Investor Presentation

May 2020
There are statements made herein that do not address historical facts and, therefore, could be interpreted to be forward-looking statements as that term is defined in the Private Securities Litigation Reform Act of 1995. Such statements are subject to risk factors that could cause actual results to be materially different from anticipated results. These risk factors include, but are not limited to, the following: our reliance on U.S. government contracts, which includes general risk around the government contract procurement process (such as bid protest, small business set asides, loss of work due to organizational conflicts of interest, etc.) and termination risks; significant delays or reductions in appropriations for our programs and broader changes in U.S. government funding and spending patterns; legislation that amends or changes discretionary spending levels or budget priorities, such as for homeland security or to address global pandemics like COVID-19; legal, regulatory, and political change from successive presidential administrations that could result in economic uncertainty; changes in U.S. federal agencies, current agreements with other nations, foreign events, or any other events which may affect the global economy, including the impact of global pandemics like COVID-19; the results of government audits and reviews conducted by the Defense Contract Audit Agency, the Defense Contract Management Agency, or other governmental entities with cognizant oversight; competitive factors such as pricing pressures and/or competition to hire and retain employees (particularly those with security clearances); failure to achieve contract awards in connection with re-competes for present business and/or competition for new business; regional and national economic conditions in the United States and globally, including but not limited to: terrorist activities or war, changes in interest rates, currency fluctuations, significant fluctuations in the equity markets, and market speculation regarding our continued independence; our ability to meet contractual performance obligations, including technologically complex obligations dependent on factors not wholly within our control; limited access to certain facilities required for us to perform our work, including during a global pandemic like COVID-19; changes in tax law, the interpretation of associated rules and regulations, or any other events impacting our effective tax rate; changes in technology; the potential impact of the announcement or consummation of a proposed transaction and our ability to successfully integrate the operations of our recent and any future acquisitions; our ability to achieve the objectives of near term or long-term business plans; the effects of health epidemics, pandemics and similar outbreaks may have material adverse effects on our business, financial position, results of operations and/or cash flows; and other risks described in our Securities and Exchange Commission filings.

DELIVERING Expertise and Technology TO Enterprise and Mission CUSTOMERS
Definitions of Non-GAAP Measures

The Company defines net cash provided by operating activities excluding CACI’s Master Accounts Receivable Purchase Agreement (MARPA) as net cash provided by operating activities calculated in accordance with GAAP, adjusted to exclude net cash received from CACI’s MARPA for the sale of certain designated eligible U.S. government receivables. Under the MARPA, the Company can sell eligible receivables, including certain billed and unbilled receivables up to a maximum amount of $200.0 million. The Company provides net cash provided by operating activities excluding MARPA to allow investors to more easily compare current period results to prior period results and to results of our peers.

The Company views Adjusted EBITDA and Adjusted EBITDA margin, both of which are defined as non-GAAP measures, as important indicators of performance, consistent with the manner in which management measures and forecasts the Company’s performance. Adjusted EBITDA is a commonly used non-GAAP measure when comparing our results with those of other companies. We define Adjusted EBITDA as GAAP net income plus net interest expense, income taxes, depreciation and amortization expense, including depreciation within direct costs, and earnout adjustments. We consider Adjusted EBITDA to be a useful metric for management and investors to evaluate and compare the ongoing operating performance of our business on a consistent basis across reporting periods, as it eliminates the effect of non-cash items such as depreciation of tangible assets, amortization of intangible assets primarily recognized in business combinations, as well as the effect of earnout gains and losses, which we do not believe are indicative of our core operating performance. Adjusted EBITDA margin is adjusted EBITDA divided by revenue.

The Company views FY18 Non-GAAP Net Income Assuming a Full Year of Tax Reform, a non-GAAP measure, as an important indicator of performance, consistent with the manner in which management measures and forecasts the Company's performance. FY18 Non-GAAP Net Income Assuming a Full Year of Tax Reform is defined as GAAP net income excluding (1) the one-time net benefit from Tax Reform consisting of the remeasurement of deferred taxes, partially offset by transition tax on cumulative foreign earnings, and including (2) the application of the new lower federal tax rate of 21% to all of FY18 as if the rate was in effect at that time. We believe that FY18 Non-GAAP Net Income Assuming a Full Year of Tax Reform is useful to investors as it allows investors to more easily compare FY19 results and guidance to FY18 results with a normalized tax rate.

These non-GAAP measures should not be considered in isolation or as a substitute for performance measures prepared in accordance with GAAP.
