With you in every case.

NEWS RELEASE

DISCO Combines Facts and Law in Unified Litigation Solution

2026-08-05

Industry-first offering moves beyond eDiscovery to deliver full-stack AI-native capabilities for litigators

AUSTIN, Texas--(BUSINESS WIRE)-- **DISCO** (NYSE: LAW), a creator of industry-leading litigation technology, today announced the industry's first unified litigation solution that combines a deep contextual grasp of the facts of a matter and the relevant U.S. case law to give litigators instant access to their most critical information in a single, powerful AI-native application.

The solution will initially bring together the facts of a matter with the controlling law alongside patent-pending litigation-specific workflows in a single pane of glass – something no other company offers. Ultimately, DISCO is building a full suite of deeply integrated litigation capabilities that span the life of a matter from filing to verdict – handling everything from legal facts to drafting to case strategy to trial preparation and case management.

"Today's announcement takes DISCO well beyond eDiscovery and into serving the unique demands of litigators with purpose-built AI tools that adapt and grow to meet their individual needs," said CEO Eric Friedrichsen. "We believe a solution that understands a case and the law and carries that context forward will give litigation teams a strategic advantage and unlock a wealth of institutional knowledge and expertise that today sits siloed within individual lawyers and individual cases. This is litigation evolved."

DISCO's unified litigation solution is currently in pilot with five leading law firms on live cases. The goal of the pilot program is to work closely with tech-forward litigation firms to further enhance the solution ahead of general availability early next year.

One of those firms, Am Law 200 Quarles & Brady LLP, echoed the appeal of the solution and the importance of purpose-built capabilities for top litigation teams.

"Most legal tools are built for lawyers, but not litigators," said Brandon Krajewski, litigation partner at Quarles. "DISCO's approach is exciting because it brings together the facts of a matter and the relevant law in a single platform specifically engineered for the stakes and complexity of modern litigation."

The solution will create deep insights for individual cases and entire dockets and put significant customization and control in the hands of customers, enabling them to create their own workflows, agents and tools that ensure their own best practices drive how the solution supports their work both within and across matters.

"DISCO's unified litigation solution is the first step in what we see as a command center for complex litigation that unites all of the most important capabilities, information and knowledge, tailored to the needs of litigators," said Chief Product, Technology and Strategy Officer Richard Crum. "While there is more to come – and it will move quickly – even right out of the gate our facts-plus-law architecture puts unique and valuable capabilities in the hands of litigators and case teams."

Forward-Looking Statements

This press release contains forward-looking statements, including, among other things, statements regarding the capabilities and timing of general availability of DISCO's unified litigation solution. Words such as "may," "should," "will," "believe," "expect," "anticipate," "target," "continue," "potential," "build," "extend" and similar phrases that denote future expectation or intent regarding DISCO's business are intended to identify forward-looking statements. You should not rely upon forward-looking statements as predictions of future events.

The forward-looking statements contained in this press release are subject to a variety of risks, uncertainties, and factors, including those more fully described in our filings with the Securities and Exchange Commission ("SEC"), including our Quarterly Report on Form 10-Q for the quarter ended March 31, 2026, filed with the SEC on May 6, 2026. Further information on potential risks that could affect actual results will be included in the subsequent periodic and current reports and other filings that we make with the SEC from time to time.

Forward-looking statements represent DISCO's management's beliefs and assumptions only as of the date such statements are made. We undertake no obligation to update any forward-looking statements made in this press release to reflect events or circumstances after the date of this press release or to reflect new information or the occurrence of unanticipated events, except as required by law.
