

# TD SYNnex Awarded a 2024 AWS Partner Award

2024-12-09

TD SYNnex recognized as Distributor Partner of the Year in North America, one of many AWS Partners around the globe that help their customers drive innovation

FREMONT, Calif. & CLEARWATER, Fla.--(BUSINESS WIRE)-- TD SYNnex (NYSE: SNX), a leading global distributor and solutions aggregator for the IT ecosystem, is excited to announce it is a recipient of a 2024 Geography and Global AWS Partner Award, recognizing leaders around the globe that are playing key roles in helping their customers drive innovation and build solutions on Amazon Web Services (AWS). TD SYNnex has been named the winner of the Distributor Partner of the Year award in North America, recognizing TD SYNnex's achievement as one of AWS' top distribution partners in the region, providing significant contributions related to revenue and number of AWS Partners reached.

Announced during the Partner Awards Gala at AWS re:Invent 2024, the Geographic and Global AWS Partner Awards recognize a wide range of AWS Partners that have embraced specialization, innovation, and cooperation over the past year. Geo and Global AWS Partner Awards recognize partners whose business models continue to evolve and thrive on AWS as they support their customers.

"In the past year, we've supported an array of AWS partners in the region, helping them develop cloud practices and attain AWS competencies that drive their businesses forward," said Matt Fox, VP, Cloud Solutions, North America at TD SYNnex. "This award is a testament to the diligent efforts and innovative spirit of our team, who play a pivotal role in scaling and enabling resellers to successfully navigate and grow their AWS businesses. By offering deep expertise, innovative platforms and a comprehensive portfolio of AWS competencies, TD SYNnex empowers its partners to deliver exceptional value to their customers. We appreciate this recognition of our collaboration and look forward to continuing to grow our relationship with AWS."

TD SYNnex is a leading AWS partner with multiple specializations, including Migration and Modernization,

Education and Government Consulting, Cloud Operations Software competencies, and several AWS service delivery validations, like Amazon EC2 for Windows Server, AWS GovCloud (US) and Amazon RDS Delivery. TD SYNEX also supports AWS through its global cloud platform, **StreamOne**®, providing AWS partners with end-to-end management to optimize their AWS consumption business and integrated AWS Marketplace procurement options with the newly released “Buy with AWS” integration.

"At Aligned Technology Group, our strategic partnership with TD SYNEX has been instrumental in our growth and success in serving AWS clients," said John Zemonek, Founder and Managing Partner at Aligned Technology Group. "Through their support, we've been able to scale operations even when resources are tight, build deeper competency in AWS, and innovate quickly to meet the evolving needs of our customers. TD SYNEX's expertise and commitment have allowed us to consistently deliver excellence to our clients while driving significant revenue growth and expanding our capabilities in the AWS cloud domain."

TD SYNEX was also recognized as a finalist for the AWS Distributor Partner of the Year (Global) and AWS Training Partner of the Year (LATAM) recognitions, demonstrating TD SYNEX's global reach, strong relationships and ongoing investments in cloud capabilities, showcasing the power of the organization as both a distributor and solution aggregator.

The Geography and Global AWS Partner Awards included a self-nomination process across several award categories, awarded at both the geographic and global level. All AWS Partners were invited to participate and submit a nomination. Award submissions were reviewed by a third-party, Canalsys, and selected with special emphasis placed on customer success use cases.

In addition, there were several data-driven award categories, which were evaluated by a unique set of metrics that helped measure AWS Partners' performance over the past year. Canalsys audited the datasets used to ensure that all measurements and calculations were objective and accurate. Finalists represented the top three ranked AWS Partners across each category.

The AWS Partner Network (APN) is a global program focused on helping partners innovate, accelerate their journey to the cloud, and take full advantage of the breadth and depth of AWS.
