NON-GAAP FINANCIAL MEASURES

Adjusted EBITDA is defined as net income or loss attributable to BlackSky before interest income, interest expense, income taxes, depreciation and amortization, as well as significant non-cash and/or non-recurring expenses as our management believes these items are not as useful in evaluating the Company’s core operating performance. These items include, but are not limited to, stock-based compensation expense; unrealized (gain) loss on certain warrants/shares classified as derivative liabilities; loss on debt extinguishment; non-recurring transaction costs; litigation, settlements and related costs; severance; and impairment, obsolescence, and asset disposals.

Cash operating expenses is defined as operating expenses less stock-based compensation expense for selling, general, and administrative costs, and depreciation and amortization expense.

Adjusted EBITDA and cash operating expenses are non-GAAP financial performance measures. They should not be considered in isolation or as an alternative to measures determined in accordance with GAAP. Please refer to the appendix herein and our SEC filings for a reconciliation of our non-GAAP metrics to their most comparable measures reported in accordance with GAAP and for a discussion of the presentation, comparability, and use of such metrics.
