Universal Display Corporation Named to Newsweek's America's Greenest Companies 2027 List

EWING, N.J.--(BUSINESS WIRE)-- [Universal Display Corporation](#) (UDC) (Nasdaq: OLED), a global leader in energy-efficient OLED technologies and materials, today announced that it has been named to Newsweek's America's Greenest Companies 2027 list.

Presented by Newsweek in partnership with Plant-A Insights Group and GIST Impact, the annual ranking recognizes 650 U.S. companies demonstrating strong performance in environmental sustainability. More than 6,000 public and private companies were evaluated based on publicly available sustainability data and a rigorous assessment of environmental performance and disclosure.

"We are pleased to be recognized by Newsweek as one of America's Greenest Companies," said Steven V. Abramson, President and Chief Executive Officer of Universal Display Corporation. "We believe innovation plays an important role in addressing sustainability challenges. By advancing energy-efficient OLED technologies and materials that help enable more sustainable consumer electronic products, we create value for our customers and the industry while supporting their sustainability goals. This recognition reflects the dedication of our employees and our commitment to responsible innovation, transparency and continuous improvement."

Companies selected for the ranking were evaluated across more than 25 sustainability criteria in four key categories: greenhouse gas emissions, water usage, waste generation, and sustainability commitments and disclosures. About Universal Display Corporation

Universal Display Corporation (Nasdaq: OLED) is a leader in the research, development and commercialization of organic light emitting diode (OLED) technologies and materials for use in display and solid-state lighting applications. Founded in 1994 and with subsidiaries and offices around the world, the Company currently owns, exclusively licenses or has the sole right to sublicense more than 7,000 patents issued and pending worldwide. Universal Display licenses its proprietary technologies, including its breakthrough high-efficiency UniversalPHOLED® phosphorescent OLED technology that can enable the development of energy-efficient and eco-friendly displays and solid-state lighting. The Company also develops and offers high-quality, state-of-the-art UniversalPHOLED materials that are recognized as key ingredients in the fabrication of OLEDs with peak performance. In addition, Universal Display delivers innovative and customized solutions to its clients and partners through technology transfer, collaborative technology development and on-site training.
