TPI TURKEY
INTEGRATED MANAGEMENT SYSTEM POLICY

As TPI Turkey

Our commitments are;

- Not to harm people;
- Protecting the environment by protecting natural resources and preventing environmental pollution;
- To increase awareness of social responsibility,
- Efficient use of the materials and energy we use while providing our products and services;
- To contribute to the communities in which we operate;
- Developing energy resources, products and services for those purposes;
- Leading the best practices in our business lines;
- To create a culture where our leaders will be accounted for, all of our employees will be involved and share these commitments; and
- For our customers; To produce wind turbine blades with Safe, Quality, Timely and Optimum cost.

In this way, we aim to achieve a Quality and HSE performance that we can be proud of, to win the trust of our customers, our stakeholders and the society, and to contribute to sustainable improvement.

In accordance with this purpose;

Our Policy is ;

- Design a systematic approach to Quality and HSE Management for compliance with laws, national and international relevant standards and continuous performance development;
- Identify, evaluate and monitor risk factors and opportunities;
- We will set targets for development, measure, evaluate and report performance;
- We will ask the service providers to manage quality and EHS in accordance with this policy;
- We will establish close relationships with those affected by our operations;
- We will make quality and HSE performance a part of our employees' evaluations and rewards.
