

McEwen Mining Inc. has four producing mines, located in Nevada, Ontario, Mexico and Argentina, and also owns a very large, underdeveloped copper deposit in Argentina. Our goal is to create a strong and profitable gold and silver producer focused in the Americas. In order to do that we need great talent. McEwen Mining currently has an opening at our corporate office for a:

## **Senior Data Analyst**

### **The opportunity**

We are looking for a dynamic, self-motivated professional with a passion for data. This analytical and data expert needs to establish McEwen's analytical reporting platform in PowerBi / SQL Databases, as well as work closely in the integration between our various platforms and data sources.

Work collaboratively with internal stakeholders of McEwen to enhance their ability to use and interpret data and develop their own enhanced information management capabilities to support better decision making, along with guidance on how to govern, secure and promote trust in the data.

McEwen vision is to articulate the big picture and the precision to see the smallest of details. You will be collaborating with stakeholders to understand their data environment and help McEwen on the journey to become a data driven organization utilizing modern BI approaches and advance analytics. This is an exciting opportunity to build and deploy a data strategy and visualization project from the bottom up.

### **Key responsibilities:**

- Automate report building and dashboards for McEwen's Operations
- Extract, Transform, Load data from multiple sources
- Ensure accuracy and reliability of data, sourced from our different platforms
- Design and implement accessible, high-impact visualizations that clearly communicate results, elucidate patterns, promote accountability, generate actionable insights, and facilitate decision making
- Support integration of event tracking data from multiple platforms
- Produce technical and user documentation
- Deliver concise and meaningful reporting to cross teams
- Lead, plan and execute BI projects to meet business objectives
- Coach data citizens on best practices and usage of the visualization platform.

### **Technical Requirements:**

- Demonstrated understanding and experience with all facets of data and analytics from Data Warehousing to Business Intelligence.
- Experience developing Data Pipelines and ETL solutions.
- Experience with languages like SQL, DAX, Python
- Strong data analysis and data modeling skills.
- Experience dealing with large data sets.
- Experience with one or more SQL, SSIS, SSAS, Azure Data Factory, Informatica, Power Query
- Experience with OSI PI considered as an Asset
- Experience with MS Power Platform (Power BI, Power Apps and Power Automate)

- Ability to work independently and in a team environment.
- Excellent interpersonal, written, and verbal communication skills.
- Excellent problem solving and analytical thinking/innovation.

**Qualifications:**

- Bachelor's degree in computer science, mathematics, data science, informatics, data analytics, engineering, or a related field.
- 4+ years demonstrated experience in a business-oriented data processing

**Diversity and Inclusion**

McEwen is strongly committed to Diversity and Inclusion and aims to create a healthy, accessible and rewarding work environment which highlights employees' unique contributions to our company's success. As an equal opportunity employer, we welcome applications from all to help us build a diverse workforce which reflects the diversity of our communities, in which we live and serve.
