

## Health Education Solutions Expands ACLS Certification Materials Online: Free Advice, Tools and Stories

### Leading Provider of Continuing Healthcare Education Creates Special Section Within Research Library to Improve Knowledge of Life-Saving Skill Set

LINCOLN, Neb., Sept 21, 2010 /PRNewswire via COMTEX News Network/ --

Every year, about 785,000 Americans have a first heart attack and another 470,000 have a recurrent one. Healthcare professionals certified in advanced cardiac life support (ACLS) save many of their lives. Health Education Solutions, the leading provider of continuing education solutions for healthcare professionals, today released a new [ACLS Special Section](#), a series of articles, vignettes and important facts about ACLS and [ACLS certification](#), available in its online research library. The 10-article special section is free for healthcare providers and others who want to learn more about this important life-saving skill set.

"Now more than ever, busy healthcare professionals need easy access to training and resources that will help them respond to medical emergencies," said David King, president of Health Education Solutions. "Whether you're seeking to update your professional skills, need continuing medical education credits or require certification or recertification in ACLS, it's easy to get the vital information you need through Health Education Solutions' research library and online courses."

The special section includes information about the [ACLS course](#), as well as stories, how-tos and more. Here are some highlights:

- Four Important Things to Know About ACLS Certification
- Your ACLS Study Guide: Three Keys to Success
- AED Training: Challenges to AED Use
- F.A.S.T. Stroke Assessment
- Heart Attack Symptoms Differ with Gender and Ethnicity

Health Education Solutions offers a variety of ways for healthcare professionals and others who want to be prepared for a medical emergency to master the skills they need. For example, the online Advanced Cardiac Life Support ([ACLS recertification](#)) and initial certification courses provide training in the key skills necessary to intervene when someone experiences a heart attack or other medical emergency.

Initial certification requires completion of an in-person skills test, whereas recertification is 100 percent online. Students have access to the course materials for 12 months after purchase regardless of when they take their exam.

Using a blended approach to learning, the ACLS course offers the convenience of self-paced study as students work toward certification and continuing medical education credits. Health Education Solutions also offers online certification and recertification for pediatric advanced life support (PALS). ACLS and PALS courses follow the American Heart Association guidelines and were developed in partnership with Union College.
