Disclaimer

Certain statements contained in this release are forward-looking statements and are based on future expectations, plans and prospects for Moody’s business and operations that involve a number of risks and uncertainties. Moody’s outlook for 2015 and other forward-looking statements in this release are made as of May 4, 2015, and the Company disclaims any duty to supplement, update or revise such statements on a going-forward basis, whether as a result of subsequent developments, changed expectations or otherwise. In connection with the “safe harbor” provisions of the Private Securities Litigation Reform Act of 1995, the Company is identifying certain factors that could cause actual results to differ, perhaps materially, from those indicated by these forward-looking statements. Those factors, risks and uncertainties include, but are not limited to, the current world-wide credit market disruptions and economic slowdown, which is affecting and could continue to affect the volume of debt and other securities issued in domestic and/or global capital markets; other matters that could affect the volume of debt and other securities issued in domestic and/or global capital markets, including credit quality concerns, changes in interest rates and other volatility in the financial markets; the level of merger and acquisition activity in the U.S. and abroad; the uncertain effectiveness and possible collateral consequences of U.S. and foreign government initiatives to respond to the current world-wide credit market disruptions and economic slowdown; concerns in the marketplace affecting Moody’s credibility or otherwise affecting market perceptions of the integrity or utility of independent credit agency ratings; the introduction of competing products or technologies by other companies; pricing pressure from competitors and/or customers; the level of success of new product development and global expansion; the impact of regulation as an NRSRO, the potential for new U.S., state and local legislation and regulations, including provisions in the Financial Reform Act and regulations resulting from that Act; the potential for increased competition and regulation in the EU and other foreign jurisdictions; exposure to litigation related to Moody’s rating opinions, as well as any other litigation, government and regulatory proceedings, investigations and inquiries to which the Company may be subject from time to time; provisions in the Financial Reform Act legislation modifying the pleading standards, and EU regulations modifying the liability standards, applicable to credit rating agencies in a manner adverse to credit rating agencies; provisions of EU regulations imposing additional procedural and substantive requirements on the pricing of services; the possible loss of key employees; failures or malfunctions of Moody’s operations and infrastructure; any vulnerabilities to cyber threats or other cybersecurity concerns; the outcome of any review by controlling tax authorities of the Company’s global tax planning initiatives; the outcome of those Legacy Tax Matters and legal contingencies that relate to the Company, its predecessors and their affiliated companies for which Moody’s has assumed portions of the financial responsibility; exposure to potential criminal sanctions or civil remedies if the Company fails to comply with foreign and US laws and regulations that are applicable in the jurisdictions in which the Company operates, including sanctions laws, anti-corruption laws and local laws prohibiting corrupt payments to government officials; the impact of mergers, acquisitions or other business combinations and the ability of the Company to successfully integrate acquired businesses; currency and foreign exchange volatility; the level of future cash flows; the levels of capital investments; and a decline in the demand for credit risk management tools by financial institutions; and other risk factors as discussed in the Company’s annual report on Form 10-K for the year ended December 31, 2014 and in other filings made by the Company from time to time with the Securities and Exchange Commission.

Moody’s has a Disciplined Approach to Capital Allocation and Continues to Return Capital to Shareholders

In Investing in Growth Opportunities:
- **Reinvestment**: In existing businesses to support organic growth
- **Acquisitions**: Aligned with strategy; opportunistic, using offshore cash

In Return of Capital:
- **Dividends**: Yield potential is 1.4% - 1.8%; payout ratio potential is 25% - 30% of net income
- **Share Repurchases**: Average annual potential is $750 million to $1.25 billion

Share Repurchases and Dividends Paid:

- Share count declined 12% from 2010 to 1Q15
- Moody’s expects 2015 share repurchases to be approximately $1 billion*
- Current annualized dividend rate of $1.36 per share (1Q15 payout of 30% of net income)
- Current dividend yield of 1.3%**

*Guidance as of May 4, 2015. Subject to market conditions and other ongoing capital allocation decisions.
Well-Spaced Maturity Profile Reduces Refinancing Risk

- Moody’s current credit rating from S&P is BBB+
  - Moody’s leverage metrics remain within S&P’s stated criteria for the current rating
- On March 9, 2015, Moody’s closed a €500 million debt offering of 12-year notes at 1.75%, maturing on March 9, 2027
  - The net proceeds from this offering will be used for general corporate purposes
- $1 billion undrawn credit facility

Debt Maturities

*2015 12-yr notes, maturing in 2027, have been converted to USD using the March 31, 2015 spot rate of $1.076 to €1.
Moody’s Market Overview
Non-Financial Corporates Have Refunding Needs of Nearly $3.2 Trillion*

Debt Maturities: US Moody’s-Rated Corporate Bonds and Loans

Debt Maturities: EMEA Moody’s-Rated Corporate Bonds and Loans

Debt Maturities: Asia Pacific Moody’s-Rated Corporate Bonds

*Amount reflects total maturities identified in the above charts.

Sources: Moody’s Investors Service and Bloomberg, December 2014. Note: Data represents rated and unrated bonds of rated corporate entities in Asia ex-Japan, Australia and New Zealand. Data does not include loans.
Bond Issuance Has Primarily Been Used for Refinancing; Recently, M&A Activity Has Increased

Uses of Funds from USD High Yield Bonds and Bank Loans*

- Debt Refinancing
- M&A
- Capital Spending
- Shareholder Payments

Growth in Buyback, M&A and Capex Activity: US Non-Financial Corporates
(Growth as a % of base period, TTM volume)

*% of mentions for each respective period in bond issue or bank loan program tranche documents. Excludes Investment Grade issuance, issues of less than $25 million and general corporate purposes. An issue can have multiple purposes and, as a result, %’s do not sum to 100%.
Disintermediation of Capital Markets: Europe and U.S.

European companies have historically relied more on banks than their American counterparts, but are increasingly turning to the bond market.

First quarter 2015 European Moody’s rated high yield bond and bank loan issuance was split 60% / 40%, respectively.

Sources: ECB, Federal Reserve, BarCap Indices. Europe bank loan data includes Eurozone and UK bank loans. Europe bond data includes euro and sterling denominated bonds. Both charts are through February 2015.
MIS recurring revenue is typically billed annually and recognized ratably over 12 months. Recurring revenue can also be billed upfront and recognized over the life of the security. MA recurring revenue is recognized over the contract period.

Moody’s Recurring Revenue Base Provides Stability

Recurring Revenue*

MA Drivers
- Growth in RD&A
- Growth in ERS maintenance and subscription revenue
- Select elements of pricing

MIS Drivers
- Growth in monitoring fees
- Select elements of pricing

*MIS recurring revenue is typically billed annually and recognized ratably over 12 months. Recurring revenue can also be billed upfront and recognized over the life of the security. MA recurring revenue is recognized over the contract period.
Moody’s New Rating Mandates

Global New Rating Mandates*

1Q15 regional highlights:

- **EMEA**: QE in Europe is mainly helping established issuers tap the market, crowding out new issuers

- **United States**: There has been a decline in leveraged loans, which previously accounted for a significant percentage of new mandates

- **Rest of World**: An increased number of China new mandates has been offset by fewer Latin America new mandates

Source: Moody’s Investors Service.

*Rated by Moody’s Investors Service. Moody’s presentation of Global New Rating Mandates now includes CFG, FIG and PPIF new mandates and more closely aligns with the tracking of new mandates by MIS’s commercial organization.
Macro Environment is Characterized by Historically Low Leverage Ratios, Default Rates, and Interest Rates

**Ratio of Debt to Pre-Tax Profits**

Moody’s Revenue Does Not Directly Tie to Issuance

In addition to issuance activity levels, Moody’s revenue is impacted by the mix of issuance activity, sales of non-issuance related products (including by Moody’s Analytics), pricing and growth in monitored credits.

Steady Moody’s Analytics Revenue Growth Complements Variability of Moody’s Ratings Revenue
Euro Debt Issuance by US Companies ("Reverse Yankee Issuance") has Increased

EUR yields continue to outperform USD yields

Reverse Yankee issuance has increased sharply

» Tailwinds:
  - The differential in absolute rates has improved in favor of euro debt
  - Issuers have the opportunity to diversify their investor bases and/or maturity profiles

» Headwinds:
  - More recently, the wider cross-currency basis deterioration has reduced the relative attractiveness of euro funding
  - Bankers are focused on potential issuance oversupply

*Composite yield of 10-year, single-A rated debt securities provided by Bloomberg Valuation Service
Oil & Gas Bond Issuance Has Avoided Worst Case Scenarios Despite 50%+ Drop in the Price of Oil

Global Oil and Gas Bond Issuance *

Bank Loan Issuance Has Decelerated

US Non-Financial Corporate Speculative-Grade Bank Loans*

- Heightened regulation and fewer LBOs are constraining loan volume in 2015
- Interagency regulators (Federal Reserve, OCC and FDIC) implement the Shared National Credit (SNC) Program and introduced Leveraged Lending Guidance (LLG) to constrain highly leveraged transactions
- In the fall of 2014, those banks subject to LLG were criticized for lax credit standards and responded in 2015 by originating fewer highly leveraged loans
- This impacted the volume of single-B rated issuers, representing the majority of new leveraged loan issuance
- Nonetheless, investor demand for leveraged loans remains strong and new issues continue to see good uptake

2014 European rated bank loan issuance totaled $119 billion, a 47% increase over $81 billion in 2013
  - 1Q15 rated issuance totaled $20 billion, a 31% decline from $29 billion in 1Q14

*Rated bank loan issuance represents Moody’s rated non-financial corporate speculative-grade bank loans. It includes term loan B syndicated loans sold to investors.
**Unrated bank loan issuance includes term loan A (retained by the lender) and revolvers.
Sources: Moody’s Investors Service.
Emerging Markets Issuance has Grown Substantially, but Will Remain Volatile

Emerging Markets Rated Corporate Bond Issuance*

*Moving 12 month sum; includes rated investment grade and high yield corporate bond issuance (financial and non-financial).

 Reported Revenue Growth

- **2012**: $38.0 million (8.5% growth)
- **2013**: $37.1 million (7.7% growth)
- **2014**: $52.0 million (10.0% growth)

*2012 and 2013 exclude non-rating revenue from KIS (Korea Investors Service) which was reclassed to MIS Other in 2014. 2014 includes the Lewtan acquisition.

**Upgrades** reflect amendments to existing customer contracts.

***New Sales reflect new contracts with new and existing customers.
ERS’ Renewable Book Growing, But Revenue Dependent on Project Timing

» 1Q 2015 recurring Maintenance and Subscriptions revenue represents 69% of total revenue; growing at a 17% CAGR from 1Q11 to 1Q15

» Non-recurring License and Service revenue drives variability in quarter-to-quarter top-line results
  – Revenue recognized as implementation projects are completed and accepted by the customer
  – Sales provide 12-24 months’ visibility into revenue

» Seasonal pattern
  – Sales tend to be strongest in 1Q and 4Q, in line with customer budgeting/planning cycles
  – Revenue is typically strongest in 4Q, driven by prior year’s sales and customer timelines for year-end project completion
Growing Regulatory Requirements for Financial Institutions

Source: Moody’s Analytics market research as of March 2015.

1. The implementation of the LCR in the EU will be: 60% in 2015, 70% in 2016, 80% in 2017 and 100% in 2018. In the US, advanced-approach banks will have to meet 80% of the LCR by January 1, 2015 and 100% of the ratio by Jan. 2017.

2. The G-SIB surcharge will expand the conservation buffer, subject to a 3 year phase in period. G-SIBs will be required to hold a minimum Total Loss-Absorbing Capacity” (TLAC) between 16% and 20% from 2019.

3. The new standardized approach (SA-CCR) replaces both the Current Exposure Method (CEM) and the Standardized Method (SM) in the capital adequacy framework.

4. Regulatory framework for domestic systemically important banks in Australia.

5. Phase 2 will be implemented in 2015 and will focus on liquidity and Phase 3 will be implemented in 2016 and will focus on additional balance sheet data.
Copal Amba is a Market Leader in Analytics and Research Support Services

» Provider of research, analytics and business intelligence services to global financial institutions and corporations
» ~2,300 employees with strong banking and research backgrounds
» A leading player in the $1 billion third party pure play Knowledge Process Outsourcing (KPO) market

M&A support
- 8 of the world’s 10 largest investment banks are clients
- Onsite live deal support and high-value language support

Sell-side research
- 7 of the world’s 10 largest investment banks are clients
- Co-branded research offerings

Corporates & professional services
- Fortune 1000 clients across various sectors are clients
- 7 of the world’s 10 largest consulting firms are clients

Asset management
- 6 of the world’s 15 largest asset managers are clients
- Provide research, fund strategy support and forensic audits
Conclusion
Why Invest in Moody’s?

» We strive to be the world’s most respected authority serving risk-sensitive financial markets

» We have had strong revenue and earnings growth, as well as strong cash flow conversion
  – 2010 – TTM 1Q15 Revenue CAGR of 13%
  – 2010 – TTM 1Q15 non-GAAP EPS* CAGR of 18%
  – 2010 – TTM 1Q15 free cash flow conversion rate of ~30%

» We are committed to returning capital to our shareholders
  – Current annualized dividend of $1.36
  – Anticipate total 2015 share repurchases of approximately $1.0 billion**

» We will selectively invest in strategic growth opportunities
  – Leverage brand to extend our relevance in financial markets
  – Expand our product offerings and geographic influence

*See appendix for reconciliation of non-GAAP EPS to GAAP EPS.

**Bonus plan for Chief Risk Officer and Compliance/Credit Policy automatically funds at 100% to avoid potential conflicts of interest. Payout to these employees is based on achievement of their individual non-financial goals. Excludes Copal Amba employees except Copal Amba CEO, whose metrics include Copal Amba Sales and Operating Income.
***MCO Corporate Groups include Finance, Accounting, Legal, Human Resources, and others. CFO metrics also include Copal Amba operating income.
****To better align long-term incentives with Moody’s acquisition strategy, EPS, which was one of the measures used prior to 2012, was replaced by EBITDA.
Select Regulations Related to Structured Finance

Dodd-Frank Act

Volcker Rule

The Volcker Rule prohibits banking entities from engaging in short-term proprietary trading of certain securities and derivatives for their own account. The Volcker Rule also imposes limits on banking entities’ investments in, and relationships with, hedge funds and private equity funds. In mid-January 2014, the five federal agencies adopted an interim final rule which permits the banking entities to retain interests in certain collateralized debt obligations backed primarily by trust preferred securities that would otherwise be subject to the Volcker Rule’s covered fund investment prohibitions.

On December 18, 2014, The Fed extended until July 21, 2016 the period given to the banking entities to conform their investments in and their relationships with covered funds and foreign funds that were in place prior to December 31, 2013. The Board also announced its intention to act next year to grant banking entities an additional one-year extension of the conformance period until July 21, 2017, to conform ownership interests in and relationships with legacy covered funds.

Concentration limits on large financial firms

On November 5, 2014, the Fed issued a final rule which generally prohibits a financial company from combining with another company if the ratio of the resulting company’s liabilities exceeds 10 percent of the aggregate consolidated liabilities of all financial companies. Under the final rule, if a financial company has reached the 10 percent concentration limit, the company could not acquire control of another company under merchant banking authority. The final rule also adds an exemption to clarify that a financial company may continue to engage in securitization activities if it has reached the limit. The rule became effective on January 1, 2015.

Enhanced Prudential Standards

On February 18, 2014, the Fed approved a final rule strengthening the supervision and regulation of large US bank holding companies and foreign banking organizations (“FBO”). The final rule establishes a number of enhanced prudential standards, including liquidity, risk management, and capital. It also requires a FBO with a significant US presence to establish an intermediate holding company over its US subsidiaries.

On September 3, 2014, the federal banking regulators adopted a final rule on the liquidity coverage ratio which strengthens the liquidity positions of large financial institutions. Each institution will be required to hold high quality, liquid assets that can be converted quickly into cash in an amount equal to or greater than its projected cash outflows minus its projected cash inflows during a 30-day stress period.

On September 9, 2014, the federal banking agencies have issued a joint final rule that revises the denominator of the supplementary leverage ratio (total leverage exposure). The final rule aligns the agencies’ methods of calculation with the international leverage ratio standards and it applies to banking organizations subject to the advanced approaches risk-based capital rules.
Select Regulations Related to Structured Finance (continued)

Dodd-Frank Act (continued)

QM (§§1411, 1412, 1414)
Effective January 10, 2014, mortgage lenders must comply with the Consumer Finance Protection Bureau’s Ability-To-Repay and Qualified Mortgage Rule. The rule also provides a safe harbor for loans that satisfy the definition of a qualified mortgage (“QM”) and are not “higher-priced,” and provides a rebuttable presumption for higher-priced mortgage loans.

QRM (§941)
Exempts from risk retention requirements asset-backed securities (“ABS”) that are collateralized exclusively by residential mortgages that qualify as “qualified residential mortgages ” (“QRM”). In a final rule issued on October 22, 2014, six federal agencies, including the Federal Reserve Board and the SEC, adopted a definition of QRM that is aligned with the definition of QM. Qualified Commercial Real Estate Loans (“QCREL”) will also be exempt from risk retention.

Loan-Level Disclosure (§942)
Increases disclosure and may reduce issuance volume. The regulation requires an issuer of ABS to disclose, for each tranche or class of security, certain loan level information regarding the assets backing that security.

Risk Retention (§941)
On October 22, 2014, six federal agencies approved a final rule requiring retention of an unhedged and untransferable 5% credit risk of SF securities, potentially dampening US SF issuance for certain asset classes. The final rule generally permits risk retention to be accomplished through one or a combination of methods. The final rule also provides additional or modified risk retention methods for specific types of transactions, including asset-backed commercial paper conduits, commercial mortgage-backed securities, securitizations sponsored by Fannie Mae and Freddie Mac, open-market CLOs, and revolving pool securitizations. Special rules for CMBS (third party holder of first loss piece) if certain criteria are met). The final rule also sets forth prohibitions on transferring or hedging the credit risk that the sponsor is required to retain. The final rule also does not require any retention for securitizations of commercial loans, commercial mortgages, or automobile loans if they meet specific standards for high quality underwriting. The final rule applies to asset-backed securities issued on or after December 24, 2015, if the securities are backed by residential mortgages. The final rule applies to all other classes of asset-backed securities issued on or after December 24, 2016.
Select Regulations Related to Structured Finance (continued)

Dodd-Frank Act (continued)

Reg. AB II

The Reg. AB II Final Rules became effective on November 24, 2014 and provide new disclosure and reporting requirements for certain ABS. The Reg. AB II Final Rules require issuers of registered and publicly offered ABS that consist of RMBS, CMBS, auto loans and auto leases and resecuritizations of ABS that include these asset types, or of debt securities, to provide investors with asset-level data, both at the time of an offering and on an ongoing basis. The Reg. AB II Final Rules also enhance disclosure requirements for initial ABS offerings and periodic reports, dictate the timing for filing a preliminary prospectus and other transaction documents and provide new requirements for shelf registrations of ABS. Issuers of ABS must comply with the new rules, forms, and disclosure requirements (other than asset-level disclosure requirements) no later than November 23, 2015. Issuers of RMBS, CMBS, auto ABS and debt securities (including resecuritizations) must comply with the asset-level disclosure requirements no later than November 23, 2016.

The definition of ABS, as used in the Reg. AB II Final Rules, is narrower than the definition set forth in the Securities Exchange Act of 1934 and does not include certain “structured finance products” such as securitizations of managed pools or synthetic transactions.

Rule 17g-10

The Exchange Act requires the issuer or underwriter of any asset-backed security to make publicly available the findings and conclusions of any third-party due diligence report obtained by the issuer or underwriter. The Exchange Act also requires that in any case in which third-party due diligence services are employed by an NRSRO, issuer, or underwriter, the person providing the due diligence services shall provide, to any NRSRO that produces a credit rating to which such services relate, written certification, in a format as set forth in section 15E(s)(4)(C) of the Exchange Act. Rule 17g-10 will require the mandated written certification to be made on new Form ABS Due Diligence-15E. The offshore transactions and the municipal securities are excluded. The rule will become effective on June 15, 2015.

Table may not sum to total due to rounding.
To any loss of present or prospective profits or (b) any loss or damage arising where the relevant party is advised in advance of the possibility of such losses or damages, including but not limited to: (a) special, consequential, or incidental losses or damages whatsoever arising from or in connection with the information contained herein or the use of or inability to use any such information.

NO WARRANTY, EXPRESS OR IMPLIED, AS TO THE ACCURACY, TIMELINESS, COMPLETENESS, MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OF ANY SUCH RATING OR OTHER OPINION OR INFORMATION IS GIVEN OR MADE BY MOODY'S IN ANY FORM OR MANNER WHATSOEVER.

Moody's Investors Service, Inc., a wholly-owned credit rating agency subsidiary of Moody's Corporation ("MCO"), hereby discloses that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by Moody's Investors Service, Inc. have, prior to assignment of any rating, agreed to pay to Moody's Investors Service, Inc. for appraisal and rating services rendered by it fees ranging from $1,500 to approximately $2,500,000. Moody and MIS also maintain policies and procedures to address the independence of MIS's ratings and rating processes. Information regarding certain affiliations that may exist between directors of MCO and rated entities, and between entities who hold ratings from MIS and have also publicly reported to the SEC an ownership interest in MCO of more than 5%, is posted annually at www.moodys.com under the heading “Investor Relations — Corporate Governance — Director and Shareholder Affiliation Policy.”

For Australia only: Any publication into Australia of this document is pursuant to the Australian Financial Services Act (as amended) of MCO’s affiliate, Moody’s Investors Service Pty Limited ABN 61 003 399 657AFSL 336969 and/or Moody’s Analytics Australia Pty Ltd ABN 94 105 136 972 AFSL 383569 (as applicable). This document is intended to be provided only to “wholesale clients” within the meaning of section 761G of the Corporations Act 2001. By continuing to access this document from within Australia, you represent to Moody’s that you are, or are accessing the document as a representative of, a “wholesale client” and that neither you nor the entity you represent will directly or indirectly disseminate this document or its contents to “retail clients” within the meaning of section 761G of the Corporations Act 2001. MOODY’S credit rating is an opinion as to the creditworthiness of a debt obligation of the issuer, not on the equity securities of the issuer or any form of security that is available to retail clients. It would be dangerous for “retail clients” to make any investment decision based on MOODY’S credit rating. If in doubt you should contact your financial or other professional adviser.

For Japan only: Moody's Japan K.K. (“MJKK”) is a wholly-owned credit rating agency subsidiary of Moody's Group Japan G.K., which is wholly-owned by Moody's Overseas Holdings Inc., a wholly-owned subsidiary of MCO. Moody's SF Japan K.K. ("MSFJ") is a wholly-owned credit rating agency subsidiary of MJKK. MSFJ is not a Nationally Recognized Statistical Rating Organization (“NRSRO”). Therefore, credit ratings assigned by MSFJ are Non-NRSRO Credit Ratings. Non-NRSRO Credit Ratings are assigned by an entity that is not a NRSRO and, consequently, the rated obligation will not qualify for certain types of treatment under US laws. MJKK and MSFJ are credit rating agencies registered with the Japan Financial Services Agency and their registration numbers are FSA Commissioner (Ratings) No. 2 and 3 respectively.

MJKK or MSFJ (as applicable) hereby disclose that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by MJKK or MSFJ (as applicable) have, prior to assignment of any rating, agreed to pay to MJKK or MSFJ (as applicable) for appraisal and rating services rendered by it fees ranging from JPY200,000 to approximately JPY350,000,000.

MJKK and MSFJ also maintain policies and procedures to address Japanese regulatory requirements.
