FORWARD-LOOKING STATEMENTS

As provided by the safe harbor provision under the Private Securities Litigation Reform Act of 1995, Viad cautions readers that, in addition to historical information contained herein, this presentation includes certain information, assumptions and discussions that may constitute forward-looking statements. These forward-looking statements are not historical facts, but reflect current estimates, projections, expectations, or trends concerning future growth, operating cash flows, availability of short-term borrowings, consumer demand, new or renewal business, investment policies, productivity improvements, ongoing cost reduction efforts, efficiency, competitiveness, legal expenses, tax rates and other tax matters, foreign exchange rates, and the realization of restructuring cost savings. Actual results could differ materially from those discussed in the forward-looking statements. Viad’s businesses can be affected by a host of risks and uncertainties. Among other things, natural disasters, gains and losses of customers, consumer demand patterns, labor relations, purchasing decisions related to customer demand for exhibition and event services, existing and new competition, industry alliances, consolidation and growth patterns within the industries in which Viad competes, acquisitions, capital allocations, adverse developments in liabilities associated with discontinued operations, changes in the levels of interest rates, and any deterioration in the economy, may individually or in combination impact future results. In addition to factors mentioned elsewhere, economic, competitive, governmental, technological, capital marketplace and other factors, including terrorist activities or war, a pandemic health crisis and international conditions, could affect the forward-looking statements in this presentation. Additional information concerning business and other risk factors that could cause actual results to materially differ from those in the forward-looking statements can be found in Viad’s annual and quarterly reports filed with the Securities and Exchange Commission.

Information about Viad Corp obtained from sources other than the Company may be out-of-date or incorrect. Please rely only on company press releases, SEC filings and other information provided by the company, keeping in mind that forward-looking statements speak only as of the date made. Viad undertakes no obligation to update any forward-looking statements, including prior forward-looking statements, to reflect events or circumstances arising after the date as of which the forward-looking statements were made.
This document includes the presentation of “Income Before Other Items”, “Segment Operating Income”, “Adjusted Segment Operating Income” and “Adjusted Segment EBITDA”, which are supplemental to results presented under accounting principles generally accepted in the United States of America (“GAAP”) and may not be comparable to similarly titled measures presented by other companies. These non-GAAP measures are utilized by management to facilitate period-to-period comparisons and analysis of Viad’s operating performance and should be considered in addition to, but not as substitutes for, other similar measures reported in accordance with GAAP. The use of these non-GAAP financial measures is limited, compared to the GAAP measure of net income attributable to Viad, because they do not consider a variety of items affecting Viad’s consolidated financial performance as explained below. Because these non-GAAP measures do not consider all items affecting Viad’s consolidated financial performance, a user of Viad’s financial information should consider net income attributable to Viad as an important measure of financial performance because it provides a more complete measure of the Company’s performance.

**Income Before Other Items** is defined by management as net income attributable to Viad, before income/loss from discontinued operations, restructuring charges/recoveries, impairment charges/recoveries, acquisition transaction-related costs, integration costs, other non-recurring expenses and tax matters. **Segment Operating Income** is defined by management as net income attributable to Viad before income (loss) from discontinued operations, corporate activities, interest expense and interest income, income taxes, restructuring charges, impairment losses and recoveries, and the reduction for income attributable to non-controlling interest. Segment operating income is utilized by management to measure the profit and performance of Viad’s operating segments to facilitate period-to-period comparisons. **Adjusted Segment Operating Income** is defined by management as segment operating income before acquisition integration costs, if any. Income Before Other Items, Segment Operating Income and Adjusted Segment Operating Income are considered useful operating metrics, in addition to net income attributable to Viad, as potential variations arising from non-operational expenses/income are eliminated, thus resulting in additional measures considered to be indicative of Viad’s performance.

**Adjusted Segment EBITDA** is defined by management as segment operating income (defined above) before acquisition integration costs and non-cash depreciation and amortization. Adjusted Segment EBITDA is considered a useful operating metric, in addition to net income attributable to Viad, as potential variations arising from non-recurring integration costs, non-cash amortization and depreciation, and non-operational expenses/income are eliminated, thus resulting in an additional measure considered to be indicative of Viad’s segment performance. Management believes that the presentation of Adjusted Segment EBITDA provides useful information to investors regarding Viad’s results of operations for trending, analyzing and benchmarking the performance and value of Viad’s business. Management also believes that the presentation of Adjusted Segment EBITDA for acquisitions and the Glacier Skywalk enables investors to assess how effectively management is investing capital into major corporate development projects, both from a valuation and return perspective.

### FORWARD-LOOKING NON-GAAP FINANCIAL MEASURES

The Company has also provided the following forward-looking non-GAAP financial measures: Adjusted Segment EBITDA and Adjusted Segment EBITDA Margin. The Company does not provide reconciliations of these forward-looking non-GAAP financial measures to the most directly comparable GAAP financial measures because, due to variability and difficulty in making accurate forecasts and projections and/or certain information not being ascertainable or accessible, not all of the information necessary for quantitative reconciliations of these forward-looking non-GAAP financial measures to the most directly comparable GAAP financial measures are available to the Company without unreasonable efforts. Specifically, recent acquisitions include preliminary recordings of the fair values of the assets acquired and liabilities assumed as of the acquisition date; purchase price allocations are not yet finalized and are subject to change within the measurement period (up to one year from the acquisition date) as the assessment of property and equipment, intangible assets, and working capital are finalized. Consequently, any attempt to disclose such reconciliations would imply a degree of precision that could be confusing or misleading to investors. It is probable that the forward-looking non-GAAP financial measures provided without the directly comparable GAAP financial measures may be materially different from the corresponding non-GAAP financial measures.
