

TD SYNEX Achieves AWS Migration Services Competency Status

11/7/2023

FREMONT, Calif. & CLEARWATER, Fla.--(BUSINESS WIRE)-- TD SYNEX (NYSE: SNX), a leading global distributor and solutions aggregator for the IT ecosystem, announced today that it has achieved **Amazon Web Services (AWS) Migration Services Competency** and **Amazon EC2 for Microsoft Windows Server Delivery Partners (SDP)** status with the AWS Partner Network. These designations recognize that TD SYNEX has demonstrated technical proficiency and proven customer success automating and accelerating customer application migration and modernization journeys.

AWS is enabling scalable, flexible, and cost-effective solutions from startups to global enterprises. To support the seamless integration and deployment of these solutions, AWS established the **AWS Competency Program** and **AWS Service Delivery Program** to help customers identify AWS Partners with deep industry experience and expertise. TD SYNEX capitalizes on these programs for the benefit of their global network of partners and end user customers.

"TD SYNEX has invested in building consistent AWS migration capabilities globally, leveraging the best practices, tooling and processes that AWS has instilled in their Migration Acceleration Program (MAP)," said Matt Fox, Vice President, AWS Cloud Solutions, TD SYNEX. "As a Migration Competency Partner, TD SYNEX will work with our AWS partners worldwide to ensure successful cloud migrations for their customers, using approaches that have been proven by AWS across thousands of previous successful migrations."

AWS launched the AWS Migration Services Competency to allow customers to easily and confidently engage highly specialized AWS Partners with proven customer success and technical proficiency in migration and application modernization. The AWS Migration Services Competency and EC2 for Windows SDP take on the heavy lifting of identifying and validating industry leaders.

Achieving the AWS Migration Services Competency differentiates TD SYNEX as an AWS Partner with deep domain expertise delivering migration services that accelerate the customer cloud adoption journey by providing business expertise, infrastructure and application migration expertise, migration tools, education, and ongoing support to customers in the form of professional services. Migration Services Competency partners are able to leverage the proven **AWS MAP** processes, approaches and methodologies. For TD SYNEX and its partners, this is supplemented by the **TD SYNEX Workload Migration Assessment program** which provides a structured, assessment-led approach to AWS migrations.

“The modernization effort with **FEMA IPAWS**, backed by TD SYNEX and Hidden Lake Technology's expertise, leveraging the AWS Migration Competency, has enabled us to elevate the application stack to state-of-the-art standards and fortified the system's security, performance and reliability,” said Mat Hodges, Vice President of Sales at Hidden Lake Technology. “This is particularly impactful given the vital role IPAWS plays in disseminating Amber Alerts. Every improvement directly contributes to our ability to swiftly and effectively respond to emergencies, ultimately aiding in the rescue of children and ensuring the safety of our society.”

Learn more about how TD SYNEX delivers support for AWS Partners by visiting www.tdsynex.com/na/us/aws/ and contacting EnterpriseCloudSales@tdsynex.com to schedule time to meet the team at the upcoming AWS re:Invent conference.
