

Maxim Integrated: Water Usage and Discharge

Total Water from Manufacturing, Assemble, Test and Packaging Operations (Millions of Gallons)

Normalized Water Usage vs Peers (2016)

Gallons of water / cm² wafer outs

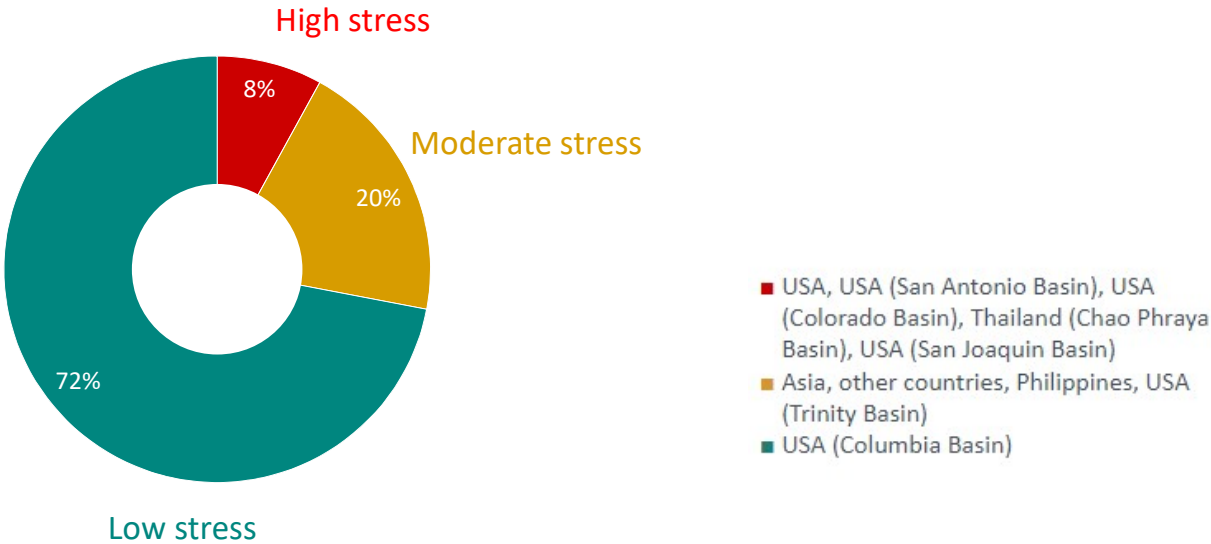

Industry Average:
4.103 gal / cm²
wafer outs

Source: Semiconductor Industry Association, May 2017
Maxim Fab (2141) compared to 24 other US-based fabs

Total Water Usage by Water Basin Stress Level

High/Moderate/Low amount of basin or territory affected by oversubscription to water resources

% of overall water consumption (by volume)
