

HF10™ therapy, delivered by the Nevro® Senza® System, is the high-frequency spinal cord stimulation technology operated at 10,000 Hz designed to aid in the management of chronic intractable pain of the trunk and limbs without paresthesia.

Nevro Reimbursement Support

NevroHealthEconomics@nevro.com

CPT® Procedure Codes

The following CPT® codes are provided as a guide for Ambulatory Surgery Center (ASC) reporting. Actual code(s) billed should reflect the services provided to each individual patient. The Medicare fee schedules listed are a national average and have not been geographically or wage adjusted. ASCs report CPT codes, but they are assigned to individual fee schedules. Multiple procedures may be paid for each case.

The table below provides a brief description of the procedure and the CPT code plus the following:

- HCPCS short description
- Medically unlikely edit (MUE) date of service unit limit
- Payment indicator
- National average payment rate

Procedure	CPT Code ¹	Short Descriptor ¹	MUE ²	*Payment Indicator ¹	Medicare National Average ³
Trial	63650	<i>Percutaneous implantation of neurostimulator electrode array, epidural</i>	2	J8	\$4,595
Implant: Perc Leads	63685	<i>Insertion or replacement of spinal neurostimulator pulse generator or receiver, direct or inductive coupling</i>	1	J8	\$22,892
	63650	<i>Percutaneous implantation of neurostimulator electrode array, epidural</i>	2	J8	\$4,595

It is always the provider's responsibility to determine the medical necessity and proper site of service for the procedure, and to submit appropriate codes, charges and modifiers for services rendered.

Procedure	CPT Code	Short Descriptor	MUE	*Payment Indicator	Medicare National Average
Implant: Paddle Lead	63685	<i>Insertion or replacement of spinal neurostimulator pulse generator or receiver, direct or inductive coupling</i>	1	J8	\$22,892
	63655	<i>Laminectomy for implantation of neurostimulator electrodes, plate/paddle, epidural</i>	1	J8	\$15,006

Procedure	CPT Code	Short Descriptor	MUE	*Payment Indicator	Medicare National Average
Revision	63663	<i>Revision including replacement, when performed, of spinal neurostimulator electrode percutaneous array(s), including fluoroscopy, when performed</i>	1	G2	\$3,101
	63664	<i>Revision including replacement, when performed, of spinal neurostimulator electrode plate/paddle(s) placed via laminotomy or laminectomy, including fluoroscopy, when performed</i>	1	J8	\$12,915
	63688	<i>Revision or removal of implanted spinal neurostimulator pulse generator or receiver</i>	1	A2	\$1,500
Removal	63661	<i>Removal of spinal neurostimulator electrode percutaneous array(s), including fluoroscopy, when performed</i>	1	G2	\$786
	63662	<i>Removal of spinal neurostimulator electrode plate/paddle(s) placed via laminotomy or laminectomy, including fluoroscopy, when performed</i>	1	G2	\$1,500
	63688	<i>Revision or removal of implanted spinal neurostimulator pulse generator or receiver</i>	1	A2	\$1,500

***ASC Payment Indicator⁴**

Indicator	Description
A2	Surgical procedure on ASC list in CY 2007; payment based on OPPS relative payment weight
G2	Non office-based surgical procedure added in CY 2008 or later; payment based on OPPS relative payment weight
J8	Device-intensive procedure; paid at adjusted rate
N1	Packaged service/item; no separate payment made

⁴ Addendum DD1 -- Final ASC Payment Indicators for CY 2018, Hospital Outpatient Prospective Payment and Ambulatory Surgical Center Payment Systems Final Rule, Federal Register Volume 82, Number 217 (Monday, November 13, 2017) 42 CFR Parts 414, 416 and 419 et al.

Information provided by Nevro is presented for illustrative purposes only and does not constitute coding, reimbursement, or legal advice. It is always the provider's responsibility to determine the medical necessity and proper site of service for the procedure, and to submit appropriate codes, charges and modifiers for services rendered.

Medicare Reimbursement Examples

The below calculations represent the formula in which Medicare calculates the allowable when multiple procedures are billed. These examples reflect rounded national averages and are not geographically adjusted. No multiple procedure discounting should be applied to these codes.

Trial

CPT 63650	+	CPT 63650	=	Medicare Allowable
\$4,595	+	\$4,595	=	\$9,190

Implant: Perc Leads

CPT 63685	+	CPT 63650	+	CPT 63650	=	Medicare Allowable
\$22,892	+	\$4,595	+	\$4,595	=	\$32,082

Implant: Paddle Lead

CPT 63685	+	CPT 63655	=	Medicare Allowable
\$22,892	+	\$15,006	=	\$37,898

Programming CPTs

Programming CPTs (95970-95972) are nonsurgical procedures that are not payable by Medicare in an ASC. The ASC should not report these codes to Medicare. If the physician does programming, they can report those codes on the physician claim. For more guidance, please see Nevro’s 2018 Physician Reimbursement and Coding Guide.

Information provided by Nevro is presented for illustrative purposes only and does not constitute coding, reimbursement, or legal advice. It is always the provider’s responsibility to determine the medical necessity and proper site of service for the procedure, and to submit appropriate codes, charges and modifiers for services rendered.

Facility Modifiers

Modifiers are appended to CPT codes to indicate to a payer that a service or procedure has been altered by specific circumstances, but do not ensure payment. In all cases, documentation must support the use of any modifiers reported on claims, and facilities should be prepared to submit their documentation to the payers to justify any potential increases in payment.

Modifier ⁵	Description	Notes ⁵
-52	Reduced services	Report this modifier when a service or procedure is partially reduced or eliminated at the physician's discretion.
-58	Staged or related procedure or service by the same physician or other qualified health care professional during the postoperative period	Report this modifier during the post-op period if a procedure or service was performed was: a) planned prospectively at the time of the original procedure (staged); b) more extensive than the original procedure; or c) for therapy following a diagnostic surgical procedure.
-59	Distinct procedural service	Report this modifier when billing the same CPT for two or more distinct procedural services.
-76	Repeat procedure or service by the same physician or other qualified health care professional	Report this modifier when a procedure or service was repeated subsequent to the original procedure or service.
-78	Unplanned return to the operating /procedure room by the same physician or other qualified health care professional following initial procedure for a related procedure during the postoperative period	Used when another procedure was performed during the post-op period of the initial procedure.
-PO	Excepted service provided at an off-campus, outpatient, provider-based department of a hospital	Do not report this modifier for services performed in remote locations of a hospital, satellite facilities of a hospital, or in an emergency department.

⁵ Coding with Modifiers A Guide to Correct CPT And HCPCS Level II Modifier Usage, Second Edition. American Medical Association. Chicago, IL 2010.
 Information provided by Nevro is presented for illustrative purposes only and does not constitute coding, reimbursement, or legal advice. It is always the provider's responsibility to determine the medical necessity and proper site of service for the procedure, and to submit appropriate codes, charges and modifiers for services rendered.

Level II HCPCS: Devices

Medicare Claims

Under the ASC payment system, packaged services (indicated by Payment Indicator ‘N1’), are bundled into the ASC payment for the covered surgical procedure. Pursuant to Medicare Claims Processing Manual (Chapter 14 - Ambulatory Surgical Centers)⁶:

ASCs must incorporate charges for packaged services into the charges reported for the separately payable services with which they are provided. Because contractors pay the lesser of 80 percent of actual charges or the ASC payment rate for the separately payable procedure, and because this comparison is made at the claim line-item level, facilities may not be paid appropriately if they unbundle charges and report those charges for packaged codes as separate line-item charges.

Commercial Claims

Most commercial plans provide guidance in their medical policies about which device HCPCS codes to report on claims. Nevro recommends reviewing commercial contracts and medical policies to determine if it is appropriate to bill implant codes.

The table below contains the HCPCS Level II codes, as well as the L-codes that might be listed in a medical policy or commercial contract. Please check with your payer or Nevro’s Health Economics & Reimbursement department for specifics on HCPCS billing.

Device	HCPCS Code ⁷	Payment Indicator ⁸	Description
Medicare Level II HCPCS Codes			
Pulse Generator	C1822	N1	Generator, neurostimulator (implantable), high frequency, with rechargeable battery and charging system
Leads (8-contact, paddle)	C1778	N1	Lead, neurostimulator (implantable)
Trial Leads	C1897	N1	Lead, neurostimulator, test kit (implantable)
Lead Extension	C1883	N1	Adaptor/extension, pacing lead or neurostimulator lead (implantable)
Patient Programmer	C1787	N1	Patient programmer, neurostimulator

Device	HCPCS Code ⁹	Payment Indicator ¹⁰	Description
Commercial Payer L-Codes			
Leads: 8-contact	L8680	N/A	Implantable neurostimulator electrode, each
Pulse Generator	L8687	N/A	Implantable neurostimulator pulse generator, dual array, rechargeable, includes extension
External Recharger	L8689	N/A	External recharging system for battery (internal) for use with implantable neurostimulator, replacement only
Remote Control (patient programmer)	L8681	N/A	Patient programmer (external) for use with implantable programmable neurostimulator pulse generator, replacement only

Medicare National Coverage Determination

Medicare’s National Coverage Determination (NCD) 160.7 allows for coverage of spinal cord stimulation when the criteria outlined below is met¹¹. In addition, some local Medicare Administrative Contractors (MACs) may require additional coverage criteria through their local policies (LCDs) so please check with your MAC.

- a) The implantation of the stimulator is used only as a **late resort (if not a last resort)** for patients with chronic intractable pain
- b) With respect to item a, other treatment modalities (pharmacological, surgical, physical, or psychological therapies) have been tried and did not prove satisfactory, or are judged to be unsuitable or contraindicated for the given patient
- c) Patients have undergone careful screening, evaluation and diagnosis by a multidisciplinary team prior to implantation. (Such screening must include psychological, as well as physical evaluation)
- d) All the facilities, equipment, and professional and support personnel required for the proper diagnosis, treatment training, and follow up of the patient (including that required to satisfy item c) must be available
- e) Demonstration of pain relief with a temporarily implanted electrode precedes permanent implantation

Payer coverage and payment policies will vary and should be verified by the provider prior to treatment and billing.
