

Mining Engineer / Mine Planner

Rubicon Minerals Corporation is an advanced exploration company that owns the Phoenix Gold Project, located in the prolific Red Lake gold district in northwestern Ontario, Canada. Additionally, Rubicon controls over 280 square kilometres of prime exploration ground in Red Lake and more than 900 square kilometres of mineral property interests in the emerging Long Canyon gold district that straddles the Nevada-Utah border in the United States.

Rubicon is currently seeking a Mining Engineer / Mine Planner for the Phoenix Gold Project. The ideal candidate will possess the following:

Academic Requirements and Experience:

- A minimum B.Sc. degree in Mining Engineering from a recognized post-secondary institution.
- Registration as a Professional Engineer of Ontario or be eligible for registration in the province of Ontario.
- A minimum of five years' experience working in narrow vein underground mines.

Required Knowledge, Skills and Abilities:

- A thorough background of Mine Engineering, including supervising and directing a team of personnel in an advanced exploration project environment.
- Experience with mine ventilation, ground control, mine development, mine studies.
- Exemplary communication skills that enable the candidate to act as a liaison to combine the input from all the departments within the organization involved.
- Strong communication and planning skills are essential.

Rubicon Minerals Corporation fosters a work environment in which all individuals are treated with respect and dignity. The Company does not discriminate on the basis of race, colour, religion, gender, national origin, age, sexual orientation or disability or any other category protected by Canadian federal or provincial laws and regulations.
