NEWS RELEASE

AbCellera Announces Two T-Cell Engager Presentations at SITC 2023

9/27/2023

VANCOUVER, British Columbia--(BUSINESS WIRE)-- **AbCellera** (Nasdaq: ABCL) today announced two upcoming poster presentations on its T-cell engager platform at the Society for Immunotherapy of Cancer (SITC) 38th Annual Meeting, to be held virtually and at the San Diego Convention Center from November 1 to 5, 2023.

"We have made significant progress on the application of our T-cell engager platform since we presented data at SITC in 2022," said Bo Barnhart, Ph.D., VP, Translational Research at AbCellera. "We're looking forward to presenting two posters this year demonstrating how key insights into CD3 T-cell engager biology help us to execute on our programs for various tumor targets, including a challenging peptide-MHC target."

Details on AbCellera's poster presentations at SITC are as follows:

Title: A rational approach for selecting CD3-binding antibodies for T-cell engager development

Abstract Number: 1367

Date and Time: Friday, November 3 from 9:00 a.m. to 7:00 p.m. PDT

Location: San Diego Convention Center, Exhibit Halls A and B1 or online at <https://www.sitcancer.org/2023/home>

Title: Targeting intracellular tumor antigens to fight cancer: Discovery and development of functional and specific T-cell engagers against a MAGE-A4 pMHC

Abstract Number: 1395

Date and Time: Friday, November 3 from 9:00 a.m. to 7:00 p.m. PDT

Location: San Diego Convention Center, Exhibit Halls A and B1 or online at <https://www.sitcancer.org/2023/home>

About T-Cell Engagers

CD3 T-cell engagers are bispecific antibodies that guide the immune system to find and eliminate cancer cells by binding both cancer-killing T cells and tumor targets at the same time. Developing effective T-cell engagers requires two parental antibodies—a CD3-binding arm that fine-tunes T-cell activation and a tumor-binding arm with high specificity for cancer cells. The small number of available CD3-binding antibodies that can effectively fine-tune T-cell responses has been a barrier to T-cell engager development. To address this barrier, AbCellera developed a complete T-cell engager platform that includes fully human, developable CD3-binding antibodies with unique binding and functional properties. By combining these antibodies with OrthoMab™, its clinically validated multispecific engineering platform, and its antibody discovery and development engine, AbCellera's T-cell engager platform is designed to bring new cancer medicines to the clinic faster.

About AbCellera Biologics Inc.

AbCellera is breaking the barriers of conventional antibody drug discovery to bring better medicines to patients, sooner. AbCellera's engine integrates expert teams, technology, and facilities with the data science and automation needed to propel antibody-based medicines from target to clinic in nearly every therapeutic area with precision and speed. AbCellera provides innovative biotechs and leading pharmaceutical companies with a competitive advantage that empowers them to move quickly, reduce cost, and tackle the toughest problems in drug development. AbCellera Forward-Looking Statements

This press release contains forward-looking statements, including statements made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. The forward-looking statements are based on management's current beliefs and assumptions and on information currently available to management. All statements contained in this release other than statements of historical fact are forward-looking statements, including statements regarding our ability to develop, commercialize and achieve market acceptance of our current and planned products and services, our research and development efforts, and other matters regarding our business strategies, use of capital, results of operations and financial position, and plans and objectives for future operations.

In some cases, you can identify forward-looking statements by the words "may," "will," "could," "would," "should," "expect," "intend," "plan," "anticipate," "believe," "estimate," "predict," "project," "potential," "continue," "ongoing" or the negative of these terms or other comparable terminology, although not all forward-looking statements contain these words. These statements involve risks, uncertainties and other factors that may cause actual results, levels of activity, performance, or achievements to be materially different from the information expressed or implied by these forward-looking statements. These risks, uncertainties and other factors are described under "Risk Factors," "Management's Discussion and Analysis of Financial Condition and Results of Operations" and elsewhere in the documents we file with the Securities and Exchange Commission from time to time. We caution you that forward-looking statements are based on a combination of facts and factors currently known by us and our projections of the future, about which we cannot be certain. As a result, the forward-looking statements may not prove to be

accurate. The forward-looking statements in this press release represent our views as of the date hereof. We undertake no obligation to update any forward-looking statements for any reason, except as required by law.
