

NEWS RELEASE

Lumentum and Amada Co-Develop 3 kilowatt and 9 kilowatt Class Fiber Lasers

2016-10-25

High Power Fiber Lasers Deliver Expanded Capabilities for Industry's Most Demanding Macromaterials Processing

Hannover, Germany and Milpitas, Calif., October 25, 2016 -- Lumentum Holdings Inc. ("Lumentum") today announced new, jointly developed, high-power fiber lasers with Amada Holdings Co., Ltd. ("Amada"), an industry-leading manufacturer of machine tools for metal fabrication. Amada will unveil, for the first time, the LCG-3015AJ (9 kW) laser-cutting machine that incorporates a jointly developed 9 kilowatt fiber laser at this year's 2016 EuroBLECH exhibition in Hannover, Germany. In addition, Amada will showcase a new laser-based cutting machine tool (ENSIS-3015AJ) and a new laser-based welding machine tool (FLW-ENSIS M3). Both new 3 kilowatt machine tools include jointly developed 3 kilowatt fiber lasers and ENSIS Technology -- unique beam control capability which enables fast cutting and welding of thin-to-thick metals.

"For almost ten years, Lumentum and Amada have collaborated on developing some of the industry's most innovative laser solutions for macromaterials processing," said Alan Lowe, president and CEO. "The new fiber lasers are the latest result of our strong partnership with Amada."

Higher-power lasers are differentiating elements in sophisticated machine tools which cut sheets of aluminum, steel and other metals for the manufacturing of automobiles, aircraft, and appliances targeted at commercial and consumer markets. Higher-power lasers are increasingly used for welding, material deposition (cladding) and large-scale surface treatment applications.

"Fiber lasers continue to gain momentum over CO2 laser-based cutting systems for metal processing because of the advantages they provide that include higher-cutting speeds, improved cutting quality, increased energy efficiency, and lower maintenance requirements," said Alex Schoenfelder, vice president, product line management, Commercial Lasers. "These benefits, in turn, result in significantly lower overall costs for metal processing manufacturers."

Lumentum will showcase its CORELIGHT™ series fiber laser products in Hall 16, Stand #F158 at 2016 EuroBLECH. The Amada Group will showcase its new machine tool products in [Hall 12, Stand #D06 and #F06](#).

About LUMENTUM

LUMENTUM (LITE) is a market-leading manufacturer of innovative optical and photonic products enabling optical networking and commercial laser customers worldwide. Lumentum's optical components and subsystems are part of virtually every type of telecom, enterprise, and data center network. Lumentum's commercial lasers enable advanced manufacturing techniques and diverse applications including next-generation 3D sensing capabilities. Lumentum is headquartered in Milpitas, California with R&D, manufacturing, and sales offices worldwide. For more information, visit www.lumentum.com.

This press release contains forward-looking statements including, but not limited to demand for certain products as well as market and industry expectations. These statements are not guarantees of results and should not be considered as an indication of future activity or future performance. Actual results may vary materially from these expectations as a result of various risks and uncertainties. Information about these risks and uncertainties, and other risks and uncertainties that affect Lumentum's business, is contained in the risk factors section and other sections of Lumentum's Annual Report on Form 10-K for the fiscal year ended July 1, 2016 as filed with the SEC, as well subsequent reports filed with or furnished to the SEC. These reports are available on Lumentum's website at www.lumentum.com and the SEC's website at www.sec.gov. Lumentum assumes no obligation to, and does not currently intend to, update any such forward-looking statements.
