Rovi Extends Product and Entertainment Discovery Patent License Agreement to Funai

2015-07-29

Company Release - 7/29/2015 8:00 AM ET

License Enables One of the Leading Global Consumer Electronics Manufacturers to Implement Rovi's Patent Portfolio Across Japan and Europe

SANTA CLARA, Calif.--(BUSINESS WIRE)-- Rovi Corporation (NASDAQ: ROVI) today announced that Rovi has renewed its discovery patent portfolio license agreement with Funai Electric Co. Ltd., covering Japan and Europe. The cross-regional licenses enable Funai to use Rovi's patent portfolio for high-quality digital consumer electronics, giving Funai access to a range of Rovi's best-in-class discovery features including intuitive search and targeted recommendations services. Today's announcement further builds upon Funai's existing North American Intellectual Property (IP) license agreement.

In addition, Funai now has the right to adopt Rovi's G-Guide HTML in Japan. The G-Guide HTML features advanced discovery capabilities, such as search functionality and a browser-based interface, to help drive a robust consumer entertainment experience across Funai's TVs and Blu-ray disc recorder products. The Rovi G-Guide HTML also boasts a sleek TV listing grid designed to showcase rich images including cast photos and Rovi's "six-degrees" discovery capability to help consumers quickly find relevant content that interests them.

"As one of the global leaders in consumer electronics, our license renewal and expansion with Funai reinforces Rovi's leadership in bringing innovative entertainment discovery experiences to market," said Samir Armaly, executive vice president, intellectual property and licensing, Rovi. "This collaboration underscores the value of Rovi's patents and product solutions to Funai, including lower development costs and the ability to offer G-Guide's advanced features to its customer base."

About Rovi Corporation

Rovi is leading the way to a more personalized entertainment experience. The company's pioneering guides, metadata and recommendations continue to drive program search and navigation on millions of devices across the globe.
