

# Hyve Solutions Leveraging 4th Gen Intel Xeon Scalable Processors

1/10/2023

Catalina 2 Platform architected specifically to harness the capabilities of the latest Intel technology

FREMONT, Calif.--(BUSINESS WIRE)-- **Hyve Solutions Corporation**, a wholly owned subsidiary of **TD SYNnex Corporation** (NYSE: SNX) and a leading provider of hyperscale digital infrastructures, today announced it is leveraging 4th Gen Intel Xeon Scalable processors across Hyve-designed motherboards and systems.

"Our Hyperscale customers have a wide range of use cases, from edge computing all the way to in-memory databases, and everything in between," said Jay Shenoy, VP Technology, Hyve Solutions. "To match their ever-diversifying workloads, we have designed three motherboards – 1S (9120), 2S (9220), and 4S (9420), along with a variety of systems to accommodate them. These motherboards enable a variety of systems that cover data analytics, deep learning, high performance and density storage and edge computing."

In particular, Shenoy said Hyve has architected the Catalina 2 Platform to harness the capabilities of the new 4th Gen Intel Xeon Scalable processors.

Designed to meet the needs of today's rapidly changing mix of deep learning (training and inferencing) and general compute workloads, the 4S system is expected to be the highest throughput air-cooled 1U server on the market.

Catalina 2 can accommodate memory capacity of 4TBs and up with standard RDIMMs to support all cores. Catalina 2 supports the Hyve-designed and developed 9420 motherboard which supports the DC-SCM server management module, Cerberus Root of Trust, and OpenBMC.

"From standard 1S platforms and 2S-optimized platforms to high-utilization 4S platforms that offer cutting edge performance across AI, analytics and general compute environments, Hyve continues to meet the changing

demands of today's data center," said Dorin Vanderjack, Vice President and General Manager of US OEM & Strategic Account Sales, Intel.

## About Hyve Solutions Corporation

Hyve Solutions Corporation is a leader in the design to worldwide deployment of hyperscale digital infrastructures. In partnership with customers, Hyve leverages deep-seated industry experience and strong vendor partnerships to design and deliver purpose-built server, storage, and networking solutions to meet datacenter demands for today and beyond. Hyve Solutions is a wholly owned subsidiary of TD SYNnex Corporation (NYSE: SNX).
