

Key Statistics and Reconciliation of Non-GAAP Measures

Western Union's management believes the non-GAAP financial measures presented within this presentation provide meaningful supplemental information regarding the Company's results to assist management, investors, analysts, and others in understanding the Company's financial results and to better analyze operating, profitability, and other financial performance trends in the Company's underlying business because they provide consistency and comparability to prior periods or eliminate currency volatility, increasing the comparability of the Company's underlying results and trends.

A non-GAAP financial measure should not be considered in isolation or as a substitute for the most comparable GAAP financial measure. A non-GAAP financial measure reflects an additional way of viewing aspects of the Company's operations that, when viewed with the Company's GAAP results and the reconciliation to the corresponding GAAP financial measure, provides a more complete understanding of the Company's business. Users of the financial statements are encouraged to review the Company's financial statements and publicly-filed reports in their entirety and not to rely on any single financial measure. A reconciliation of non-GAAP financial measures to the most directly comparable GAAP financial measures is included below, where not previously reconciled above.

Amounts included below are in millions, unless indicated otherwise.

- (k) Represents the impact from the fluctuation in exchange rates between all foreign currency denominated amounts and the United States dollar. Constant currency results exclude any benefit or loss caused by foreign exchange fluctuations between foreign currencies and the United States dollar, net of foreign currency hedges, which would not have occurred if there had been a constant exchange rate. Constant currency results also reflect the impact of Argentina inflation, where indicated, due to its economy being hyperinflationary. The Company estimates Argentina inflation as the revenue growth not attributable to either transaction growth or the change in price (revenue divided by principal).
- (l) Earnings before Interest, Taxes, Depreciation, and Amortization (“EBITDA”) results from taking operating income and adjusting for depreciation and amortization expenses. EBITDA results provide an additional performance measurement calculation which helps neutralize the operating income effect of assets acquired in prior periods.
- (m) Represents the impact from expenses incurred in connection with the Company’s acquisition and divestiture activity, including for the review and closing of these transactions, and integration costs directly related to the Company’s acquisitions. Beginning in 2024, the expenses are not included in the measurement of segment operating income provided to the CODM for purposes of performance assessment and resource allocation.
- (n) During 2021, the Company entered into an agreement to sell its Business Solutions business to Goldfinch Partners LLC and The Baupost Group LLC (collectively, the “Buyer”). The sale was completed in three closings, the first of which occurred on March 1, 2022 with the entirety of the cash consideration collected at that time and allocated to the closings on a relative fair value basis. The final closing, which included the European Union operations, occurred on July 1, 2023 and resulted in a gain of \$18.0 million. Revenues have been adjusted to exclude the carved out financial information for the Business Solutions business to compare the year-over-year changes and trends in the Company’s continuing businesses, excluding the effects of this divestiture.

- (o) Represents severance, expenses associated with streamlining the Company's organizational and legal structure, and other expenses associated with the Company's program to redeploy expenses in its cost base through optimizations in vendor management, real estate, marketing, and people strategy as previously announced in October 2022. Expenses incurred under the program also include non-cash impairments of operating lease right-of-use assets and property and equipment. The expenses are not included in the measurement of segment operating income provided to the CODM for purposes of performance assessment and resource allocation. The Company has also excluded a tax benefit directly associated with streamlining the Company's legal structure in the fourth quarter of 2023 from its measures of adjusted net income, adjusted effective tax rate, and adjusted diluted earnings per share.
- (p) Represents the incremental non-cash amortization and impairment of acquired intangible assets in connection with recent business acquisitions. The expenses are not included in the measurement of segment operating income provided to the CODM for purposes of performance assessment and resource allocation. These expenses are therefore excluded from the Company's segment operating income results.
- (q) In addition to the income tax effects of the adjustments described above, the second quarter of 2024 includes an adjustment to exclude income tax benefit of \$2.6 million related to the non-cash impact of remeasuring the Company's deferred tax assets and liabilities for tax law changes that were enacted in the period in Barbados.
- (r) Adjusted EBITDA results used in the gross and net leverage ratio calculations provide an additional liquidity measurement which helps neutralize the effects of assets acquired in prior periods.
- (s) Leverage ratio is computed by dividing borrowings by adjusted EBITDA for the trailing twelve months, and net leverage ratio is computed by dividing borrowings, less cash and cash equivalents, by adjusted EBITDA for the trailing twelve months. Both ratios are used by management to understand the Company's level of borrowings relative to historical adjusted EBITDA.
- (t) The Company is excluding the impact of Iraq due to significant volatility in revenues since March 2023.
