

5280 Solutions Offers SharePoint 2007 Quick-Start Assessment and Roadmap

DENVER, Sept 12, 2007 /PRNewswire-FirstCall via COMTEX News Network/ --

5280 Solutions, a premier technical consulting, systems integration, and software development organization, announces the launch of the Microsoft Office SharePoint Server (MOSS) 2007 Quick-Start Assessment and Roadmap program.

This program is designed to help organizations quickly and cost-effectively evaluate the significant new capabilities of Microsoft Office SharePoint Server (MOSS) 2007. The SharePoint Quick-Start Assessment and Roadmap program aims to model proven best practices to rapidly deploy a SharePoint solution to meet both business and technical requirements.

The SharePoint 2007 Quick-Start engagement consists of three main elements:

- Matching key business initiatives to SharePoint capabilities and laying out a road-map to deliver a valuable solution with focus on Enterprise Content Management, Enterprise Search, Collaboration, Portals, Business Intelligence and Business Process and Forms.
- Analyzing the relevant IT infrastructure and corporate information architecture and content to assist in enabling an initial SharePoint 2007 feature set that is targeted to meeting the key objectives first, while also prioritizing and planning additional features for future deployment considerations.
- Implementing a prototype SharePoint 2007 environment to test design concepts, gain critical feedback early in the process, and provide a working prototype to educate Quick-Start participants on SharePoint 2007 features and functionality for developing internal best practices.

"SharePoint is becoming a key element in both the technical and business infrastructure at many organizations," said Mike Randash, Executive Vice President of 5280 Solutions. "Our SharePoint 2007 Quick-Start program allows companies to understand the impact of this important platform while quickly evaluating and implementing a high value SharePoint solution. Our methodology, best practices, and project approach provide immediate efficiencies and a fast return on investment for most organizations."

The Quick-Start Assessment is completed at a predictable cost and typically takes 2-3 weeks to complete for most organizations. 5280 Solutions also provides complete business solutions built on the SharePoint platform including the SharePoint Document Management Imaging Suite, Dynamic Payables(R), and Windows Workflow Foundation integration enhancements.
