

2008 ANNUAL REPORT

A MISSION OF **SERVICE**
A FOUNDATION OF **INTEGRITY**

CACI

EVER VIGILANT

At the Center of National Service

As long ago as America's War for Independence, our nation depended on the private sector to support vital missions. CACI began earning its place in this proud history in 1962. Today, our firm is a trusted provider of professional services and information technology, supporting national security missions and government transformation while looking ahead to the challenges that await our customers over the horizon.

With trust comes responsibility. This is why CACI makes integrity, innovation, and national service the hallmarks of our culture and our business strategy. Year after year, this strategy is validated by the growth of our company and the continuing loyalty of our customers – who have come to know CACI as a national asset for national security.

CACI Executive Officers

Experienced and fully committed, our management team brings first-hand knowledge of government priorities and opportunities ... and a bold vision of CACI's role in the future of our nation.

We're On Target!

To Our CACI Shareholders

In Fiscal Year 2008,

we continued to build CACI into a Tier 1 leader through another year of solid financial and operational performance and steps we took to establish our position as a leader in thought and deed in our market space. At the end of the year, we set new records in revenue and in operating income; grew to nearly 12,000 employees; carved a position of thought leadership in the area of asymmetric warfare; and were recognized for our high ethical standards as a government contractor. Our strong performance this past fiscal year positions us with confidence and momentum for Fiscal Year 2009 and beyond.

In FY08, we:

- Grew revenue to a record \$2.42 billion, 24.9 percent higher than the \$1.94 billion of a year ago. Over half of this growth was generated organically.
- Grew operating income to a record \$162.8 million, 11.6 percent higher than the \$145.9 million of a year ago, and 8.4 percent higher than our previous record of \$150.3 million achieved two years ago.
- Received a record \$2.50 billion in contract funding orders, 15.9 percent greater than the \$2.16 billion we received last year.
- Received contract awards of nearly \$2.9 billion, successfully retaining the majority of our recompeted contracts during the year.
- Were awarded a prime position on the multiple award \$12.2 billion ceiling contract to support Defense

Information Systems Agency ENCORE II information technology solutions, our largest contract award with that agency.

- Completed two acquisitions with combined annual revenue of approximately \$120 million that enhanced our position with two key national intelligence customers.
- Added approximately 1,600 people through hiring and acquisitions, with particular pride in our initiative to hire veterans with disabilities that resulted in adding 133 of these highly qualified individuals.
- Received the “Best Overall Government Contractor Ethics Program” rating from the Ethisphere Institute, placing third among the 100 largest government contractors. In addition, we received a higher overall rating than companies many times our size.
- Were recognized as the second Most Admired IT Services Company as well as the second Most Admired Virginia Company in Fortune magazine’s Most Admired Companies listing.

Entering Fiscal Year 2009, our total backlog was at a record level of \$7.0 billion, 10.3 percent higher than a year ago. Funded backlog was also at a record level of \$1.4 billion, 12.2 percent higher than a year ago. At the end of Fiscal Year 2008, our domestic operations had more than \$2.9 billion in submitted proposals under evaluation, with approximately 60 percent of those for new business. At the same time, our United Kingdom operations achieved record revenue of \$92.8 million, 15 percent higher than a year ago, and record net income of \$6.4 million, 43 percent higher than a year ago.

These results, accomplishments, and the recognition we received illustrate the financial and operational viability of CACI and reinforce our position of leadership in our industry.

Continuing to Build for the Future

In our letter last year, we wrote about initiatives we had started to ensure our competitive position and continue to grow our revenue and profits. Two of these, shaping and organizing our core competencies and strengthening the business development efforts of our U.S. operations, have made excellent progress and are producing results.

We have made great strides in integrating our eight functional core competencies. We anticipate that this effort will yield benefits for our clients as well as for CACI. Many of these core competencies are mature to the point of being repeatable solutions that reduce costs, expedite deployment, and create distinction for CACI in the marketplace. We believe we are well positioned to more effectively market our capabilities to the entire spectrum of customers that we either serve or seek to serve. These core competencies complement and enhance our customer focus by expanding the scope of what we can offer to any specific client. Throughout this annual report, you will see examples of how our core competencies demonstrate the true breadth of what we can do and increase our value to clients by offering end-to-end solutions.

We have more closely aligned our business development resources with our business groups through our account management process. This process is an inclusive activity that integrates the efforts of our domestic operations and business development in identifying new opportunities with our customers, capturing them for CACI, and then providing those customers with operational support from across our organization. Over two dozen major accounts have been established, with that number expected to nearly double over the next three to four years.

Establishing CACI as a Thought Leader

We believe our nation's highest priority is the long-term challenge of asymmetric global terrorism. Our goal is to align our resources at the center of our Intelligence Community clients' efforts to meet this challenge, providing them with valuable solutions and dedicated CACI people. Our steady and rapid growth in the Intelligence Community positioned us to partner with the National Defense University (NDU) to address the absence of a unified national strategy for asymmetric threats associated with global terrorism. CACI and NDU have cosponsored a series of symposiums gathering the best minds in national security to spur a new dialog on addressing asymmetric global threats. At the beginning of FY09, we published our recommendations for a unified strategy to defeat global terrorism, many of which are congruent with the new 2008 National Defense Strategy. This convergence of thinking validates our growth strategy in this critical area of national security.

Confidence in Our Future

We have great confidence in our future. We will continue to focus on the strategic targeting of federal markets that receive high-priority funding, providing essential services and solutions for national defense, intelligence, homeland security, and the overall improvement of government services. We will leverage and strengthen our eight core competencies to offer more to current customers and to attract new customers. And we will concentrate on new areas of growth where there is a logical fit between customers' needs and our capabilities.

We believe we can successfully accomplish our goals because of the relationships we have with our customers, our experienced management team which is supported by skilled employees who perform consistently every day with honesty and integrity, and the continuing support of you, our shareholders. We are excited about Fiscal Year 2009 and beyond as we continue to grow our leadership position in our industry, support our customers' missions, and build shareholder value.

Strategic Solutions Guided by Core Values

At CACI, doing the right thing is central to who we are. It's a standard we expect of every employee. It's why we empower every manager to make ethical decisions.

Serving a Higher Standard of Responsibility

Smart

Throughout our history, we've learned that strong core values are good business. They've helped carry us through good times and bad. And they've given us a clear direction for working with our customers, conducting business, and guiding strategic decisions. CACI's continuing success and steadfast reputation validate this approach, year after year.

As a national service enterprise, CACI puts ethics, honesty, and business integrity first. And with good reason. As much as the quality of our work, these values are part of our responsibility to the country and to the people we serve. With national missions at stake, anything less is unacceptable.

Our focus on ethics is reflected in many ways

In our corporate ethics program. In the support of charitable activities engaged in by our company and employees. In initiatives that benefit America's service men and women. In our sponsorship of national policy forums. And in our proactive pursuit of customer feedback on doing business with CACI.

Among the Very Best Ethics Programs.

In 2008, CACI received the Ethisphere Institute's top rating, "Best Overall Government Contractor Ethics Program." We received the highest classification of "Excellent," placed third among the 100 Largest Government Contractors, and were ranked #1 for both our ethics training and communications programs and internal control systems.

In addition, CACI placed second among Fortune's Most Admired IT Services Companies, as well as second among Fortune's Most Admired Companies in Virginia.

Project Philanthropy. This company-wide effort promotes charitable activities that best reflect CACI's unique culture and business. Providing funds, time, and expertise, CACI and its people step in to assist injured soldiers back from war zones ... help preserve national treasures for future generations ... expand educational opportunities for young people ... memorialize the victims of the September 11 attacks ... and perform many other acts of generosity and good citizenship.

Deploying Talent – Creating Careers.

This corporate initiative empowers talented people with disabilities, especially veterans, with meaningful career opportunities – and provides a valuable source of experience and expertise to CACI.

Advancing National Strategy. CACI works with organizations like the National Defense University to bring together independent forums of experts to discuss and further the development of strategies for urgent national challenges, such as asymmetric threats.

Excellence+. Through this initiative, CACI goes directly to our customers for in-depth feedback that helps us understand their concerns so we can continuously improve the quality and integrity of our work and its delivery.

Growing Our Business by Better Serving Our Customers

Continuously enhancing the quality and integrity of our work and its delivery makes us a national asset for taking on the challenges ahead.

growth

The Company Our Customers Need Us to Be

Best

CACI's government customers face challenges that can change the lives of citizens, determine the outcome of conflicts, and shape the course of history. In this intense, rapidly evolving environment, CACI has positioned itself to anticipate customer needs and ensure our readiness to address them.

Demonstrating the big picture of CACI capabilities

CACI's extensive portfolio of solutions and services encompasses eight functional core competencies that demonstrate the end-to-end value we provide. These capabilities reflect the expertise, processes, methodologies, and technologies our customers need to accomplish their missions – today and in the years ahead.

We deliver:

- Enterprise IT and Network Services
- Data, Information, and Knowledge Management Services
- Business System Solutions
- Logistics and Material Readiness
- C4ISR Integration Services
- Information Assurance, Information Operations, and Cyber Security Services
- Integrated Security and Intelligence Solutions
- Program Management and SETA Support Services

A Management Team Focused on the Future

CACI's future is its vision – which is fueled by our experienced management team. This diverse group of experts brings together decades of mission experience gained at the highest levels of defense, the Intelligence Community, and civilian government. Through their deep understanding of the missions and organizations CACI serves, they guide the company with an innovative spirit and a single-minded energy driven by their commitment to national service. They constantly explore the trends and initiatives in our sector, always ready to take the next step, pursue the next acquisition, and make the next investment in order to grow our business by better serving our customers.

Driving Value at Every Turn

Industry-recognized best practices are built into the work we perform for our customers. These include CMMI®, an industry model for excellence in software development and systems engineering; the ISO® 9000 series, a globally accepted quality management standard; and ISO® 20000, which offers customers a benchmark for assessing service levels, measuring performance, and implementing continuous improvement.

Making CACI the “Go to” Destination to Grow Careers

Ask our industry's most talented people where they want to work, and CACI is always among the first names mentioned. Here, they know that advancement rests on a culture that provides virtually unlimited and equal opportunity for growth, recognition, and reward. At CACI, we understand that our people drive our success. That's why we have made a corporate commitment to retaining, engaging, and developing the very best, with our comprehensive Career Development Program helping employees chart career paths to achieve their full potential.

CMMI (Capability Maturity Model® Integration) is a registered trademark of Carnegie Mellon University.

ISO is a registered trademark of the International Organization for Standardization.

Expertise for a New Era of National Security

In today's defense arena, enemies and missions are fluid.

And mobility, flexibility, and information superiority drive mission success. We support the warfighter anywhere the mission goes.

Deploying All the Tools in Our Arsenal to Help Keep Our Nation Safe

CACI provides the technical and analytical expertise, mission understanding, information technology, network solutions, and experienced program personnel to help our defense customers prevail in this new era of national security. From countering global terrorism and asymmetric threats to the integration of intelligence assets with command and control to net-centric operations, logistics, and business systems – we are positioned to serve today's defense needs and those in the years ahead.

The Army Intelligence Community's Information Lifeline

CACI maintains the TROJAN satellite communications systems, the Army intelligence community's global network for managing and sharing tactical, operational, and strategic intelligence information.

Boosting Efficiency Across the DoD

The Department of Defense is working to become more efficient, thanks in part to systems we developed to handle budget, resource management, accounting, and acquisition processes in all service branches. Systems such as RM Online, Comptroller Information System, Wide-Area Workflow, and the Standard Procurement System have successfully managed over \$1 trillion in DoD funds.

Medical Logistics Delivers Quality Care Worldwide

All Air Force combat and support forces rely on our work with Manpower and Equipment Force Packaging (MEF-PAK) and Medical Logistics Support Services to help plan

and manage manpower and equipment. Military personnel around the globe count on this highly efficient supply chain to support quality medical care.

BGAN Comes to Anywhere, Anytime Communications

Our PioneerExpress flyway kit puts broadband global area network (BGAN) capabilities in a briefcase. Developed through a CACI strategic partnership with an industry leader, the kit enables comprehensive communications everywhere it goes, from battlefield to homeland defense and disaster relief.

Controlled Information Sharing for Critical Operational Missions

CACI, along with its industry-leading partners, is addressing the most demanding and complex security and domain environments to help its government customers design, develop, and implement innovative multi-level security and cross-domain solutions. These help ensure secure information access and sharing in some of the most highly classified and sensitive network environments.

defense

Managing Information for Timely, Accurate Decisions

Information is the raw material of the intelligence business.

Effective information management drives the efficacy, interaction, and ultimate success of intelligence collection and analysis.

Integrating Technology, Tradecraft, and Security

CACI brings together a powerful combination of information technology and rigorous analysis capabilities that support secure information sharing across the Intelligence Community, unmatched knowledge management, and the generation of timely, actionable information for decision support.

With a recent strategic acquisition, CACI significantly strengthened our already formidable intelligence capabilities. In addition to gaining more than 600 highly-cleared specialists, we added unique, vitally-important counterintelligence expertise, intelligence tradecraft experience, and superior positioning in sensitive mission-support arenas.

Using Advance Analysis to Detect and Defeat Asymmetric Threats

Focused on countering improvised explosive devices (IEDs) in combat zones, CACI's all-source analysts deliver broader national security benefits by examining all dimensions of the regional and global networks that enable activists, extremists, and insurgents to produce, transport, and emplace the devices. This wider approach produces relevant, actionable knowledge for strategic, operational, and tactical decisions.

Bringing Order to Data Chaos Enhances Decision-Making

CACI has a leading role in the Intelligence Community in document and media exploitation (DOMEX) missions. We employ state-of-the-practice content exploitation and machine translation technologies that enable warfighters and security professionals to rapidly and precisely discover, exploit, and act on mission-relevant information.

Safeguarding DoD Activities From Cyber Attacks

Combining industry-leading counterintelligence capabilities and innovative network surveillance and response technology, CACI designed and fielded integrated cyber security solutions for the Department of Defense's computer network defense mission. These solutions have identified and mitigated malicious actions directed at sensitive DoD activities.

intelligence

Solutions for Evolving Government Priorities

The threats to America's borders and homeland are always present. CACI works at the technological heart of efforts to counter these dangers.

Readying America's Resilience for the Threats We Face

We support the homeland security and law enforcement communities, providing the professional services and information technology needed to support mission and enterprise requirements.

We also provide the expertise to exploit advanced technologies that can deliver secure information sharing and ensure interoperable communication of critical information. We are specialists in data fusion, supply solutions, and support for acquiring, combining, and processing all-source data ... and then disseminating it to the right people at the right time for decisive action.

Critical Information for First Responders – Available 24/7

The Constellation/Automated Critical Asset Management System (C/ACAMS) makes data available from any web-enabled computer on a desk, at a disaster scene, or in a command center. An indispensable tool in a dangerous world, it enables state and local first responders to deploy resources quickly, effectively, and securely.

Enterprise Value via the Global Information Grid (GIG)

CACI helps government agencies bring their networked operations into the GIG. We provide tailored, end-to-end enterprise IT and telecommunications services to design,

deploy, operate, and ensure security for client infrastructure, such as the Department of State's LAN/WAN programs and the U.S. Coast Guard's Data Network Plus.

Proven Experience for the Coast Guard's Wide-ranging Missions

The U.S. Coast Guard turns to CACI for the resources and tools to support its national and global missions, including Maritime Domain Awareness. Our expert advisors, facilitators, planners, and trainers are deeply involved in helping the Coast Guard build fully-capable law enforcement and counterterrorism maritime assault forces.

homeland security

Enhancing the Service in Public Service

Through our professional services and IT solutions, CACI helps further the transformation of federal civilian government.

Ensuring the Benefits of Transformation

Applying advanced network and information management capabilities, we help government organizations streamline operations, increase efficiency, and enhance the quality and delivery of services to their constituents.

At a time when operating costs are jumping dramatically, our IT capabilities provide proven alternatives for achieving significant economies while still meeting mission and enterprise requirements and ensuring customer satisfaction. This area will be a growing government priority for the foreseeable future.

Helping HUD Help the Less Fortunate

Our support to the Department of Housing and Urban Development helps the agency to develop viable communities by providing housing, a suitable living environment, and expanded economic opportunities for people with low and moderate income.

Providing Advanced Litigation Support to Government

CACI's expertise in litigation support solutions is driving growth outside of our 30-year legacy with the Department of Justice. We are expanding into forensics and electronic discovery with the U.S. Attorney's Office, as well as the Security and Exchange Commission, the Federal Trade Commission, and the Department of Homeland Security.

Staying On-Track, On-Time, and On-Mission

Our logistics solutions and services help government agencies plan, implement, and control the flow and storage of goods, services, and information. Critical to peacetime readiness, enterprise operations, and combat sustainability objectives, these services span the globe in support of U.S. Navy, Defense Information Systems Agency (DISA), and Department of State missions.

Stories That Must Be Saved

As America's oldest veterans leave our ranks, they take with them priceless memories of their service to our country. Through the Veterans History Project, CACI and the Library of Congress digitally preserve wartime memories that might otherwise be lost forever.

civilian

A Clear View of the Road Ahead

Tomorrow's success demands foresight today. At CACI, our eyes are on the horizon, working to anticipate customer needs and challenges.

A photograph of a winding asphalt road on a grassy hill. The road has two yellow lines in the center and white lines on the edges. It curves towards the right, leading towards a bright sunburst effect on the horizon. The sky is a clear blue. The overall mood is optimistic and forward-looking.

leader

Positioned for a Future of Growth

Our senior leadership consists of executives who watch the trend lines, seize opportunities, and drive innovation. As a result, CACI is a company well positioned for success. Our functional core competencies ensure technical expertise and readiness to support emerging customer needs and new opportunities. Our proactive corporate development program strengthens the company's capabilities and gives us a major presence in important new markets and disciplines.

With our comprehensive mix of proven offerings, subject matter experts, methodologies, resources, and support capabilities, we are ready to help our customers face the future with confidence.

Big challenges are already here. Asymmetric threats. Skyrocketing energy prices. Evolving warfighting doctrines that encompass a mix of economic, cultural, and security issues. Accelerating technology changes. An aging government workforce. These factors and more pose challenges to our government and our nation. CACI will be there to help address them, sustained by our commitment to innovation, integrity, and national service.

Over the last 12 months, CACI has seen its strategy of innovation, integrity, and national service produce solid results in revenue and shareholder value. This strategy is also our pathway to future growth and success as we help our customers navigate dramatic changes and challenges over the coming decade.

Global Reach

CACI continues to expand its presence worldwide as we enter new markets and win contracts to support missions and operations around the globe.

Growing the European Connection

CACI's UK operation was awarded a major three-year contract by global real estate solution providers Cushman & Wakefield (C&W). The company will use CACI's geographic marketing system, InSite®, across C&W's European offices to support real estate decisions for clients and their consultants. And as part of its growth strategy, our UK operation made three key acquisitions in the information systems arena to bolster current capabilities and move into other markets.

Advanced IT Integrated Logistics Solutions Center to the World

From our new 85,000-square-foot facility in Ashburn, VA, CACI supports our customers' global IT supply chain needs with advanced procurement, warehousing, asset management, and deployment, including full-service technical support. Scalable to any need, our Integrated Logistics Solutions Center employs narrow-aisle technology and wire-guided fork lifts to enhance efficiency and speed delivery of vital components.

Supporting Healthcare Logistics for the Department of Defense

Through the Defense Medical Logistics Standard Support system, CACI helps provide medical logistics, facility management, help desk, and medical maintenance support for all U.S. Armed Forces at medical facilities around the world.

InSite is a registered trademark of CACI Limited.
