META IS OPPOSED TO ALL FORMS OF HUMAN TRAFFICKING, SLAVERY, SERVITUDE, FORCED OR COMPULSORY LABOR, AND ALL OTHER TRAFFICKING-RELATED ACTIVITIES (TOGETHER, “MODERN SLAVERY AND HUMAN TRAFFICKING”). WE ARE COMMITTED TO FULLY COMPLYING WITH ALL APPLICABLE INTERNATIONAL HUMAN RIGHTS STANDARDS, LABOR AND EMPLOYMENT LAWS, RULES, AND REGULATIONS, AND TO WORKING TO MITIGATE THE RISKS OF MODERN SLAVERY AND HUMAN TRAFFICKING IN OUR BUSINESS OPERATIONS AND SUPPLY CHAINS.

Our mission is to give people the power to build community and bring the world closer together. All of our products, including our apps, share the vision of helping to bring the metaverse to life. We build technology that helps people connect and share, find communities, and grow businesses. Our useful and engaging products enable people to connect and share with friends and family through mobile devices, personal computers, virtual reality headsets, and wearables. We also help people discover and learn about what is going on in the world around them, enable people to share their experiences, ideas, photos and videos, and other activities with audiences ranging from their closest family members and friends to the public at large, and stay connected everywhere by accessing our products. Meta is moving our offerings beyond 2D screens toward immersive experiences like augmented and virtual reality to help build the next evolution in social technology.

Our Family of Apps Products include:

- Facebook. Facebook helps give people the power to build community and bring the world closer together. It's a place for people to share life's moments and discuss what's happening, nurture and build relationships, discover and connect to interests, and create economic opportunity. They can do this through Feed, Reels, Stories, Groups, and more.
- Instagram. Instagram brings people closer to the people and things they love. Instagram Feed, Stories, Reels, Video, Live, Shops, and messaging are places where people and creators can connect and express themselves through photos, video, and private messaging, and discover and shop from their favorite businesses.
- Messenger. Messenger is a simple yet powerful messaging application for people to connect with friends, family, communities, and businesses across platforms and devices through text, audio, and video calls.
- WhatsApp. WhatsApp is a simple, reliable, and secure messaging
application that is used by people and businesses around the world to communicate and transact in a private way.

Our current Reality Labs product offerings include Meta Quest virtual reality devices, as well as software and content available through the Meta Quest Store, which enable a range of social experiences that allow people to defy physical distance, including gaming, fitness, entertainment, and more. For example, we have launched Horizon Worlds, a social platform where people can interact with friends, meet new people, play games, and attend virtual events, and Horizon Workrooms, a virtual reality space for teams to connect and collaborate at work. As part of our virtual reality initiatives, we have also introduced mixed reality capabilities through our Meta Reality system on Meta Quest Pro, which allows users to experience the immersion and presence of virtual reality while still being grounded in the physical world.

Our workforce and infrastructure are present in over 90+ cities globally serving users and customers all around the world. Our suppliers primarily support us in our business operations and infrastructure, and the remaining are generally involved in our sales and operations related to consumer hardware devices and administration.

We have prepared this annual statement on the basis of our policies and processes that are implemented generally across our group with respect to our business operations and manufacturing supply chains globally. Additional information about Meta’s business operations and structure is described in our latest SEC Form 10-Q or Form 10-K filing which can be accessed here.

We regularly evaluate risks linked to modern slavery and human trafficking that could be caused by, contributed to, or directly linked to our business operations or supply chains. We consider the risks of modern slavery and human trafficking to be relatively low as our direct business operations leverage the use of advanced technology and do not involve substantial manual labor processes.

We are aware that inherent and potential risks of modern slavery and human trafficking could be present in supply chains. These risks exist in supply chains at various levels depending on factors such as the type of product or service provided and geographic location. For example, migrant or contingent workers (whether engaged via vendor partners, independent contractors, consultants, or other staffing suppliers) in certain jurisdictions may be at higher risk than those in other jurisdictions of encountering situations of labor exploitation through force, fraud, debt bondage or other coercion such as through a third party labor agent, staffing or recruitment agency, or other intermediaries. Additional risks like those related to
International Labor Organization’s (“ILO”) Indicators of Forced Labor could be present in supply chains include: abuse of vulnerability, deception, restriction of movement, isolation, physical and sexual violence, intimidation and threats, retention of identity documents, withholding of wages, debt bondage, abusive working and living conditions, and excessive overtime.

Meta identifies potential modern slavery and human trafficking risks in our supply chains through mapping of supply chains, conducting desk-based research, using tools to identify high risk work associated with the type of products or services and geographic locations, supplier surveys, and continuous supplier and stakeholder engagement. In 2022, we conducted an annual risk assessment process for suppliers who manufacture our infrastructure equipment and consumer devices. Based on the results of this assessment we prioritize suppliers who are identified with high risks related to modern slavery and human trafficking and then work to ensure we engage with these prioritized suppliers on deeper risk assessment or engagement. We regularly assess opportunities to expand risk screening efforts to our extended supply chain. Building on risk assessment completed in 2021, we partnered with third party advisors to develop a risk assessment and mitigation plan for suppliers who depend on outsourced or subcontracted labor like in construction, facilities, culinary, and security services supply chain.

We are committed to achieving the highest standards of quality and integrity in all our business operations, and we expect suppliers doing business with Meta and our affiliates to share this commitment. Meta requires that our personnel are trained on and comply with our Code of Conduct, which affirms our commitment to human rights and prohibits violations of law, including labor and employment laws. More specifically, Meta does not tolerate any harassment or mistreatment by or of workers in the workplace or in a work-related situation and is committed to protect anyone raising such a concern from retaliation. Our personnel play an important and integral part in our effort to support better working conditions and prohibit modern slavery and human trafficking across Meta and Meta supply chains.

Meta is committed to and respects international standards on human rights. To this end, our Corporate Human Rights Policy sets out the human rights standards that we strive to respect under the United Nations Guiding Principles on Business and Human Rights and the International Bill of Human Rights. This includes Article 8 of the International Covenant on Civil and Political Rights that “[n]o one shall be held in slavery; slavery and the slave trade in all their forms shall be prohibited. No one shall be held in
servitude. No one shall be required to perform forced or compulsory labor.” The human rights policy also references the Convention on the Rights of the Child which in Article 32 recognizes the “right of the child to be protected from economic exploitation and from performing any work that is likely to be hazardous or to interfere with the child's education, or to be harmful to the child’s health or physical, mental, spiritual, moral or social development. Meta is a member of the United Nations Global Compact (UNGC) and is committed to working towards the ten principles of the UNGC focused on human rights, labor, environment, and anticorruption. The UNGC’s principles include amongst others the elimination of all forms of forced and compulsory labor and the effective abolition of child labor.

Meta requires that priority suppliers, which are identified using a risk-based methodology, conform with all of the standards on labor, health and safety, the environment, business ethics, and the establishment of management systems in accordance with the Responsible Business Alliance (“RBA”) Code of Conduct. The RBA Code of Conduct explicitly prohibits modern slavery and human trafficking in the supply chain. These standards are far reaching and help to prevent and mitigate risks related to modern slavery and human trafficking such as freely chosen employment, young workers, working hours, wages and benefits, humane treatment, non-discrimination, non-harassment, and freedom of association. Further, the RBA Trafficked and Forced Labor - Definition of Fees sets expectations for suppliers on following responsible recruitment and employment practices. Meta requires priority suppliers to hold their suppliers and subcontractors to the same standards in the RBA Code of Conduct.

We hold suppliers to additional policies and standards that support safe, healthy, and fair working conditions and help prevent and mitigate modern slavery and human trafficking risks. For example, our suppliers are expected to follow Meta’s best practices in creating and ensuring a respectful workplace. Also, our Electronics Reuse and Recycling Standard applies to suppliers providing recycling and take-back services. This standard requires suppliers’ conformance to the RBA Code of Conduct and explicitly prohibits prison, coerced, forced, bonded or child labor, either directly or indirectly, in the performance of the reuse, recycling and/or takeback services.

We communicate requirements and implementation expectations to priority suppliers through an annual notification process, in-person and virtual meetings, supplier business reviews, and a supplier online portal. We expect these suppliers to have contract provisions in their agreements that require conformance to the RBA Code of Conduct, which includes the prohibition of modern slavery and human trafficking in the supply chain.

*Business operations*

Meta generally sources and directly hires our own full-time employees, which allows us control and oversight in managing the risks of modern
slavery and human trafficking in our business operations. We use integrated systems and tools in pre-screening and outreach to candidates globally to ensure a consistent and fair process. Our trained and professionally skilled recruiting teams maintain continuous conversation with candidates throughout the recruitment cycle. Meta strives to provide a respectful and safe working environment for all our personnel, regardless of role, position, or employment status, and has zero tolerance for any threats, violence, harassment, coercion, or retaliation. We expect our vendor partners, independent contractors, consultants, and staffing suppliers to commit to the same standards and principles. Meta provides a grievance mechanism, through which an impacted or interested party may report any violations or activities inconsistent with our policies and compliance procedures.

**Supply chains**

All our suppliers are required to go through a Third Party Assessment before being onboarded. There is a detailed process in place to ensure that suppliers are assessed prior to being engaged, and periodically reassessed thereafter, depending on the associated risk of the supplier. During the assessment, our specialized teams of subject matter experts review the supplier’s risk profile and the effectiveness of any control measures already in place for each relevant risk area, including environmental, health and safety and human rights, before making recommendations to proceed with initial or continued engagement, or otherwise. Each supplier is assessed according to the use case, nature of work, geographic location, and other relevant features of the engagement or intended engagement. Depending on the results of the assessment, Meta may introduce additional control measures in the engagement. We routinely perform ongoing third party reassessments on our suppliers depending on the applicable risks. If the risk of forced labor is detected, we activate the mitigation process, and the supplier is disqualified if the risk persists.

Once a supplier is onboarded, Meta manages social and environmental risks and issues through our Responsible Supply Chain program. We use a cross-functional consultative process and data-driven methodology to identify and assess a wide range of labor, human rights, and environmental risks which include modern slavery and human trafficking in our supply chains. For example, risks are assessed through indices such as United Nations Children’s Fund Child Labor Percentages, Walk Free Foundation’s Global Slavery Index, United Nations’ Human Development Index, and the United States Department of State’s Trafficking in Persons Report.

We require our sourcing and procurement teams to certify periodically whether they are aware if Meta has ongoing business relationships with companies identified as being associated with forced labor and investigate any risks of forced labor identified through this process. We verify supplier conformance with Responsible Supply Chain policies and standards through continuous dialogue, self-assessment questionnaires, independent audits.
and assessments, corrective action plans, worker surveys, and other forms of assurance. We have refined our process in investigating and responding to serious incidents or allegations including forced labor related to our suppliers. A rubric detailing the risk and impact areas guides and standardizes our decision-making and communications with internal and external partners.

As part of the independent audits and assessments conducted we utilize the RBA Validated Assessment Program ("VAP") which is the leading standard for onsite compliance verification and effective, shareable audits. For RBA VAP audits completed in 2022, the most common RBA VAP nonconformance findings were in the labor category and related to working hours and wages and benefits. The chart below is the percentage of RBA VAP nonconformance findings by RBA Code of Conduct section.

### RBA VAP Audits Completed in 2022

We collect targeted key performance indicator (KPI) data that include worker demographics such as the presence of foreign migrant workers and sex-disaggregated data to monitor modern slavery and human trafficking risks. In 2022 we continued to expand worker engagement via anonymous mobile and web-based surveys to collect and analyze worker feedback on topics like job satisfaction, working conditions, grievance mechanisms, and training effectiveness. Depending on the country where the survey is deployed and factors like the presence of domestic or foreign migrant labor, these surveys have targeted questions to screen for forced labor risks such as the withholding or retention of identity documents and payment of recruitment fees.

Any nonconformances identified are actively addressed through our corrective action and key performance indicator programs. We examine nonconformances by reviewing a corrective action plan describing the root cause, proposed remediation actions, and timeline for closure and manage supplier performance improvement through a review process or closure audit. We communicate with internal and external partners including senior
leadership when needed. We are committed to engaging meaningfully and proactively with our supply chain partners, building supplier capacity, and responding quickly to challenges as they arise.

Focusing on individuals who may be more vulnerable or at-risk to modern slavery and human trafficking in our supply chains is critical to due diligence efforts. For instance, women, children, or domestic or foreign migrant workers in supply chains could experience modern slavery and human trafficking differently based on their particular vulnerabilities and disadvantages such as limited financial resources, labor force opportunities, and language skills in receiving countries or locations. In 2022, building on the risk assessment work we conducted with suppliers, we underwent a consultancy with third party experts to optimize our approach to gender vulnerabilities in the supply chain through a review of our policies and practices, employee training, and supplier capacity building.

As a result of the Uyghur Forced Labor Prevention Act (“UFLPA”) being signed into law in December 2021, we undertook a comprehensive review of our existing due diligence, supply chain tracing, and supply chain management measures to ensure alignment with global standards for human rights due diligence, particularly with respect to ethnic and religious minorities from the Xinjiang Uyghur Autonomous Region (“XUAR”). As part of this effort, we implemented a certification process to help ensure no entities on the UFLPA entity list are part of our supply chain and that our suppliers communicate these requirements to their next tier suppliers. In light of the UFLPA and in anticipation of other similar regulations, we are monitoring the legal and regulatory landscape and ensuring our due diligence processes and procedures take into account new guidance and best practices as they emerge.

We regularly assess and track the effectiveness of our actions taken in mitigating the associated risks of modern slavery and human trafficking in our supply chains. We report key performance metrics internally across the business and to leadership teams and conduct trend analysis to monitor and track how effective suppliers are in meeting our expectations. We participate with cross-functional partners in the overall supplier performance management system including attending and providing performance assessment related to social and environmental KPIs to suppliers in supplier business reviews. Routine updates and communications of work in combating modern slavery and human trafficking in our supply chains are communicated to the company through our internal microsite. We actively collaborate with the broader industry and global community to stay up to date on key risk areas and develop solutions that address changes in industry practice. In 2022, we continued to strengthen our program through building staff capacity, developing robust Responsible Supply Chain management systems, collaborating with stakeholders, and working with independent and third party experts in reviewing and strengthening our policies, procedures, and practices.
**Collaboration with other entities**

We continue to actively look for ways to collaborate and share ideas with the broader industry and global community to update and develop solutions that promote best practices for a responsible supply chain. We are a member of the [RBA](https://www.rba.cust身心) as well as the [Responsible Labor Initiative ("RLI")](https://www.responsible-labor-initiative.org) which is a multi-industry, multi-stakeholder initiative focused on ensuring that the rights of workers vulnerable to forced labor in global supply chains are consistently respected and promoted. The RLI’s work addresses the root cause of modern slavery and human trafficking, raises awareness about these risks, and provides data and research such as on recruitment corridors and practical guidelines for remediating issues.

**Training and capacity building on modern slavery and human trafficking available to our staff and suppliers**

Apart from the training on Meta’s Code of Conduct, training regarding the standards set forth in the RBA Code of Conduct is provided to certain key personnel in Meta’s sourcing and procurement, supply chain operations, legal, and compliance teams. Additional training is provided to relevant staff to build capacity in reporting on and addressing nonconformances to the RBA Code of Conduct. In 2022, we widely shared and tracked completion in a virtual course, as a part of Meta’s learning management system, focused on modern slavery and human trafficking risks for Meta employees. We developed an employee training course on increasing awareness related to gender vulnerabilities in the supply chain. By understanding inequities in how men and women access resources, face safety risks, and experience freedom of movement in some of the supply chain scenarios, the course helps employees understand how Meta addresses human rights risks while also enhancing supplier performance and business outcomes. We also partner closely with priority suppliers to provide a deeper understanding of the RBA Code of Conduct. As an example, we encourage their attendance at the RLI’s forced labor training targeted to human resources professionals, recruiters, labor agents, and corporate social responsibility professionals in the supply chain.

**COVID-19 impact**

We continued to prioritize keeping our staff and communities safe and healthy during the ongoing COVID-19 pandemic during 2022. To that end, we reviewed and followed international guidelines and best practices like the RBA resources and tools to help Meta and suppliers manage the impacts of COVID-19 on workers. When needed, supplier assessments, audits, and communications were shifted to a remote and virtual manner in locations where needed to manage social and environmental risks, including modern slavery and human trafficking, and any associated negative consequences.
Additional efforts to combat modern slavery and human trafficking

Beyond our business operations and supply chains, we strongly oppose the abuse of our products to facilitate any form of human exploitation and have long-standing policies and protocols to combat any such abuse. Efforts include:

Policies

Meta policies across our products prohibit content or behaviors that may lead to human exploitation in all its forms. We developed our policies in consultation with more than twenty organizations and we continually seek to expand and refine our understanding of human exploitation as we amend and update our enforcement guidelines. For more detail, see the Community Standards, Help Center, or our most recent Community Standards Enforcement Report.

Response

We continue to remove content on Meta’s platforms that we determine may facilitate or coordinate the exploitation of humans. We look to enact countermeasures - both on our platforms and via our external partnerships - to stop actors and businesses from using our services to commit crimes, and further exploitation. We partner with experts across academia, advocacy, victim services and support, and law enforcement to develop campaigns and pages for our Help Center for harms such as sex trafficking, organ trafficking, and human smuggling.

In 2022 we launched new programs and tools to deter bad actors and support victims including expanding our Search Interventions program to include additional languages, in which we identify key words that may be associated with illicit activity and add friction to search results. In these interventions we include links to support resources for potential victims whenever possible. In 2022, we worked to prevent human trafficking in response to the Russian invasion of Ukraine, by partnering with NGO and civil society organizations to launch ad campaigns in Ukraine and neighboring countries. These campaigns focus on the signs of trafficking, the organizations and hotlines available for support, and how people can report the abuse.

We are committed to raising human exploitation awareness globally, including by making our Human Exploitation Policies available in a number of languages.

We encourage anyone who encounters content on Meta that indicates someone is in immediate physical danger related to modern slavery and human trafficking to contact local law enforcement immediately and report this content to us. Finally, we provide links to local resources available at our Help Center if anyone is a victim of human trafficking or would like
resources to share with a potential victim.

**Partnerships**

We work with more than 400 safety organizations worldwide, and among them, we work closely with key anti-trafficking experts, including the National Center for Missing and Exploited Children (NCMEC), International Center for Missing and Exploited Children (ICMEC), Polaris, Stop The Traffik, International Justice Mission, and ECPAT International. In 2022 we joined **Tech Against Trafficking**, a coalition of technology companies collaborating with global experts to help eradicate human trafficking using technology. Through the coalition, companies, nonprofits, academics, and relevant stakeholders work together in a collaborative environment to support and accelerate the impact of technology solutions combating human trafficking.

**Training**

Additionally, we frequently organize interactive online and in-person training and learning sessions for our staff who are dedicated to fighting human exploitation across our family of apps and services. We bring in experts from law enforcement, civil society, and nongovernmental organizations to keep our staff up to date on the latest trends and information. We also have a broad cross-functional effort to create and implement relevant training for content moderators and other relevant specialists. Several internal teams deliver training and presentations to various stakeholders and during key business events.

**Consultation Process**

We have prepared this annual statement on the basis of our policies and processes that are implemented in respect of our business operations and manufacturing supply chains. A cross-functional team including representatives from our sustainability, supply chain, and legal departments are in charge of preparing this statement and consulting with relevant stakeholders. Our consultation process includes the sharing and exchanging of modern slavery and human trafficking risk assessments and due diligence policies and covers all of Meta Platforms, Inc.’s reporting entities.

This statement has been prepared on behalf of the Meta family of corporate entities including Meta Australia Pty Ltd (ACN: 134 012 543) which is a subsidiary of Meta Platforms, Inc. The Meta Audit & Risk Oversight Committee of the Board of Directors of Meta Platforms, Inc., which is our principal governing body, has approved this statement for the fiscal year ended December 31, 2022 and delegated to the Secretary to sign it on behalf of the Board of Directors.
