.
- 17) The rate for the spot market-related time charter will be linked with a floor of \$8,500 and a ceiling of \$13,500 daily with a 50% profit sharing arrangement to apply to any amount above the ceiling. The rate will be based on 115% of the average of the daily rates of the BHSI, as reflected in daily reports. Hire will be paid every 15 days in advance net of a 5.00% third party brokerage commission.
- 18) These vessels were acquired with existing time charters with below-market rates. As described in footnote 21, intangible liabilities will be amortized as an increase to voyage revenues over the minimum remaining terms of the applicable charters. Specifically, for the Genco Avra, Genco Ocean and Genco Bay, the daily amount of amortization associated with them will be approximately \$350, \$700 and \$750 per day over the actual cash rate earned, respectively.
- 19) Built & delivery date for vessel being delivered in the future is an estimate based on guidance received from the seller and/or shipyards.
- 20) The rate for the spot market-related time charter will be based on 115% of the average of the daily rates of the BHSI, as reflected in daily reports. Hire will be paid every 15 days in advance net of a 5.00% third party brokerage commission. The time charter commenced on July 21, 2011 following delivery of the vessel to the Company.
- 21) This vessel was acquired with an existing time charter with a below-market rate. For the time charters that are below-market, Genco allocates the purchase price between the respective vessels and an intangible liability for the value assigned to the below-market charter-hire. This intangible liability will be amortized as an increase to voyage revenues over the minimum remaining terms of the applicable charters, at which point the respective liabilities will be amortized to zero and the vessels will begin earning the "Cash Daily Rate." For cash flow purposes, Genco will continue to receive the rate presented in the "Cash Daily Rate" column until the charter expires.
