NEWS RELEASE

AbCellera Announces Presentation of Phase 1/2 Data for ABCL635 at TMS 2026 Annual Meeting

2026-10-08

VANCOUVER, British Columbia--(BUSINESS WIRE)-- **AbCellera** (Nasdaq: ABCL) today announced an upcoming poster presentation of Phase 1/2 data on ABCL635 at The Menopause Society's (TMS) 2026 Annual Meeting, to be held October 20 to 24 at the Hilton Bayfront in San Diego, California.

Details on AbCellera's poster presentation at TMS are as follows:

Title: Safety, pharmacokinetics, pharmacodynamics, and preliminary efficacy of ABCL635, an NK3R monoclonal antibody antagonist for the treatment of vasomotor symptoms: a Phase 1/2 study

Poster ID: P-92

Date and Time: Thursday, October 22 from 6:15 p.m. to 7:15 p.m. PDT

Location: Indigo Exhibit Hall (Level 2), Hilton Bayfront

AbCellera will present safety, pharmacokinetics, pharmacodynamics, and efficacy data from its Phase 1/2 trial. This includes new safety data from the Phase 1 multiple ascending dose study, as well as new patient-reported outcome data from the Phase 2 study.

About ABCL635

ABCL635 is a potential best-in-class investigational antibody drug for the non-hormonal, long-acting treatment of moderate-to-severe vasomotor symptoms (VMS), commonly known as hot flashes, due to menopause. ABCL635 selectively targets NK3R, a complex transmembrane protein found on hypothalamic KNDy neurons that helps regulate body temperature. ABCL635 is AbCellera's first program from its GPCR and ion channel platform to advance into the clinic. Additional details are available at www.abcellera.com/pipeline.

The Phase 2 trial of ABCL635 (NCT07118891) is a multicenter, randomized, double-blind, placebo-controlled trial in postmenopausal women with moderate-to-severe VMS due to menopause evaluating safety and efficacy of ABCL635.

About VMS

Hot flashes and night sweats, known as VMS, are the most common menopausal symptoms, impacting up to 80% of women. Many women rate their VMS as moderate to severe, characterized by intense feelings of heat that lead to sweating, chills, and interrupted sleep. VMS are the most frequent reason for seeking medical care for menopause and can persist for over four years after the final menstrual period. VMS have a significant impact on quality of life, are associated with cardiovascular disease risk, and result in lost productivity, career advancement, and income. It is estimated that approximately 12 million women in the US experience moderate-to-severe VMS, of which more than six million seek treatment.

About AbCellera Biologics Inc.

AbCellera (Nasdaq: ABCL) is a clinical-stage biotechnology company focused on discovering and developing first-in-class antibody-based medicines in the areas of endocrinology, women's health, immunology, oncology, and more. For more information, please visit www.abcellera.com.

AbCellera Forward-looking Statements

This document contains forward-looking statements, including statements made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. The forward-looking statements are based on management's beliefs and assumptions and on information currently available to management. All statements contained in this document other than statements of historical fact are forward-looking statements, including statements regarding our ability to develop, commercialize and achieve market acceptance of our current and planned products and services, our research and development efforts, and other matters regarding our business strategies, use of capital, results of operations and financial position, plans, objectives for future operations, and the evaluation of our available liquidity to execute on our strategy (including our ability to access our reimbursement based R&D government contributions). The use of certain data derived from cross-study comparisons are not based on any head-to-head clinical trials. Cross-study comparisons are inherently limited and may suggest misleading similarities and differences and are presented for informational purposes. In some cases, you can identify forward-looking statements by the words "may," "will," "could," "would," "should," "expect," "intend," "plan," "anticipate," "believe," "estimate," "predict," "project," "potential," "continue," "ongoing" or the negative of these

terms or other comparable terminology, although not all forward-looking statements contain these words.

These statements involve risks, uncertainties and other factors that may cause actual results, levels of activity, performance, or achievements to be materially different from the information expressed or implied by these forward-looking statements. These risks, uncertainties, other factors, and definition of our business metrics are described under “Risk Factors,” “Management’s Discussion and Analysis of Financial Condition and Results of Operations” and elsewhere in the documents we file with the Securities and Exchange Commission from time to time. We caution you that forward-looking statements are based on a combination of facts and factors currently known by us and our projections of the future, about which we cannot be certain. As a result, the forward-looking statements may not prove to be accurate. The forward-looking statements in this document represent our views as of the date hereof. We undertake no obligation to update any forward-looking statements for any reason, except as required by law.
