

# DLT Solutions Achieves CMMC Level 2 Certification, Strengthening Secure Supply Chain Support for the Public Sector

2026-01-27

HERNDON, Va.--(BUSINESS WIRE)-- DLT Solutions, LLC, a subsidiary of TD SYNEX (NYSE: SNX) serving the U.S. public sector market, has achieved Cybersecurity Maturity Model Certification (CMMC) Level 2, formally validating DLT's ability to safeguard Controlled Unclassified Information (CUI) in accordance with Department of War (DoW) requirements and reinforcing the company's role as a trusted partner in mission-critical federal government programs.

"Achieving CMMC Level 2 certification confirms the longstanding commitment of DLT to secure supply chain operations across the U.S. Public Sector," said Eddie Franklin, SVP of TD SYNEX and DLT Solutions. "This advanced certification builds on our established public sector strengths, complementing our broader federal specializations and deep experience supporting complex government requirements."

CMMC Level 2 certification reflects mature security controls, disciplined operational practices, and sustained investment in cybersecurity governance for DLT. For organizations supporting federal missions, particularly those involving defense, intelligence and civilian agencies, CUI handling requirements are increasingly central to procurement decisions. The certification is supported by security controls aligned to DoW standards, documented processes with clear accountability, ongoing monitoring and a commitment to continuous improvement.

"At TD SYNEX, we are firmly committed to protecting customer and vendor data through our cybersecurity measures. For our DLT customers, safeguarding Controlled Unclassified Information (CUI) and meeting national security requirements is critical, and now a requirement in federal procurement," added Kristie Grinnell, EVP and TD SYNEX Chief Information Officer. "Achieving and holding our CMMC Level 2 certification gives agencies and partners the confidence that DLT is prepared to handle CUI and other cyber security requirements responsibly and at scale."

This milestone builds upon DLT's broader secure supply chain posture and reflects years of focused investment to meet the highest standards of cybersecurity maturity. Secure supply chain capability is foundational to delivery of public sector technology solutions. For programs designated to include CUI, every participant involved in fulfilling those requirements must operate within compliant environments. This new certification enables a secure route to market that supports collaboration, scalability and confidence throughout the lifecycle of a public sector engagement.

“This certification comes at a critical moment, as CMMC moves from policy to enforcement and organizations across the defense industrial base prepare for audits and compliance milestones,” added Franklin. “Early certification positions DLT to help streamline secure procurement pathways while maintaining the flexibility needed to support a broad range of public sector missions.”

DLT’s services and solutions can also be accessible to TD SYNEX Public Sector customers. For more information, visit [dlt.com/cmmc](https://dlt.com/cmmc).

## **About DLT Solutions**

DLT Solutions is a wholly owned subsidiary of TD SYNEX, a leading global end-to-end distributor of technology products, services and solutions. DLT is the premier public sector solutions aggregator that specializes in understanding the IT needs of the federal, state, local and education markets. We help simplify the process for software vendors, systems integrators and value-added resellers doing business in the public sector. Leveraging an extensive array of public sector contract vehicles, a deep roster of market experts and dedicated channel and enablement services, DLT provides government agencies and channel partners with the means to transform technology to achieve mission success – all through a secure supply chain.
