Universal Display Corporation's Dr. Julie Brown Receives Prestigious IEEE Frederik Philips Award

EWING, N.J.--(BUSINESS WIRE)-- [Universal Display Corporation](#) (UDC) (Nasdaq: OLED), a global leader in energy-efficient OLED technologies and materials, today announced that Dr. Julie Brown, Executive Vice President and Chief Technical Officer, has been honored with the IEEE Frederik Philips Award, recognizing her outstanding accomplishments and "leadership in the development of materials and technologies for phosphorescent Organic Light Emitting Diode (OLED) displays used in consumer electronics."

Since joining Universal Display in 1998, Dr. Brown has guided the Company's innovation strategy from its early-stage development through commercialization and continues to shape its roadmap for future advancements. As CTO, she leads the Company's global R&D efforts, driving forward OLED emissive layer technologies that enable high-performance, energy-efficient displays across a wide range of consumer electronics—from smartphones and tablets to laptops, monitors and televisions.

"Julie's visionary leadership and deep technical expertise have been instrumental in advancing OLED innovation and strengthening our collaborative work with customers and partners across the display ecosystem," said Steven V. Abramson, President and Chief Executive Officer of Universal Display Corporation. "Under her direction, our energy-efficient OLED technologies have helped drive the industry's transition from legacy LCDs to OLEDs, enabling higher performance and more power-efficient devices. This well-deserved recognition by IEEE highlights Julie's significant contributions to industry-leading materials and technologies that continue to support the evolution of next-generation displays in devices that help us live, work and connect."

The IEEE Frederik Philips Award honors exceptional leaders whose work bridges research and real-world application, contributing to meaningful technological progress across the global electronics industry. The award is presented annually to an individual or team and is based on criteria including leadership in management, impact on innovation, personal contributions, and technological impact.

About Universal Display Corporation

Universal Display Corporation (Nasdaq: OLED) is a leader in the research, development and commercialization of organic light emitting diode (OLED) technologies and materials for use in display and solid-state lighting applications. Founded in 1994 and with subsidiaries and offices around the world, the Company currently owns, exclusively licenses or has the sole right to sublicense more than 7,000 patents issued and pending worldwide. Universal Display licenses its proprietary technologies, including its breakthrough high-efficiency UniversalPHOLED® phosphorescent OLED technology that can enable the development of energy-efficient and eco-friendly displays and solid-state lighting. The Company also develops and offers high-quality, state-of-the-art UniversalPHOLED materials that are recognized as key ingredients in the fabrication of OLEDs with peak performance. In addition, Universal Display delivers innovative and customized solutions to its clients and partners through technology transfer, collaborative technology development and on-site training.
