- **2022 Guidance Adjustments**

Safe Harbor & Non-GAAP Measures

Except for historical information contained herein, the matters set forth in this presentation and discussed in the corresponding investor presentation are forward-looking statements that involve certain risks and uncertainties that could cause actual results to differ materially from those forward-looking statements. Potential risks and uncertainties include such factors as: the severity and duration of the COVID-19 pandemic and the resulting impact on the Company's business, supply chain, and the global economy; the Company's ability to successfully implement its manufacturing operations expansion and supply chain initiatives; the Company's ability to successfully source necessary parts and materials and the ability of the Company to manufacture and deliver products to dealers to meet increasing demand and to bring dealer inventory levels back to optimal levels; the continuation of the increasing consumer demand for the Company's products; product offerings, promotional activities and pricing strategies by competitors; ability to innovate and commercialize new products (including the ability to commercialize electric vehicles currently in testing); economic conditions that impact consumer spending; disruptions in manufacturing facilities; acquisition integration costs; product recalls and/or warranty expenses; product rework costs; impact of changes in Polaris stock price on incentive compensation plan costs; foreign currency exchange rate fluctuations; environmental and product safety regulatory activity; effects of weather; commodity costs; freight and tariff costs (tariff relief or ability to mitigate tariffs); changes to international trade policies and agreements; uninsured product liability claims; uncertainty in the retail and wholesale credit markets; performance of affiliate partners; changes in tax policy; the relationships with dealers and suppliers; and the general overall economic, social and political environment. Investors are also directed to consider other risks and uncertainties discussed in documents filed by the Company with the Securities and Exchange Commission. The Company does not undertake any duty to any person to provide updates to its forward-looking statements.

This presentation contains certain non-GAAP financial measures, consisting of "adjusted" sales, gross profit, income before taxes, EBITDA, net income and net income per diluted share as measures of our operating performance. Management believes these measures may be useful in performing meaningful comparisons of past and present operating results, to understand the performance of its ongoing operations and how management views the business. Reconciliations of reported GAAP measures to adjusted non-GAAP measures are included in the financial schedules contained in this presentation. These measures, however, should not be construed as an alternative to any other measure of performance determined in accordance with GAAP.

2022 Guidance Adjustments

2022 guidance excludes the pre-tax effect of supply chain transformation, restructuring and network realignment costs of approximately $5 million, and approximately $5 to $10 million for class action litigation-related expenses. Intangible amortization of approximately $30 million related to all acquisitions has also been excluded. The Company has not provided reconciliations of guidance for adjusted diluted net income per share, in reliance on the unreasonable efforts exception provided under Item 10(e)(1)(i)(B) of Regulation S-K. The Company is unable, without unreasonable efforts, to forecast certain items required to develop meaningful comparable GAAP financial measures. These items include restructuring and realignment costs and acquisition integration costs that are difficult to predict in advance in order to include in a GAAP estimate.
