# Weave Joins athenahealth's Marketplace Program, Giving Healthcare Practices Better Tools for Growth

2026-06-11

*Weave's integration with athenaOne connects practice operations and patient engagement ecosystems for a better patient experience*

LEHI, Utah--(BUSINESS WIRE)-- [Weave \(NYSE: WEAV\)](#), a leading AI-powered patient engagement and payments platform purpose-built for healthcare practices, today announced an agreement with [athenahealth](#), Inc. through the company's award-winning [athenahealth® Marketplace](#) program. The newly integrated application helps athenahealth's growing network of healthcare providers connect practice operations and patient engagement.

The Weave and athenahealth integration addresses the most common revenue leaks and workflow bottlenecks in medical practice management by:

- **Pursuing revenue from every missed call.** When a patient call goes unanswered or to voicemail, Weave automatically sends a follow-up text so the conversation continues.
- **Reducing no-shows before they happen.** Weave's Automated Reminders send appointment confirmations and reminders via text and email without staff lifting a finger.
- **Giving the front desk back valuable time.** Two-Way Messaging lets staff send and receive texts directly from the practice's business number, handling questions, confirmations, and follow-ups at a scale not available via phone calls alone.
- **Collecting payments faster and with less friction.** Integrated payments give patients multiple ways to pay (text-to-pay links, card on file, buy-now-pay-later, and in-office terminals), all connected to athenaOne billing records.

"Practices already leveraging the powerful EHR functionality of athenaOne can now use Weave to automate repetitive but important daily tasks, capture more opportunities, and drive sustainable growth with a fully integrated solution," said Scott Chandler, VP of Strategic Partnerships at Weave. "By automating a greater share of operations, Weave gives practice staff back valuable time for the high-value, person-centered interactions that help keep patients coming back."

As a new Marketplace partner, Weave joins an expansive, open ecosystem that enables integration with third-party applications, services, and systems to make innovative solutions available to more than 160,000 providers on the athenaOne network. The Marketplace allows athenaOne customers the

ability to access and efficiently integrate with solutions that augment the functionality of the athenaOne platform, helping providers and administrators eliminate friction for patients while working to improve practice outcomes and financial performance.

### **About Weave**

Weave is a leading vertical SaaS company delivering an AI-powered patient engagement and payments platform purpose-built for modern healthcare practices. More than software, Weave is an always-on teammate—handling patient interactions across voice and text and operating at the center of the patient journey. Through agentic AI workflows and authorized integrations with practice management systems, Weave ensures critical tasks like scheduling, insurance verification, and payments happen seamlessly, so nothing falls between the cracks. By embedding AI directly into daily operations, Weave reduces administrative workload, frees up staff to focus on human-centered care, and delivers real-time insights that help practices run smarter and grow with confidence. Serving over 40,000 customer locations, Weave was named a 2026 Best Software Awards winner for healthcare software products by G2.
