New DISCO Auto Review Capability Puts Legal Teams in Control of AI-Powered Review

2026-08-20

Enables faster client-led AI reviews with higher precision and recall; no expertise required

AUSTIN, Texas--(BUSINESS WIRE)-- **DISCO** (NYSE: LAW), a creator of industry-leading litigation technology, today announced the launch of a feature enhancement to its generative AI-powered Auto Review solution that makes prompt iteration faster and easier and helps teams refine their own AI review instructions without prompt-engineering expertise.

For legal professionals, prompt iteration and understanding effectual oversight over AI tools is not typically a skill they have been trained on. Prompt engineering is often the most time-consuming element of an insourced review, and can take several days or even weeks of fine tuning to find the correct language to deliver optimal results. This significant enhancement to DISCO Auto Review removes the prompt-engineering hurdle. By simplifying the process, the solution empowers teams to confidently manage high-quality document reviews themselves, while reducing the reliance on outside legal services.

"Most litigators aren't AI prompt engineers, and their time is better spent on the strategic aspects of their matter," said DISCO's Director of AI Consulting, James Park. "This is an 'easy button' for complex reviews. We're removing the technical trial-and-error of prompting to give litigators full access to the power and speed of AI review without relying on legal service providers. For litigators this means better results, faster. For law firms and corporations, this is an opportunity to bring reviews in house for greater control and lower cost."

DISCO Auto Review allows users to extract key evidence faster than traditional human-led workflows. Its enhancement tool improves tag descriptions based on a user's plain-language feedback, runs tests on sample

documents and generates new prompts with improved performance metrics, allowing legal teams to review their data and meet production obligations.

DISCO Auto Review is a solution that can effortlessly handle large matters and enables teams to accelerate high-volume first-pass reviews. Customers can leverage it either as a true self-service option that lets legal teams define and run their own review standards in-house or as a full-service DISCO-managed offering. Legal teams can run AI-powered reviews on their own or hand it off to DISCO's Managed Review team.

DISCO's Auto Review enhancement tool will be on display at its ILTACON booth #216 in Nashville this August. Interested customers are invited to stop by for a product demonstration.

Forward-Looking Statements

This press release contains forward-looking statements, including, among other things, statements regarding the capabilities of DISCO's Auto Review enhancement feature. Words such as "may," "should," "will," "believe," "expect," "anticipate," "target," "continue," "potential," "build," "extend" and similar phrases that denote future expectation or intent regarding DISCO's business are intended to identify forward-looking statements. You should not rely upon forward-looking statements as predictions of future events.

The forward-looking statements contained in this press release are subject to a variety of risks, uncertainties, and factors, including those more fully described in our filings with the Securities and Exchange Commission ("SEC"), including our Quarterly Report on Form 10-Q for the quarter ended June 30, 2026, filed with the SEC on August 5, 2026. Further information on potential risks that could affect actual results will be included in the subsequent periodic and current reports and other filings that we make with the SEC from time to time.

Forward-looking statements represent DISCO's management's beliefs and assumptions only as of the date such statements are made. We undertake no obligation to update any forward-looking statements made in this press release to reflect events or circumstances after the date of this press release or to reflect new information or the occurrence of unanticipated events, except as required by law.
