Manzanita Systems, A DTS Company, Announces Enhanced Content Solutions For Broadcasters

Leader in MPEG Solutions Releases Updates to Flagship Transport Stream Products at NAB 2015

CALABASAS, Calif., April 13, 2015 /PRNewswire/ -- Manzanita Systems, an industry-leading developer of MPEG software solutions for digital television, VOD and OTT markets, is releasing enhanced versions of its flagship content multiplexing and analyzing solutions for broadcasters. Established in 1996, Manzanita was acquired by [DTS, Inc.](#) (Nasdaq: DTSI) in August 2014.

Manzanita's MP2TSME v8.0 transport stream multiplexer now features HEVC and 4K support to deliver broadcast-quality transport streams for VOD services. The company's TSA v6.0 transport stream analyzer, available in Q2 2015, will also include HEVC support as well as a new Program Viewer option for checking transport stream audio and video content, frame-by-frame.

"These significantly enhanced versions of both our multiplexer and analyzer ensure our customers can utilize the latest audio and video technologies in the broadcast and VOD markets," said Greg Vines, vice president, product commercialization, DTS, Inc. "As the leader in the field for nearly 20 years, Manzanita provides solutions that go beyond specifications to deliver a quality content experience on any device."

"Manzanita's transport stream multiplexer is the first choice of top network operators, post-production and service facilities, MPEG equipment manufacturers and content providers for its reliability, rich feature set and strict adherence to standards," said Geir Skaaden, senior vice president, corporate business development, digital content and media solutions, DTS, Inc. "With the ability to now utilize the full resources of DTS, Manzanita has demonstrated its continued industry leadership with the latest updates to its flagship products."

DTS will be showcasing Manzanita's latest tools at NAB 2015, booth #SU4414, April 13-16 in Las Vegas. Media and analysts interested in scheduling a demo and interview can contact dts@globalresultspr.com.
