The chart includes the combined operations of LaRonde and LZ5

- Ramp-up of mining activities in the West mine area at the LaRonde mine continues to progress as planned. An average production rate of 1,221 tpd was achieved, slightly above the forecast of 1,150 tpd
- LZ5 mine achieved a record production of 3,140 tpd, well above forecast. The strong performance was driven by continuous optimization of automated equipment
- Production from automated equipment was above targets both at LaRonde (26% of mucking done from surface) and LZ5 (21% of the production mucking and hauling done from surface)
- In Q2 2021, there is a planned ten-day maintenance shutdown at the LaRonde Complex.
- Three exploration drifts being developed to explore areas located 1 to 3 km from surface below LZ5 and west of the 20N Zone are progressing as planned. Initial exploration drilling is expected to commence in Q3 2021

* LZ5: LaRonde Zone 5
