PHINIA Publishes 2025 Global Emission Standards Booklet for Light-Duty Vehicles

2025-10-22

- PHINIA's Global Emission Standards Booklet continues a 30+ year commitment to inform the market on evolving fuel and emissions regulations, a project first developed by Delphi in 1993
- This year's edition focuses on light-duty vehicles, covering current standards as well as historical and upcoming requirements across key regions globally

AUBURN HILLS, Mich.--(BUSINESS WIRE)-- PHINIA Inc. (NYSE: PHIN), a global leader in premium fuel systems, electrical systems, and aftermarket solutions, today announces the publication of its **2025/2026 Global Emission Standards Booklet**, designed to help industry professionals keep pace with evolving emissions regulations worldwide.

Drawing on decades of engineering expertise and extensive product development, PHINIA's latest guidance helps vehicle and engine manufacturers and policymakers to stay ahead of new emissions standards, including on-board diagnostics and monitoring of emissions, and standards for reference fuels. This year's edition focuses on regulations for passenger cars and light-duty vehicles, covering major markets including the European Union, United States, Brazil, Japan, China, South Korea and India.

"Supporting our customers to deliver cleaner, more efficient technologies has been at the heart of this project since its inception," said Todd Anderson, Chief Technology Officer at PHINIA. "This year's focus on light-duty vehicles reflects the growing urgency to reduce the environmental impact of the most widely used vehicle category worldwide. By bringing global standards together in one comprehensive guide, the booklet exemplifies PHINIA's commitment to helping OEMs, automotive industry professionals and policy communities to accelerate the transition to a cleaner tomorrow."

The 2025 Global Emission Standards Booklet for light-duty vehicles and the 2024 edition for heavy-duty and off-road vehicles are both available **here**.

About PHINIA

PHINIA is an independent, market-leading, premium solutions and components provider, with over 100 years of manufacturing expertise and industry relationships and a strong brand portfolio that includes DELPHI®, DELCO REMY® and HARTRIDGE™. With over 12,500 employees across 49 locations in 21 countries, PHINIA is headquartered in Auburn Hills, Michigan, USA.

Across commercial vehicles and industrial applications (medium-duty and heavy-duty trucks, buses and other off-highway construction, marine, agricultural and aerospace and defense), light commercial vehicles (vans and trucks) and light passenger vehicles (passenger cars, mini-vans, cross-overs and sport-utility vehicles), we develop fuel systems, electrical systems, and aftermarket solutions designed to keep combustion engines operating at peak performance, while at the same time investing in advanced technologies to unlock the potential of alternative fuels.

By providing what the market needs today to become more efficient and sustainable, while also developing innovative products and solutions to contribute to lower carbon mobility, we are the partner of choice for a diverse array of customers – powering our shared journey toward a cleaner tomorrow.
