

TD SYNnex Expands Google Cloud Offering in Nearly 60 Countries

12/19/2022

Expanded cloud capabilities provides innovative scalability and offerings throughout United States, Latin America, Europe and Asia

FREMONT, Calif. & CLEARWATER, Fla.--(BUSINESS WIRE)-- TD SYNnex (NYSE: SNX) announced today its expansion to Google Cloud in nearly 60 additional countries throughout Latin America, Europe and Asia.

“This is a tremendous opportunity to build on our global partnership with Google Cloud and expand our relationship to better serve these international markets, some of which did not have access to our solutions,” said Sergio Farache, chief strategy officer, TD SYNnex. “TD SYNnex has seen significant growth opportunities in these markets with our hyperscaler relationships, and expanding our availability to Google Cloud in these countries allows us to provide excellent scalability and services to meet existing needs.”

TD SYNnex **announced in May** the initial expansion of its cloud solution portfolio with the addition of Google Cloud capabilities, providing users with a suite of cloud computing services businesses can use to enhance productivity and workflow. This new expansion provides users in nearly 60 additional markets greater access to TD SYNnex’s offerings that can be implemented with Google Cloud’s capabilities in artificial intelligence (AI), machine learning (ML), data analytics, infrastructure, collaboration and more.

“With more businesses around the globe moving along their digital transformation journeys, partners with knowledge and expertise in Google Cloud technologies play a key role in these companies’ successful migration to the cloud,” said Eric Buck, director of commercial partners and global distribution, Google Cloud. “By expanding its global support of Google Cloud offerings, TD SYNnex is providing more organizations with greater access to the cloud experts and technologies they need to drive positive business outcomes in the cloud.”

TD SYNEX equips partners with a true, multi-cloud experience for their customers. Google Cloud creates opportunities for channel partners to extend end-to-end cloud solution offerings to end-users and accelerates the transition to cloud infrastructure.

TD SYNEX offers extensive resources to support organizations in building cloud practices and delivering cloud offerings including Cloud Practice Builder programs, Rapid Risk Security Assessments, Google Cloud Migration Assessments, and a growing roster of professional and managed services. Coupled with Google Cloud offerings, devices, and cloud infrastructure, TD SYNEX positions partners to grow new core competencies and accelerate business growth.

The initial Google Cloud offering rollout included the United States, Canada, UK, Ireland, and France. Today, TD SYNEX is available on Google Cloud in:
