

# Everpure Statement on Pricing Increase

March 25<sup>th</sup>, 2026

Due to sustained, industry-wide demand and elevated component costs, Everpure is adjusting prices effective March 30, 2026. Most of our portfolio will see an Average Selling Price (ASP) increase of approximately 40%, while Evergreen//One will be limited to an increase of approximately 10% on longer-term contracts. Our priority remains protecting customer economics while ensuring consistent supply and support.

*\*March 30, 2026 Update: The text above has been updated from its original March 25 publication to reflect the final, implemented pricing adjustments.*
