Disclaimer

Certain statements contained in this presentation are forward-looking statements and are based on future expectations, plans and prospects for Moody’s business and operations that involve a number of risks and uncertainties. Moody’s outlook for 2014 and other forward-looking statements in this presentation are made as of October 29, 2014, and the Company disclaims any duty to supplement, update or revise such statements on a going-forward basis, whether as a result of subsequent developments, changed expectations or otherwise. In connection with the “safe harbor” provisions of the Private Securities Litigation Reform Act of 1995, the Company is identifying certain factors that could cause actual results to differ, perhaps materially, from those indicated by these forward-looking statements. Those factors, risks and uncertainties include, but are not limited to, the current world-wide Moody’s Market disruptions and economic slowdown, which is affecting and could continue to affect the volume of debt and other securities issued in domestic and/or global capital markets; other matters that could affect the volume of debt and other securities issued in domestic and/or global capital markets, including credit quality concerns, changes in interest rates and other volatility in the financial markets; the level of merger and acquisition activity in the US and abroad; the uncertain effectiveness and possible collateral consequences of U.S. and foreign government initiatives to respond to the current world-wide credit disruptions and economic slowdown; concerns in the marketplace affecting our credibility or otherwise affecting market perceptions of the integrity or utility of independent agency ratings; the introduction of competing products or technologies by other companies; pricing pressure from competitors and/or customers; the level of success of new product development and global expansion; the impact of regulation as an NRSRO, the potential for new U.S., state and local legislation and regulations, including provisions in the Dodd-Frank Wall Street Reform and Consumer Protection Act and anticipated regulations resulting from that Act; the potential for increased competition and regulation in the EU and other foreign jurisdictions; exposure to litigation related to our rating opinions, as well as any other litigation to which the Company may be subject from time to time; provisions in the Dodd-Frank Act legislation modifying the pleading standards, and EU regulations modifying the liability standards, applicable to credit rating agencies in a manner adverse to credit rating agencies; provisions of EU regulations imposing additional procedural and substantive requirements on the pricing of services; the possible loss of key employees; failures or malfunctions of our operations and infrastructure; any vulnerabilities to cyber threats or other cybersecurity concerns; the outcome of any review by controlling tax authorities of the Company’s global tax planning initiatives; the outcome of those legacy tax matters and legal contingencies that relate to the Company, its predecessors and their affiliated companies for which Moody’s has assumed portions of the financial responsibility; the impact of mergers, acquisitions or other business combinations and the ability of the Company to successfully integrate acquired businesses; currency and foreign exchange volatility; the level of future cash flows; the levels of capital investments; a decline in the demand for credit risk management tools by financial institutions; and other risk factors as discussed in the Company’s annual report on Form 10-K for the year ended December 31, 2013 and in other filings made by the Company from time to time with the Securities and Exchange Commission.

Overview of Moody’s Corporation

Moody’s

Leading global provider of credit rating opinions, insight and tools for financial risk measurement and management

Moody’s Investors Service

Independent provider of credit rating opinions and related information for over 100 years

Moody’s Analytics

Research, data and software for financial risk analysis and related professional services

Moody’s TTM Revenue: $3.2 billion

Revenue represents consolidated trailing twelve months ended September 30, 2014, excluding intersegment revenue and eliminations.

Note: Total MCO recurring and transaction revenue split is 50/50; U.S. and Non-U.S. revenue split is 54/46.
Financial Overview
Revenue Growth, Operating Leverage and Balance Sheet Management Provide the Opportunity for EPS Growth

Debt market issuance driven by global GDP growth  
~2-4%

Disintermediation of credit markets in both developed and emerging economies driving both issuance and demand for new products and services  
~2-3%

Growth in Moody's Analytics driven by further penetration of MA's client base and expansion of bank and insurance risk regulatory requirements  
~2-3%

MA and MIS pricing initiatives aligned with value; affected by business volumes and mix  
~4%

Long-Term Revenue Growth Opportunity: Low Double-Digit % (on average)

Potential Operating Income Margin Expansion

Ongoing Share Repurchases*

Long-Term EPS Growth Opportunity: Mid-Teens % (on average)**

*Subject to market conditions and other ongoing capital allocation decisions.

**Assumes no material change in effective tax rate, leverage profile and/or capital allocation policy.

<td>» Dividend payout ratio potential is 25% to 30%</td>
<td></td>
</tr>
</tbody>
</table>

Share Repurchases and Dividends Paid

- Expect approximately $1.25 billion in share repurchases in 2014*
- Current annualized dividend rate of $1.12 per share (YTD 3Q14 payout of 24% of net income)
  - Dividend per share CAGR of 23% from 2009 –2014 annualized

*Guidance as of October 29, 2014. Subject to market conditions and other ongoing capital allocation decisions.
Successful Execution of Recent Transactions

» Provides outsourced research and analytical services to the global financial and corporate sectors

» Expect to purchase the remaining outstanding shares in 4Q14 pursuant to a call option as described in our SEC filings

» One of three leading India-based domestic rating agencies

» Moody’s increased its ownership stake from 28.5% to over 50.0% in June 2014

» A cloud-based lending platform that provides loan origination, credit analysis and loan management functionality to ~750 financial institutions

» Moody’s acquired WebEquity in mid-July 2014

» Provides analytical tools and data to issuers, investors and underwriters to administer, monitor and value securitized transactions

» Moody’s acquired Lewtan in late October 2014

» 2014 combined revenue contribution of ~$150 million (run rate ~$180 million)
Well-Spaced Maturity Profile Reduces Refinancing Risk

» Moody’s current credit rating from S&P is BBB+
  - Moody’s leverage metrics remain within S&P’s stated criteria for the current rating

» On July 16, 2014, Moody’s issued $750 million of unsecured notes in a public offering; uses of proceeds include retiring its 2005 private placement notes (4.98% coupon), as well as general corporate purposes
  - $450 million 5-year notes, at 2.75%, maturing on July 15, 2019
  - $300 million 30-year notes, at 5.25%, maturing on July 15, 2044
  - 2014 EPS dilution from retiring the 2005 private placement notes, as well as additional interest, is approximately $0.04
Moody’s Market Overview
Non-Financial Corporates Have Refunding Needs of Over $3 Trillion from 2015-2018

Moody’s Recurring Revenue Base Provides Stability

Recurring Revenue*

![Graph showing the growth of recurring revenue from 2009 to TTM 3Q14.](image)

**MA Drivers**
- Growth in RD&A
- Growth in ERS maintenance and subscription revenue

**MIS Drivers**
- Growth in monitoring fees driven by new mandates
- Pricing changes

» High-single-digit % growth going forward

*Recurring Revenue recognized ratably over security life (MIS) and over contract period (MA).
Bond Issuance Has Primarily Been Used for Refinancing; Recently, M&A Activity Has Noticeably Increased

Uses of Funds From USD High Yield Bonds and Bank Loans*

Growth in Buyback, M&A and Capex Activity: U.S. Non-Financial Corporates

(Growth as a % of base period, TTM volume)

*% of count of mentions for each respective period in bond issue or bank loan program tranche documents. Excludes Investment Grade issuance, issues of less than $25 million and general corporate purposes.” An issue can have multiple purposes and, as a result, time period %’s for each category do not sum to 100%.
Changes in the Banking Sector Create Demand for Moody's Offerings

1. Disintermediation
   - Banks are not providing traditional levels of funding

2. Regulatory Reporting
   - Software / Stress-Testing
   - Financial institutions are required to comply with new regulation

3. Offshored Resources
   - Banks are looking to reduce costs, streamline operations
Disintermediation Continues in European Capital Markets

- European bank loans have comprised approximately **80%** of the outstanding debt in **Europe** (bonds approximately **20%**)
- European companies have historically relied more on banks than their American counterparts but are increasingly turning to the bond market over traditional commercial bank loans
- For comparison, the **U.S.** debt markets have been more **evenly split** between bank loans and bonds

Sources: ECB, BarCap Indices. Europe bank loan data includes Eurozone and UK bank loans. Europe bond data includes euro and sterling denominated bonds.
Growth in Newly-Rated Corporate Issuers

Annual Count of Newly-Rated Non-Financial Corporate Issuers*

Source: Moody’s Investors Service.
*Rated by Moody’s Investors Service.
**Through October 24, 2014.
Growing Regulatory Requirements for Financial Institutions

1. In the EU, the Liquidity Coverage Ratio (LCR) will be implemented faster than originally envisaged under Basel III. The timetable will be: 60% by 2015, 70% by 2016, 80% by 2017 and 100% by 2018.

2. The higher loss absorbency requirements for global systemically important banks (G-SIBs) will be phased in from January 2016, with full implementation by January 2019.

3. In the U.S., advanced-approach banks and non-bank systemically important financial institutions (SIFI) institutions will have to meet 80% of the LCR by January 1, 2015 and 100% of the ratio by January 1, 2017.

5. The new standardized approach (SA-CCR) replaces both the Current Exposure Method (CEM) and the Standardized Method (SM) in the capital adequacy framework.

- **Public, Project & Infrastructure**: mid-single-digit % range
Over the past several years, an increasing percentage of the U.S. non-financial corporate speculative-grade bank loan market has been rated.

The rated bank loan market is larger in the U.S. than in Europe, but Europe’s market is growing:

- FY 2013 rated bank loan issuance in the U.S. totaled $425 billion vs. $81 billion in Europe*
- YTD 3Q 2014 rated bank loan issuance in the U.S. was approximately $331 billion vs. $99 billion in Europe*

*Rated bank loan issuance represents Moody’s rated non-financial corporate speculative-grade bank loans. Sources: Moody’s Investors Service
Emerging Markets Issuance has Grown Substantially, but Will Remain Volatile

Emerging Markets Rated Corporate Bond Issuance*

*Moving 12 month sum; includes rated investment grade and high yield corporate bond issuance (financial and non-financial).

Recurring Maintenance and Subscriptions revenue represents ~2/3 of total revenue; growing at 3-year CAGR of 20%

Non-recurring License and Service revenue drives variability in quarter-to-quarter top-line results
- Revenue recognized as implementation projects are completed
- Sales provide 12-24 months’ visibility into revenue

Seasonal pattern
- Sales tend to be strongest in 1Q and 4Q, in line with customer budgeting/planning cycles
- Revenue is typically strongest in 4Q, driven by prior year’s sales and customer timelines for year-end project completion
MA is Well-Positioned to Help Banks Manage their Stress Testing Requirements

» To address regulatory requirements to perform enterprise-wide stress tests, banks are undertaking extensive, multi-year infrastructure projects.

» Banks are also looking for ways to leverage investments in stress testing to better manage their institutions.

» MA is integrating existing product and service offerings to facilitate scenario-based stress testing:
  - **Econometric modeling** expertise to develop relevant scenario parameters
  - Unique **benchmarking data sets** to support better analytics across asset classes
  - Credit and loss **modeling**, business **forecasting expertise** and **calculation engines** to project cash flow, profitability, regulatory capital levels
  - Auditable, repeatable, **automated software platform** and regulatory **reporting capabilities**
Copal Amba is a Market Leader in Analytics and Research Support Services

- Provider of research, analytics and business intelligence services to global financial institutions and corporations

Select Regulations Related to Structured Finance

Dodd-Frank Act

Volcker Rule

The Volcker Rule prohibits banking entities from engaging in short-term proprietary trading of certain securities and derivatives for their own account. The Volcker Rule also imposes limits on banking entities’ investments in, and relationships with, hedge funds and private equity funds. In mid-January 2014, the five federal agencies adopted an interim final rule which permits the banking entities to retain interests in certain collateralized debt obligations backed primarily by trust preferred securities that would otherwise be subject to the Volcker Rule’s covered fund investment prohibitions. On April 7, 2014, the Fed announced its intention to give banking entities two additional one-year extensions (which together would extend the deadline until July 21, 2017) to conform to the Volcker Rule their ownership interests in and sponsorship of collateral loan obligations (“CLOs”) that fall under the definition of covered funds. Only CLOs in place as of December 31, 2013 will be eligible for the extensions.

Enhanced Prudential Standards

On February 18, 2014, the Fed approved a final rule strengthening the supervision and regulation of large U.S. bank holding companies and foreign banking organizations (“FBO”). The final rule establishes a number of enhanced prudential standards, including liquidity, risk management, and capital. It also requires a FBO with a significant U.S. presence to establish an intermediate holding company over its U.S. subsidiaries.

QM

Effective January 10, 2014, mortgage lenders must comply with the Consumer Finance Protection Bureau’s Ability-To-Repay and Qualified Mortgage Rule. The rule also provides a safe harbor for loans that satisfy the definition of a qualified mortgage (“QM”) and are not “higher-priced,” and provides a rebuttable presumption for higher-priced mortgage loans.

QRM

Exempts from risk retention requirements asset-backed securities (“ABS”) that are collateralized exclusively by residential mortgages that qualify as “qualified residential mortgages” (“QRM”). In a final rule issued on October 22, 2014, six federal agencies, including the Federal Reserve Board and the SEC, adopted a definition of QRM that is aligned with the definition of QM. Qualified Commercial Real Estate Loans (“QCREL”) will also be exempt from risk retention.

Loan-Level Disclosure

Increases disclosure and may reduce issuance volume. The regulation requires an issuer of ABS to disclose, for each tranche or class of security, certain loan level information regarding the assets backing that security.
## Select Regulations Related to Structured Finance (continued)

### Dodd-Frank Act (continued)

<table>
<thead>
<tr>
<th>Regulation</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Risk Retention ($§941$)</td>
<td>On October 22, 2014, six federal agencies approved a final rule requiring retention of an unhedged and untransferable 5% credit risk of SF securities, potentially dampening U.S. SF issuance for certain asset classes. The final rule generally permits risk retention to be accomplished through one or a combination of methods. The final rule also provides additional or modified risk retention methods for specific types of transactions, including asset-backed commercial paper conduits, commercial mortgage-backed securities, securitizations sponsored by Fannie Mae and Freddie Mac, open-market CLOs, and revolving pool securitizations. Special rules for CMBS (third party holder of first loss piece) if certain criteria are met. The final rule also sets forth prohibitions on transferring or hedging the credit risk that the sponsor is required to retain. The final rule also does not require any retention for securitizations of commercial loans, commercial mortgages, or automobile loans if they meet specific standards for high quality underwriting. The final rule will be effective one year after publication in the Federal Register for residential mortgage-backed securitizations and two years after publication for all other securitization types.</td>
</tr>
<tr>
<td>Reg. AB II</td>
<td>Provides new disclosure and reporting requirements for certain ABS. The Reg. AB II Final Rules require issuers of registered and publicly offered ABS that consist of residential mortgages, commercial mortgages, auto loans and auto leases and resecuritizations of ABS that include these asset types, or of debt securities, to provide investors with asset-level data, both at the time of an offering and on an ongoing basis. The Reg. AB II Final Rules also enhance disclosure requirements for initial ABS offerings and periodic reports, dictate the timing for filing a preliminary prospectus and other transaction documents and provide new requirements for shelf registrations of ABS.</td>
</tr>
</tbody>
</table>

The definition of ABS, as used in the Reg. AB II Final Rules, is narrower than the definition set forth in the Securities Exchange Act of 1934 and does not include certain “structured finance products” such as securitizations of managed pools or synthetic transactions.

### FASB/IASB joint financial instruments accounting projects

Requires some debt instruments to be marked to fair value. Debt instruments carried at amortized cost or fair value through other comprehensive income would be subject to more conservative impairment testing, with more timely recognition of credit losses than under existing rules. The proposals may create a disincentive to hold securitized assets (i.e., if they have to be marked to fair value and/or subject to more conservative impairment testing), but conversely the proposals may incentivize banks to securitize more of their loan portfolios.

*During the fourth quarter of 2009 the Moody’s Analytics ("MA") groupings were realigned and renamed to reflect the reporting unit structure for the MA segment at December 31, 2009. Pursuant to this realignment the Subscriptions grouping was renamed Research, Data and Analytics and the Software grouping was renamed Risk Management Software. The revised groupings classify certain subscription-based risk management software revenue and advisory services relating to software sales to the redefined Risk Management Software grouping. Risk Management Software was renamed Enterprise Risk Solutions during the first quarter of 2012.
