

TD SYNEX and the University of South Florida Create Sustainability Partnership

10/11/2022

FREMONT, Calif. & CLEARWATER, Fla.--(BUSINESS WIRE)-- TD SYNEX (NYSE: SNX) today announced a partnership with the University of South Florida (USF) Patel College of Global Sustainability. This partnership is part of TD SYNEX's expanding environmental, social and governance (ESG) efforts, and it allows for the USF student community to engage in a sustainability project in collaboration with TD SYNEX as part of a broader USF educational program on sustainability activities.

"TD SYNEX is a proud supporter of our local community, and we are excited about our partnership with USF, which is a reflection of our commitment to corporate sustainability and enhancing the community around us," commented Adam Rutstein, Director of Global Corporate Responsibility, TD SYNEX. "We have been working closely with the USF team to create a mutually beneficial program that is dedicated to increasing sustainability KPI data processes, and that is engaging and captivating for both students and the TD SYNEX team."

The program builds on TD SYNEX's vision for a vibrant, interconnected world, and it is designed to bring students together to go through an exercise on TD SYNEX's sustainability KPI data processes. The students will also conduct an onsite assessment at TD SYNEX's Clearwater, Fla. headquarters on how the company can work toward making the site net zero for emissions. At the end of the current semester, students will make recommendations on how to simplify and make the company's processes more efficient.

"We are thrilled to partner with TD SYNEX and to support our students who want to participate in this unique and timely opportunity," said Govindan Parayil, Dean of the Patel College of Global Sustainability at the University of South Florida. He further added, "TD SYNEX has a storied history of supporting the communities where they are based, and as a high-impact, global research university dedicated to student success, we are well-qualified to help provide a successful student experience and support TD SYNEX in achieving its community and sustainability objectives."

The collaboration between companies and communities can accelerate the widespread acceptance of sustainable business practices while also having a positive effect on the community, company and employees. Making an impact on local communities has been a point of pride for TD SYNEX throughout its history and the history of its legacy companies. TD SYNEX has committed to the Science-based Target initiative Business Ambition Pledge, and as part of this, TD SYNEX plans to achieve net-zero greenhouse gas emissions in our global operations by 2045. Programs like this one are the beginning of meeting these goals.

About TD SYNEX

About the University of South Florida

The University of South Florida is a high-impact global research university dedicated to student success. Over the past 10 years, no other public university in the country has risen faster in U.S. News and World Report's national university rankings than USF. Serving more than 50,000 students on campuses in Tampa, St. Petersburg and Sarasota-Manatee, USF is designated as a Preeminent State Research University by the Florida Board of Governors, placing it in the most elite category among the state's 12 public universities. USF is a member of the American Athletic Conference.

About the Patel College of Global Sustainability

The Patel College of Global Sustainability (PCGS) is the newest degree-granting college at the University of South Florida and is unique in its mission and its approach. Endowed through generous gifts from Drs. Kiran and Pallavi Patel, the College and our home at the Patel Center for Global Solutions were established. The mission of PCGS is achieving sustainable development, both locally and globally, by fostering social, economic and environmental sustainability; we accomplish this through teaching, research, mentoring students and community outreach, as well

as by generating practical knowledge and developing innovative technologies, skills and policies.
