Non-IFRS Financial Measures and Retail Industry Metrics

This presentation makes reference to certain non-IFRS Accounting Standards measures ("non-IFRS financial measures") and certain retail industry metrics. These measures are not recognized measures under IFRS Accounting Standards, do not have a standardized meaning prescribed by IFRS Accounting Standards and are therefore unlikely to be comparable to similar measures presented by other companies. Rather, these measures are provided as additional information to complement those IFRS Accounting Standards measures by providing further understanding of our results of operations from management's perspective. Accordingly, these measures should not be considered in isolation or as a substitute for analysis of our financial information reported under IFRS. We use non-IFRS financial measures including "EBITDA," "Adjusted EBITDA," and "Adjusted Net Income"; non-IFRS Accounting Standards ratios ("non-IFRS ratios") including "Adjusted Net Income per Diluted Share," "Adjusted EBITDA as a percentage of net revenue," and "Adjusted Net Income as a percentage of net revenue"; and capital management measures including "capital cash expenditures (net of proceeds from lease incentives)," and "free cash flow." This presentation also makes reference to "gross profit margin" and "comparable sales," which are commonly used operating metrics in the retail industry but may be calculated differently by other retailers. Gross profit margin and comparable sales are considered supplementary financial measures under applicable securities laws. These non-IFRS financial measures and retail industry metrics are used to provide investors with supplemental measures of our operating performance and thus highlight trends in our core business that may not otherwise be apparent when relying solely on IFRS measures. We believe that securities analysts, investors and other interested parties frequently use non-IFRS financial measures and retail industry metrics in the evaluation of issuers. Our management also uses non-IFRS financial measures and retail industry metrics in order to facilitate operating performance comparisons from period to period, to prepare annual operating budgets and forecasts and to determine components of management compensation.

For additional information regarding measures, please see the "How We Assess the Performance of Our Business" and "Selected Financial Information" sections of our Q1 2026 MD&A (for the 13-weeks ended June 1, 2025), available on SEDAR+ at www.sedarplus.com, which is incorporated herein by reference.

FY2025	2.0%	6.5%	6.6%	26.0%	11.0%
FY2026	19.3%				

¹ Results in FY2021 and FY2022 reflect temporary boutique closures and severe occupancy restrictions due to the COVID-19 pandemic. As temporary boutique closures in FY2021 and FY2022 resulted in all boutiques being removed from our comparable store base, we believe total comparable sales was not representative of the underlying trends of our business. We do not believe this metric is useful to investors in understanding performance and therefore have not reported this metric for FY2021 or FY2022.

² Adjusted EBITDA and Adjusted Net Income are non-IFRS financial measures. Adjusted EBITDA as a percentage of net revenue and Adjusted Net Income as a percentage of net revenue are non-IFRS ratios and comparable sales is a retail operating metric. See "Non-IFRS Financial Measures and Retail Industry Metrics" for additional information on page 4 of this presentation.
