

2Q-26 Quarterly Results

Cautionary Note

- This presentation contains, and the officers of Teladoc Health, Inc. (the “Company” or “Teladoc Health”) may make, “forward-looking” statements that are based on management’s beliefs and assumptions and on information currently available to management. These forward-looking statements include, without limitation, information concerning possible or assumed future results of operations, including descriptions of the Company’s business plan and strategies. These statements often include words such as “outlook,” “anticipate,” “expect,” “suggest,” “plan,” “believe,” “intend,” “estimate,” “target,” “project,” “should,” “could,” “would,” “may,” “will,” “forecast,” and other similar expressions.
- Forward-looking statements involve known and unknown risks, uncertainties, and other factors that may cause the Company’s actual results, performance, or achievements to be materially different from any future results, performance, or achievements expressed or implied by the forward-looking statements. These statements are based on certain assumptions that Teladoc Health has made in light of the Company’s experience in the industry and its perception of historical trends, current conditions, expected future developments, and other factors the Company believes are appropriate under the circumstances as of the date hereof. Such risks and other factors that have in the past and/or may in the future cause actual results to differ materially include, among others, the rate and magnitude of declines in BetterHelp cash-pay users and revenue; the extent to which insurance availability changes users’ payment choices; available provider capacity including on a state and payer-specific basis; the timing, cost and effectiveness of provider recruitment, credentialing, enrollment, activation, compensation and retention; the performance of insurance-specific eligibility, matching, booking, scheduling, utilization, session-duration, claims and collection workflows; the effectiveness and revenue consequences of changes in advertising and marketing spending; the effects of BetterHelp’s reduced near-term emphasis and investment outside the United States; the cost, timing and effectiveness of platform and provider-capacity investments; the margin effects of the insurance mix; potential impairment of BetterHelp goodwill; and the other risks are more particularly described in Teladoc Health’s filings with the U.S. Securities and Exchange Commission (the “SEC”), including under “Item 1A.—Risk Factors” in the Company’s Annual Report on Form 10-K, and under similar headings in the Company’s subsequently filed Quarterly Reports on Form 10-Q, and could cause the Company’s results to differ materially from those expressed in forward-looking statements. As a result, Teladoc Health cannot guarantee future results, outcomes, levels of activity, performance, developments, or achievements, and there can be no assurance that the Company’s expectations, intentions, anticipations, beliefs, or projections will result or be achieved or accomplished. The forward-looking statements in this presentation are made only as of the date hereof. Except as required by law, Teladoc Health assumes no obligation to update these forward-looking statements, or to update the reasons actual results could differ materially from those anticipated in the forward-looking statements, even if new information becomes available in the future.
- This presentation may contain estimates and other statistical data made by independent parties and by Teladoc Health relating to market size and growth and other data about the Company’s industry. This data involves a number of assumptions and limitations, and you are cautioned not to give undue weight to such estimates.
- This presentation may include certain non-GAAP financial measures as defined by SEC rules. Teladoc Health believes that the presentation of such non-GAAP financial measures enhances an investor’s understanding of the Company’s financial performance. Teladoc Health uses certain non-GAAP financial measures for business planning purposes and in measuring the Company’s performance relative to that of its competitors. For additional information regarding these non-GAAP financial measures, including reconciliations to the most directly comparable financial measure calculated according to GAAP, refer the appendix to this presentation. Teladoc Health has not provided a full line-item reconciliation for net loss to adjusted EBITDA outlook because the Company does not provide outlook on the individual reconciling items between net loss and adjusted EBITDA. This is due to the uncertainty as to timing, and the potential variability, of the individual reconciling items such as impairments, stock-based compensation and the related tax impact, provision for income taxes, acquisition, integration, and transformation costs, and restructuring costs, the effect of which may be significant. Accordingly, a full line-item reconciliation of the GAAP measure to the corresponding non-GAAP financial measure outlook is not available without unreasonable effort.
