

PRESS RELEASE

FLEX MAKES WHAT'S NEXT – AND SHOWCASES CREATIVE SOLUTIONS FOR SMART LIVING, AUTOMOTIVE, MOBILITY AND HEALTHCARE AT CES 2019

Exhibit offers a peek 'behind the curtain' to show how Flex helps customers create market-leading products for the burgeoning IoT and 5G industries

LAS VEGAS, January 8, 2019 – Drawing on its broad multi-industry perspective, Flex has created an immersive experience showing how it helps customers develop and distribute next-generation electronics in a time of rapid technological change. Flex engages with customers across diverse technology fields including smart living, automotive, mobility and healthcare to conceptualize, design, build, deliver and manage technically advanced solutions at scale.

“At CES this year, Flex will demonstrate new ways of understanding and experiencing smart technology – from the way products are manufactured in the Fourth Industrial Revolution, to how they are utilized and connected,” said Doug Britt, president of Integrated Solutions at Flex. “Heightened customer expectations are being driven by the emerging benefits of 5G and Artificial Intelligence (AI), pushing companies to incorporate new technologies in their products.”

“Connected IoT ecosystems and AI advancements are bringing new capabilities to traditional product categories,” said Paul Humphries, president of High-Reliability Solutions at Flex. “From automotive manufacturers to communications providers, companies from all industries must engineer intelligence into their products, and be ready to deploy at a regional or global scale to meet consumer demands.”

The Flex CES showcase will include specific emphasis on:

- **Smart Living:** Smart devices are taking over the home, and Flex will be showcasing a network of technologies that impact every room, including voice interfaces for smart appliance Human Machine Interface (HMI) controls, a range of creative audio reference designs and portable solar panels.
- **Health Solutions:** With innovative drug delivery systems, consumer healthcare devices, therapeutic stimulation products and the *BrightInsight™* digital health platform, Flex is significantly impacting healthcare through its premier quality medical-grade design, manufacturing and IoT digital health platform. Flex will be showcasing connected medical devices that provide real life data to help patients and their doctors create informed and actionable care plans together.
- **Automotive and Mobility:** Flex will highlight automotive design capabilities and cross-industry mobility expertise, with displays of unique solutions in autonomy, connectivity, electrification and smart tech, including autonomous compute servers, advanced interior cabin sensing and V2X technology.

As part of the experience, Flex will demonstrate its award-winning supply-chain expertise using *Flex Pulse®*, an intelligence platform designed for end-to-end global supply chain management with real-time visibility across sourcing, transportation, manufacturing and inventory.

Flex's exclusive CES showcase runs from Tuesday, Jan. 8, 2019 to Friday, Jan. 11, 2019 at the Venetian and Palazzo Congress Center in Las Vegas.

About Flex Ltd.

Flex is the *Sketch-to-Scale*® solutions provider that designs and builds *Intelligent Products for a Connected World*®. With approximately 200,000 professionals across 30 countries, Flex provides innovative design, engineering, manufacturing, real-time supply chain insight and logistics services to companies of all sizes in various industries and end-markets.
