NEWS RELEASE

DISCO Cecilia Enters Private Access, Currently Live Across Select Client Databases

7/6/2023

Cecilia allows lawyers to ask natural language questions and receive narrative answers with citations to evidence drawn from private ediscovery databases

AUSTIN, Texas--(BUSINESS WIRE)-- **DISCO** (NYSE: LAW), a leader in AI-enabled legal technology, announced today that DISCO Cecilia, an AI for large-scale ediscovery, will be made available for private access and is currently live and integrated within select client databases. Cecilia is designed to allow lawyers to interrogate their data faster and more efficiently and accelerate insights into data, witnesses, and events. Unlike chatbots that answer questions based only on public data sources or the Internet, Cecilia provides answers based on the user's private documents in a DISCO Ediscovery database.

Cecilia combines the work of DISCO's AI lab with the latest advances in large language models and generative AI. Unlike solutions that rely on sending confidential data to broadly used models via simple APIs, DISCO's design blends a mix of proprietary technology including natural language processing, generative AI, and advanced search technologies. DISCO remains committed to the premise that client data should remain private and secure.

"We've seen growing interest from lawyers who are excited at the prospect of using generative AI technology in their cases. DISCO Cecilia is designed to enable lawyers to simply ask the ultimate question and get a direct answer, with citations to supporting evidence, dramatically accelerating fact investigation in a dispute," said Liad Levinson, DISCO's Senior Director, Product Management. "DISCO's mission is to build products that make the law work better. With Cecilia, we are solving real problems lawyers have through more efficient review and faster access to facts."

"We look forward to working closely with customers as we roll out our generative AI capability, which we believe will help clients solve real-world issues. We anticipate future innovations that will continue our leadership around AI,

including AI to help generate chronologies, analyze evidence, and augment case strategy at scale," said Kevin Smith, DISCO's Chief Product Officer. "DISCO has been at the forefront of developing AI to support legal processes. This is another example of our long-term investment in our AI center of excellence."

DISCO anticipates Cecilia will be commercially available in the US in 2023 following a phased rollout to current customers. To learn more about DISCO Cecilia and how it can help transform your legal practice, visit **csdisco.com/discovery/cecilia**.

Forward-Looking Statements

This press release contains forward-looking statements regarding Cecilia, including her features and capabilities and the timing of commercial availability, denoted by words such as "will", "expect", "believe", and similar phrases that denote future expectation or intent. You should not rely upon forward-looking statements as predictions of future events. The outcome of the events described in these forward-looking statements is subject to known and unknown risks and uncertainties, including (i) our ability to continue the development of Cecilia and integrate Cecilia into our broader product suite; (ii) the laws and regulations that currently apply or become applicable to our business in the jurisdictions in which we operate; and (iii) the product offerings of competitors and new market entrants, as well as the risks facing DISCO that are described in its filings with the Securities and Exchange Commission ("SEC"), including its Quarterly Report on Form 10-Q for the quarter ending March 31, 2023, filed with the SEC on May 10, 2023. Further information on potential risks that could affect actual results will be included in the subsequent periodic and current reports and other filings that DISCO makes with the SEC from time to time.

Forward-looking statements represent DISCO's management's beliefs and assumptions only as of the date such statements are made. DISCO undertakes no obligation to update any forward-looking statements made in this press release to reflect events or circumstances after the date of this press release or to reflect new information or the occurrence of unanticipated events, except as required by law.

About DISCO

DISCO (NYSE: LAW) provides cloud-native, artificial intelligence-powered legal solutions that simplify legal hold, legal request, ediscovery, legal document review and case management for enterprises, law firms, legal services providers, and governments. Our scalable, integrated solutions enable legal departments to easily collect, process and review enterprise data that is relevant or potentially relevant to legal matters.
