

TD SYNnex Awarded 2025 AWS Partner Awards

2025-12-02

TD SYNnex recognized as North American and Latin American Distributor Partner of the Year, one of many AWS Partners around the globe that help their customers drive innovation

FREMONT, Calif. & CLEARWATER, Fla.--(BUSINESS WIRE)-- TD SYNnex (NYSE: SNX) is excited to announce it is a recipient of multiple 2025 Geography and Global AWS Partner Awards, recognizing leaders around the globe that are playing key roles in helping their customers drive innovation and build solutions on Amazon Web Services (AWS). TD SYNnex has been named the winner of Distributor Partner of the Year in North America and Latin America, recognizing top distributors that have provided significant contributions related to revenue and number of AWS partners reached in each region. The company was also honored as Distributor Partner of the Year (Public Sector) in EMEA and Latin America, recognizing its significant achievements in the Public Sector space.

Announced during the Partner Awards Gala at AWS re:Invent 2025, the Geographic and Global AWS Partner Awards recognize a wide range of AWS Partners that have embraced specialization, innovation, and cooperation over the past year. Geo and Global AWS Partner Awards recognize partners whose business models continue to evolve and thrive on AWS as they support their customers.

Additionally, TD SYNnex earned finalist designation for the AWS Distributor Partner of the Year (Global) recognition, demonstrating TD SYNnex's global reach, strong relationships and ongoing investments in cloud capabilities, showcasing the power of the organization as both a distributor and solution aggregator. TD SYNnex is a leading AWS partner with multiple specializations, including Migration and Modernization, Education and Government Consulting, Cloud Operations Software competencies, and several AWS service delivery validations, like Amazon EC2 for Windows Server, AWS GovCloud (US) and Amazon RDS Delivery. The company also supports AWS through its global cloud platform, [StreamOne®](#), providing AWS partners with end-to-end management to optimize their AWS consumption business and integrated AWS Marketplace procurement options.

Earlier this year, TD SYNnex and AWS deepened their alignment by [entering into a Strategic Collaboration Agreement \(SCA\)](#) focused on accelerating cloud and AI adoption across North America, Latin America and the Caribbean, demonstrating confidence in TD SYNnex's ability to drive growth in these key areas. TD SYNnex also maintains an SCA in Europe, focused on SMB acceleration, migration and managed services, FinOps, generative AI, and AWS Marketplace.

"Earning these awards across our regions is a powerful recognition of the trust our AWS partners place in us every day," said **Jan de Kok, Global AWS lead & FinOps GTM at TD SYNnex**. "Our team's commitment to enabling cloud growth through automation, training and differentiated services

continues to drive measurable business outcomes. We're proud to enable partners to build modern, AI-ready practices on AWS, and we look forward to deepening our collaboration to accelerate innovation together."

The Geography and Global AWS Partner Awards included a self-nomination process across several award categories, awarded at both the geographic and global level. All AWS Partners were invited to participate and submit a nomination. Award submissions were reviewed by a third-party, Canalys, and selected with special emphasis placed on customer success use cases.

In addition, there were several data-driven award categories, which were evaluated by a unique set of metrics that helped measure AWS Partners' performance over the past year. Canalys audited the datasets used to ensure that all measurements and calculations were objective and accurate. Finalists represented the top three ranked AWS Partners across each category.

The AWS Partner Network (APN) is a global program focused on helping partners innovate, accelerate their journey to the cloud, and take full advantage of the breadth and depth of AWS.
