Consolidated Fiscal 2025 First Quarter Highlights

- Revenue was $14.5 billion, compared to $14.0 billion in the prior fiscal first quarter, representing an increase of 4.0%. On a constant currency[(1)] basis, revenue increased by 6.0% compared to the prior fiscal first quarter driven by growth in both our Endpoint Solutions and Advanced Solutions portfolios. A greater percentage of our sales were presented on a net basis, which negatively impacted our revenue compared to the prior fiscal first quarter by approximately 4%.
- Non-GAAP gross billings[(1)] were $20.7 billion, compared to $19.3 billion in the prior fiscal first quarter, representing an increase of 7.5% and at the top end of our outlook. On a constant currency[(1)] basis, non-GAAP gross billings[(1)] increased by 9.5% compared to the prior fiscal first quarter.
- Gross profit was $998 million, compared to $1,006 million in the prior fiscal first quarter.
- Gross margin was 6.9%, compared to 7.2% in the prior fiscal first quarter, primarily due to higher margins in the prior year in strategic technologies and product mix. The presentation of additional revenues on a net basis positively impacted our gross margin by approximately 23 basis points.
- Operating income was $305 million, compared to $303 million in the prior fiscal first quarter. Non-GAAP operating income[(1)] was $399 million, compared to $425 million in the prior fiscal first quarter.
- Operating margin was 2.1%, compared to 2.2% in the prior fiscal first quarter. Non-GAAP operating margin[(1)] was 2.7%, compared to 3.0% in the prior fiscal first quarter.
- Diluted EPS was $1.98, compared to $1.93 in the prior fiscal first quarter. Non-GAAP diluted EPS[(1)] was $2.80, compared to $2.99 in the prior fiscal first quarter.
- Cash used in operations of $748 million, compared to cash provided by operations of $385 million in the prior fiscal first quarter, and negative free cash flow[(1)] of $790 million, compared to positive free cash flow[(1)] of $344 million in the prior fiscal first quarter.
- We returned $138 million to stockholders in the form of share repurchases and dividends, compared to $235 million in the prior fiscal first quarter.

[(1)]Use of Non-GAAP Financial Information

In addition to the financial results presented in accordance with GAAP, TD SYNNEX uses and refers to:

- Non-GAAP gross billings, which adjusts revenues to exclude costs related to sales of third-party supplier service contracts, software as a service arrangements and certain fulfillment contracts. Non-GAAP gross billings are a useful non-GAAP metric in understanding the volume of our business activity and serve as an important performance metric in internally managing our operations.
- Revenue and non-GAAP gross billings in constant currency, which adjusts for the translation effect of foreign currencies so that certain financial results can be viewed without the impact of fluctuations in foreign currency exchange rates, thereby facilitating period-to-period comparisons of our performance. Financial results adjusted for constant currency are calculated by translating current period activity using the comparable prior year periods' currency conversion rate.
- "Gross to net %" refers to the percentage of adjustments made to non-GAAP gross billings for costs incurred and netted against revenue related to sales of third-party supplier service contracts, software as a service arrangements and certain fulfillment contracts.
- Adjusted selling, general and administrative expenses, which excludes acquisition, integration and restructuring costs, the amortization of intangible assets and share-based compensation expense. TD SYNNEX also uses adjusted selling, general and administrative expenses as a percentage of non-GAAP gross billings, which is a useful metric in considering our selling, general and administrative expenses without the impact of gross to net revenue adjustments to gross billings. Furthermore, TD SYNNEX uses adjusted selling, general and administrative expenses as a percentage of gross profit, which is a useful metric in considering the portion of gross profit retained after selling, general and administrative expenses.
- Non-GAAP operating income and non-GAAP operating margin, which exclude acquisition, integration and restructuring costs, the amortization of intangible assets and share-based compensation expense.
- Earnings before interest, taxes, depreciation and amortization ("EBITDA"), which excludes interest expense and finance charges, net, the provision for income taxes, depreciation, and amortization of intangibles. TD SYNNEX also uses adjusted earnings before interest, taxes, depreciation and amortization ("Adjusted EBITDA") which excludes interest expense and finance charges, net, the provision for income taxes, depreciation, amortization of intangibles, other income (expense), net, acquisition, integration and restructuring costs, and share-based compensation expense.
- Non-GAAP net income and non-GAAP diluted earnings per share, which exclude acquisition, integration and restructuring costs, the amortization of intangible assets, share-based compensation expense, and the related tax effects thereon.

- Free cash flow, which is cash flow from operating activities reduced by purchases of property and equipment. TD SYNNEX uses free cash flow to conduct and evaluate its business because although it is similar to cash flows from operating activities, TD SYNNEX believes free cash flow is an additional useful measure of cash flows since purchases of property and equipment are a necessary component of ongoing operations. Free cash flow reflects an additional way of viewing TD SYNNEX's liquidity that, when viewed with its GAAP results, provides a more complete understanding of factors and trends affecting its cash flows. Free cash flow has limitations as it does not represent the residual cash flow available for discretionary expenditures. For example, free cash flow does not incorporate payments for business acquisitions. Therefore, TD SYNNEX believes it is important to view free cash flow as a complement to its entire Consolidated Statements of Cash Flows.
- Trailing fiscal four quarters return on invested capital ("ROIC"), which is defined as the last four quarters' tax effected operating income divided by the average of the last five quarterly balances of borrowings and equity, net of cash. Adjusted ROIC is calculated by excluding the tax effected impact of non-GAAP adjustments from operating income and by excluding the cumulative tax effected impact of current and prior period non-GAAP adjustments on equity.

In prior periods, TD SYNNEX has excluded other items relevant to those periods for purposes of its non-GAAP financial measures.

Acquisition, integration and restructuring costs, which are expensed as incurred, primarily represent professional services costs for legal, banking, consulting and advisory services, severance and other personnel-related costs, share-based compensation expense and debt extinguishment fees that are incurred in connection with acquisition, integration, restructuring, and divestiture activities. From time to time, this category may also include transaction-related gains/losses on divestitures/spin-off of businesses, costs related to long-lived assets including impairment charges and accelerated depreciation and amortization expense due to changes in asset useful lives, as well as various other costs associated with the acquisition or divestiture.

TD SYNNEX's acquisition activities have resulted in the recognition of finite-lived intangible assets which consist primarily of customer relationships and vendor lists. Finite-lived intangible assets are amortized over their estimated useful lives and are tested for impairment when events indicate that the carrying value may not be recoverable. The amortization of intangible assets is reflected in the Company's Statements of Operations. Although intangible assets contribute to the Company's revenue generation, the amortization of intangible assets does not directly relate to the sale of the Company's products. Additionally, intangible asset amortization expense typically fluctuates based on the size and timing of the Company's acquisition activity. Accordingly, the Company believes excluding the amortization of intangible assets, along with the other non-GAAP adjustments, which neither relate to the ordinary course of the Company's business nor reflect the Company's underlying business performance, enhances the Company's and investors' ability to compare the Company's past financial performance with its current performance and to analyze underlying business performance and trends. Intangible asset amortization excluded from the related non-GAAP financial measure represents the entire amount recorded within the Company's GAAP financial statements, and the revenue generated by the associated intangible assets has not been excluded from the related non-GAAP financial measure. Intangible asset amortization is excluded from the related non-GAAP financial measure because the amortization, unlike the related revenue, is not affected by operations of any particular period unless an intangible asset becomes impaired or the estimated useful life of an intangible asset is revised.

Share-based compensation expense is a non-cash expense arising from the grant of equity awards to employees and non-employee members of the Company's Board of Directors based on the estimated fair value of those awards. Although share-based compensation is an important aspect of the compensation of our employees, the fair value of the share-based awards may bear little resemblance to the actual value realized upon the vesting or future exercise of the related share-based awards and the expense can vary significantly between periods as a result of the timing of grants of new stock-based awards, including grants in connection with acquisitions. Given the variety and timing of awards and the subjective assumptions that are necessary when calculating share-based compensation expense, TD SYNNEX believes this additional information allows investors to make additional comparisons between our operating results from period to period.

TD SYNNEX management uses non-GAAP financial measures internally to understand, manage and evaluate the business, to establish operational goals, and in some cases for measuring performance for compensation purposes. These non-GAAP measures are intended to provide investors with an understanding of TD SYNNEX's operational results and trends that more readily enable investors to analyze TD SYNNEX's base financial and operating performance and to facilitate period-to-period comparisons and analysis of operational trends, as well as for planning and forecasting in future periods. Management believes these non-GAAP financial measures are useful to investors in allowing for greater transparency with respect to supplemental information used by management in its financial and operational decision-making. As these non-GAAP financial measures are not calculated in accordance with GAAP, they may not necessarily be comparable to similarly titled measures employed by other companies. These non-GAAP financial measures should not be considered in isolation or as a substitute for the comparable GAAP measures, and should be read only in conjunction with TD SYNNEX's Consolidated Financial Statements prepared in accordance with GAAP. A reconciliation of TD SYNNEX's GAAP to non-GAAP financial information is set forth in the supplemental tables at the end of this press release.
