

Hyve Solutions Announces New Orion Product Line Featuring NVIDIA HGX Platform at 2024 OCP Global Summit

2024-10-15

Strategically Engineered Solutions for AI Workloads, Offering Plug-and-Play, Air- or Liquid-Cooled, Rack-Ready Deployment and Rapid Time to Market

FREMONT, Calif.--(BUSINESS WIRE)-- **Hyve Solutions Corporation**, a wholly owned subsidiary of **TD SYNnex Corporation** (NYSE: SNX) and a leading provider of hyperscale digital infrastructures, today announced the launch of its Orion product line featuring the **NVIDIA HGX™** platform. To be unveiled at the 2024 OCP Global Summit, these new products are designed to meet the escalating demands of AI workloads with unmatched performance, scalability, and support service.

Hyve Solutions, an NVIDIA Partner Network Elite OEM partner, has developed two key solutions within the Orion product line – JBOG and Monolithic – both of which reflect the company's close collaboration with NVIDIA and commitment to delivering groundbreaking AI infrastructure solutions. These solutions are optimized for the **NVIDIA Hopper™ platform** and will be fully compatible with the **NVIDIA Blackwell platform**, ensuring customers can address both present and emerging AI computational needs.

"Our new Orion product line demonstrates Hyve's continued leadership in supporting the growth of AI infrastructure. By integrating the NVIDIA HGX platform, Orion offers a seamless plug-and-play, rack-ready solution that accelerates time to market for our customers," said Steve Ichinaga, President of Hyve Solutions. "With these new offerings, we're enabling datacenters and HPC infrastructures to efficiently scale and optimize their AI deployments, positioning them to tackle the most complex AI workloads now and in the future."

The Orion solutions are designed with modularity and flexibility in mind. The Orion JBOG and Orion Monolithic solutions reduce deployment complexities and optimize total cost of ownership. Both platforms are air-cooled

optimized, with options for liquid cooling to meet specific power density requirements. Hyve's comprehensive validation on both the rack and infrastructure levels ensures that what's tested is what's deployed, simplifying the integration process and reducing potential downtime.

The new Orion solutions are supported by Hyve's robust HUGS (Hyve Unified Global Support) program, which offers supply chain services, RMA, on-site deployments, integration, global logistics, and more – providing a complete solution to help customers meet their business objectives.

"The new Hyve Orion solutions featuring NVIDIA HGX technology deliver flexible, scalable AI infrastructure that addresses both current and future needs of hyperscale data centers," said Kaustubh Sanghani, vice president of GPU Product Management at NVIDIA.

Hyve Orion solutions will be showcased at the 2024 OCP Global Summit, where attendees can see firsthand how these solutions meet the performance, flexibility and scalability needs of advanced AI workloads.

About Hyve Solutions Corporation

Hyve Solutions Corporation is a leader in the design to worldwide deployment of hyperscale digital infrastructures. In partnership with customers, Hyve leverages deep-seated industry experience and strong vendor partnerships to design and deliver purpose-built server, storage, and networking solutions to meet datacenter demands for today and beyond. Hyve Solutions is a wholly owned subsidiary of TD SYNnex Corporation (NYSE: SNX). For more information about Hyve Solutions, visit **hyvesolutions.com**, email **sales@hyvesolutions.com** or call (855) 869-6973.

About TD SYNnex Corporation

TD SYNnex (NYSE: SNX) is a leading global distributor and solutions aggregator for the IT ecosystem. We're an innovative partner helping more than 150,000 customers in 100+ countries to maximize the value of technology investments, demonstrate business outcomes and unlock growth opportunities. Headquartered in Clearwater, Florida, and Fremont, California, TD SYNnex' 23,000 co-workers are dedicated to uniting compelling IT products, services and solutions from 1,500+ best-in-class technology vendors. Our edge-to-cloud portfolio is anchored in some of the highest-growth technology segments including cloud, cybersecurity, big data/analytics, IoT, mobility and everything as a service. TD SYNnex is committed to serving customers and communities, and we believe we can have a positive impact on our people and our planet, intentionally acting as a respected corporate citizen. We aspire to be a diverse and inclusive employer of choice for talent across the IT ecosystem. For more information,
