EVER VIGILANT

Innovation That Drives Value Across the Government Landscape

Across every sector of government, a simple rule proves true again and again. The best solution delivers the best value.

This is why so many government agencies trust CACI for professional services and IT solutions — and why we continue to grow our business even through major swings in the economy and evolving missions and policies. From the defense and intelligence communities to homeland security and the federal civilian arena, our customers receive the solutions they need to achieve their objectives.

Innovation is the key. A vital part of our corporate DNA, innovation is reflected in thought leadership and domain knowledge ... in our strategic alignment with evolving customer missions ... in a focus on cost containment, program performance, and practical use ... and in our ability to build on the best of current and emerging technologies. Equally important, a tangible commitment to integrity underpins every CACI project and task.

Together, these are the building blocks of best value — and the source of CACI's continuing success.

To Our Fellow Shareholders

CACI's Financial Performance in Fiscal Year 2009 Was the Best in Our History

Delivering record results

in revenue, operating income, net income, and more, we provided innovative and distinctive solutions for our clients' greatest challenges — and real value for our nation's citizens. With a highly qualified and aggressive leadership team, a powerful growth strategy, and an outstanding workforce that sets the standard for excellence in client service, CACI serves as a national asset for America's most vital missions.

Significant Achievements

- Revenue was a record \$2.73 billion, 12.8 percent greater than the \$2.42 billion of a year ago.
- Operating income was a record \$184.1 million, 13.1 percent greater than the \$162.8 million of a year ago.
- Net income was a record \$95.5 million, 14.6 percent greater than the \$83.3 million of a year ago, and 12.5 percent higher than our previous record of \$84.8 million achieved three years ago.
- We received a record \$3.0 billion in contract funding orders, 19.8 percent greater than the \$2.5 billion received last year.
- We received contract awards of over \$3.9 billion, retaining the highest percentage of our recompeted contracts for any of our past five years.
- We were rated by *Fortune* magazine as among the top five Most Admired IT Companies in the World and the Most Admired Company in Virginia.

As we completed Fiscal Year 2009, our total backlog was at a record level of \$7.8 billion, 11.0 percent higher than a year ago. Funded backlog was also at a record level of \$1.6 billion, 17.6 percent higher than a year ago. Our U.S. Operations had more than \$3.5 billion in submitted proposals under evaluation, with over 80 percent of those for new business. Our United Kingdom operations continued to successfully offset the impact of that country's recession on its business.

Entering Fiscal Year 2010, our U.S. Operations are solidly positioned where our clients need us most — in the well-funded, high-priority areas of defense, intelligence, homeland security, and the improvement of government services. In the United Kingdom, we anticipate continued success and significant growth.

Thriving in Our Marketplace

CACI has a track record of more than 47 years of success in the highly competitive federal contracting community.

More importantly, we've not only thrived — retaining current clients, growing their business, and winning new clients in new markets — but we continue to set records for financial performance in each and every quarter. That kind of sustained leadership is CACI's hallmark as a premier provider in the federal marketplace.

We know that the day-to-day competition in the federal IT market drives innovation, productivity, and quality. And that's just what CACI brings to our clients — the innovation, value, and integrity they rely on to complete their highly complex and evolving missions.

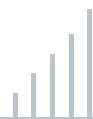

Leading Where It Counts

CACI's services and solutions help our clients keep our nation safe, and we are thought leaders for today's U.S. and global security challenges. Our leadership team understands our national priorities and drives our strategy to support national security missions.

Our offerings include advanced technologies that translate, organize, and analyze captured data in virtually all forms and formats in many languages. This is crucial to developing meaningful information that helps identify and counter threats both at home and abroad.

Our intelligence, surveillance, and reconnaissance capabilities help protect warfighters, and our extensive network and communication solutions give commanders on the ground the information they need to take swift and timely action.

In the area of IT modernization, CACI delivers systems and services that improve the way government does business. In everything from finance and accounting to managing travel records, we provide innovative and reliable solutions that give our clients the greatest value for their investment, and enhance their service to the American taxpayer.

Moving Smartly Into the Future

Looking ahead, we are moving smartly to continue expanding our current capabilities while diversifying to maximize opportunities for growth in emerging national priorities.

We are supporting new initiatives in smart power. This includes increasing our focus on integrated intelligence and security solutions that close gaps between security, intelligence, and law enforcement to address complex security threats.

We are expanding our business in the critical area of cybersecurity. We established a cyber solutions division to integrate our diverse cyber capabilities — including cyber counterintelligence solutions that are in high demand. We now support cyber-related programs for civilian, defense, and intelligence clients.

We also provide thought leadership in smart power and cybersecurity through the ongoing Asymmetric Threat symposium we are hosting with the United States Naval Institute. These conferences bring together experts from around the world to help establish a national dialogue on developing an integrated and unified national strategy to defeat terrorist threats.

We also see growth opportunities in the areas of healthcare and energy. CACI is a leader in the defense healthcare logistics community and we plan to increase our presence in this area. In the federal civilian arena, we are positioning our extensive IT capabilities and expect to leverage them to support growing requirements for better healthcare information systems.

Energy independence is a government priority that is closely tied to preserving national security. We see opportunity to leverage our competencies in information systems to provide high-end consulting and engineering services to support the government in addressing that need.

Innovating and Driving Value

Throughout this annual report, you will see outstanding examples of how we partner with our clients to innovate in anticipation of their needs and add value to their services.

At CACI, we are committed to being the *very best* in client satisfaction, to delivering our services and solutions with honesty and integrity, and to being a leader in our marketplace. It is this commitment that has enabled us to deliver *the best financial performance in CACI's 47-year history*.

It is an honor to work with our management team and our dedicated employees around the world. We thank you, our shareholders, for your continued support. We have great confidence that we will be able to deliver on our commitments to our customers and build shareholder value in Fiscal Year 2010 and beyond.

Paul M. Cofoni

Paul M. Cofoni
President and Chief Executive Officer,
CACI International Inc

If DNA is the
genetic blueprint of life,

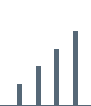

CACI's corporate DNA
is the enterprise blueprint of
who we are as a company.

Driving Innovation, Delivering Value, Demanding Integrity

It is reflected in our goals and strategy. In our processes and ways of doing business.
And in our values and commitment to customers.

Since our earliest days, CACI has been committed to driving innovation, delivering value,
and demanding integrity in everything we do. This blueprint has served CACI well and
today helps us achieve continuing growth in a rapidly changing marketplace.

CACI's Blueprint for Success

Innovation as a Strategy

As a business, CACI employs a strategy of applied innovation for anticipating and meeting customer requirements. Our people are thought leaders working at the forefront of professional services and information technology solutions.

To back our strategy, CACI has made a major investment of time and resources. The CACI Research and Development Labs (CRaDL) facility at the Aberdeen Proving Ground in Maryland is a center of excellence that will lead to important new technologies for the warfighter and homeland security. Our Cyber Security Solutions Laboratory in Chantilly, Virginia enables customers to validate the security of new systems and technologies in advance — under real-world conditions.

Our specialists work with customers to apply emerging technologies, such as Web 2.0 applications, service-oriented architectures, and biometrics. Our leading-edge C4ISR and network solutions support American forces in-theater. And as the priorities of the new administration unfold, CACI is employing advanced technologies to address the challenges of healthcare and enterprise transformation.

Value as a Mission

CACI's prime mission is delivering value in the solutions and services we provide to customers ... in the returns we earn for our shareholders ... and in the opportunities we offer to every CACI employee.

As a trusted systems integrator with decades of experience, we bring deep mission and enterprise knowledge to each task. The result is solutions and outcomes geared to real-world challenges.

Value also lies in the quality of service and program management. Through our investment in the CACI 20000 corporate initiative, we have created an integrated service model based on a range of leading industry standards and best practices, such as the Program Management Body of Knowledge, CMMI, ITIL, and more. The model has increased the cost-efficiency and responsiveness of our offerings — and is directly responsible for major contract wins.

Integrity as a Way of Life

From the moment employees join our company, they are introduced to the CACI Culture, our code of conduct and ethics. More than a set of rules, this is a proactive commitment to doing the right thing at all times for each other, our government customers, the citizens we serve, and our shareholders.

You see the CACI Culture reflected in many ways. In customer relationships that last for decades. In the satisfaction of new customers. In our CARE awards as a family-friendly company. And in our support of military families and the USO. Reasons like these are why *Fortune* magazine named CACI the most admired firm in Virginia.

We achieve continued **growth** in a
rapidly changing **marketplace**

Supporting Mission Success Across the Battlespace

Innovation may be the most potent weapon in America's arsenal. Advances in technology and its application deliver a decisive edge on the battlefield. They take readiness to the highest levels. And they ensure the effectiveness of the military enterprises that support the warfighter worldwide.

For decades, CACI has helped the Armed Forces attain the greatest value from rapidly evolving technology. From addressing the challenges of asymmetric warfare, to delivering 21st century maintenance for the U.S. Navy, to ensuring that the military's vast cyber resources are secure, CACI provides critical solutions for many of today's most important defense initiatives. And we play a key role in supporting the military's technology pipeline, through programs such as the U.S. Army's multi-billion-dollar Strategic Services Sourcing (S3) contract.

INNOVATION for Defense

Keeping the Fleet Mission-Ready

CACI has supported the U.S. Navy's Ship Maintenance Improvement Program for over 30 years. This huge, ongoing effort includes the development of innovative maintenance engineering techniques, such as Condition-Based Maintenance and Reliability-Centered Maintenance (RCM). CACI has a proven track record in RCM application and training for the U.S. Navy, Marine Corps, Coast Guard, and Federal Aviation Administration, as well as commercial enterprises and a foreign navy.

Using Proven Capabilities to Defeat IEDs

Our people are recognized leaders in addressing the challenge of defeating improvised explosive devices (IEDs). Based on their in-theater experience, CACI specialists are in the vanguard of Department of Defense (DoD) thinking on asymmetric threats. Through a prime contract with the Joint Improvised Explosive Device Defeat Organization (JIEDDO), we provide consulting, mentorship, training, and related services, coordinating the lessons learned by our staff in Southwest Asia with practices and solutions developed for JIEDDO.

Expanding Support Establishes Company as Leading DoD Medical Logistics Provider

CACI is an industry leader in supporting the operational and IT needs of the DoD healthcare logistics community. Our work encompasses multiple healthcare logistics and IT contracts that employ a staff of over 280 medical logisticians. We provide comprehensive support to our customers, including subject matter expertise, software development and sustainment, and both instructor-led and computer-based training.

Supporting DoD and Armed Services' Cyber Projects to Safeguard Critical Information

CACI's cyber professionals are working with the Armed Services and other corporate partners on cross-domain information assurance capabilities that balance the need to share information with the requirements to protect the information's confidentiality and integrity. And CACI continues to expand its cyber operations capabilities as it supports the DoD and the Armed Services to research and develop state-of-the-art cyber operations tools.

We provide **critical solutions** for many
of today's most important defense **initiatives**

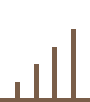

CACI's HighView® Helps Turn Data Into Knowledge and Security

Timely, reliable intelligence is the early warning system of national security. CACI is one of the key sources of talent, thought leadership, and innovative technologies for many of the nation's most critical and challenging intelligence programs. And with our series of symposia on Dealing With Today's Asymmetric Threat, we continue to take a lead position in advancing a national strategy to meet this ongoing danger by synchronizing hard and soft power to create smart power initiatives.

Last year, our intelligence business moved far deeper into the Intelligence Community's (IC) core mission areas. Already recognized as a provider of mission support services and solutions, CACI crossed new thresholds of scope and sophistication in its contributions to data collection, analysis, and knowledge management. In many areas, we stand out as the "go to" company for expertise and support involving critical IC solutions. In addition, we support a large portfolio of indefinite delivery/indefinite quantity contracts available to the IC. Together, these capabilities explain our continuing growth in this arena — and provide a proven foundation for even greater advances in the years ahead.

INNOVATION for Intelligence and Smart Power

Analytical Capacity as Large as the Mission Demands

CACI's large-scale analytic capabilities are increasingly employed to resolve many of the country's critical intelligence challenges. Serving as a prime contractor on major programs, such as the Defense Intelligence Agency's Solutions for Intelligence Analysis initiative, CACI provides highly skilled analysts who support the development of security policy, enforcement of laws, conduct of combat operations, and planning for contingent situations. The level and scope of our analytic activity represents the recognition of our value to key national security decision makers and our ability to meet rapidly escalating analytic needs.

Modernizing America's Counter-intelligence Capability

Organizations within the private and public sectors recognize CACI more and more as a leading counterintelligence resource. Our professionals are sought out for their counsel and thought leadership as the nation works to modernize and re-focus its counterintelligence capabilities. Cybersecurity is a central component of this effort. And CACI experts are applying counterintelligence capabilities to the cyber mission, countering both the foreign intelligence and "trusted insider" dimensions of the threat.

Extracting Value From Data: Any Language, Any Format, Any Volume

Built around our HighView software application, CACI's industry-leading suite of document exploitation technologies results in dramatic increases in functionality — and sales. Able to ingest, categorize, tag, and organize data in virtually any language or format, this multimedia suite instantly extracts knowledge and value from massive volumes of multiple data types and sources. The suite supports battlefield commanders and rear-area analysts, and it is finding more and more use in areas ranging from declassification tasks and sensitive litigation support, to helping the National Archives manage historic documents.

Providing Ongoing Leadership in Support of Smart Power

CACI's continuing support for the Center for Excellence in Disaster Management and Humanitarian Assistance advances the mission of educating, training, conducting research, and assisting in responding to natural and man-made disasters in the Asia Pacific Region. The effort reflects our capabilities to support smart power initiatives — the integration of the "soft power" of development and diplomacy with the "hard power" of military strength.

HighView is a registered trademark of CACI.

With our series of symposia on

Dealing With Today's Asymmetric Threat,

we continue to take a lead position in advancing

a national strategy to meet this ongoing danger

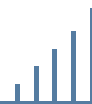

Countering the Threats Within Our Borders

For those whose intent is to cause harm within our nation and along our coasts, the message is clear. America is readying its defenses. We are watching and monitoring more intently. And we are assembling unprecedented resources and technologies to anticipate and counter the threats ahead.

CACI provides valuable innovations needed to meet these vital national priorities. Our work helps secure the global supply chain to facilitate the uninterrupted flow of food, medicine, oil, and other vital supplies. Our experts supply solutions to support first responders in locations like Prince George's County, Maryland and Sarasota County, Florida, where our applications extend critical secure communications to mobile field units. And our network services help keep the channels of communications operating smoothly for homeland security professionals throughout the nation.

As the next decade dawns, complex new threats will rapidly emerge. This represents a growing area of business for CACI as we help address these challenges.

INNOVATION for Homeland Security

Ensuring the Logistics That Help the Coast Guard Protect Our Shores

The U.S. Coast Guard's fleet protects our nation's maritime borders. Working within a newly transformed logistics model, CACI supplies expert support in cutter and small boat maintenance and logistics. In addition to creating high-productivity maintenance procedures, our specialists respond directly to unit personnel throughout the Coast Guard with technical and supply chain assistance. This vital support plays a key role in keeping the Coast Guard's fleet mission-ready.

Enhancing 24/7 Communications Across the DHS and Throughout the Nation

CACI's mission presence in the Department of Homeland Security (DHS) now includes a wide array of duty desk, watch desk, and operation support services that manage, process, and coordinate the flow of information across the DHS and with Protective Security Advisors in the field. This program expands our support of critical infrastructure protection, which also includes the Automated Critical Asset Management System program that broadens information sharing between critical infrastructure owners and the federal government.

Using In-theater Experience to Enhance First Responder Capabilities

Using the direct experience of the many special operations professionals working with our Integrated Security and Intelligence Solutions functional core competency, CACI helps train state and local first responders in dealing with a wide range of hostile man-made events. Courses can include everything from understanding the latest enemy tactics, to knowing what to look for in threat detection, to comprehensive disaster response.

Countering Threats to the Nation's Naval Vessels Worldwide

CACI provides a broad range of services supporting the execution of more than 100 programs that provide critical capability to the U.S. Navy and Joint Forces. These range from a new generation of systems to protect littoral combat ships, to anti-terrorism protection systems for ships in foreign ports, to developing advanced submarine detection systems.

We provide **valuable innovations**
for vital **national priorities**

CACI's OMEGA Helps Speed Data Collection, Tracking, and Analysis for the Department of Justice

In today's economy, every federal agency has been asked to do more with the resources at their disposal. This continues the transformation initiatives of recent years. But with a new administration has come a call to better meet the needs of our citizens through higher levels of efficiency and service.

CACI has been involved with government transformation for years. As a top-tier systems integrator, we have helped enterprises from the Departments of Justice and State to the Library of Congress and National Archives to manage vast amounts of information quickly and cost-effectively. We've helped the Veterans Administration provide better service to our nation's heroes. And as the full value and impact of new capabilities like social networking unfold, CACI is helping government customers use these communications tools to advance their missions. For the initiatives ahead, CACI is a portal to innovation and enterprise value for all levels of federal civilian government.

INNOVATION for Federal Civilian Government

Transforming Business Systems Government-wide

For decades, CACI has provided and sustained enterprise systems that advance the business of government. Today, these systems handle more than a trillion dollars worth of transactions annually. We are positioned for future growth in this expanding sector due to our process discipline, deep cross-domain understanding of the federal government, and our recently formalized strategic alliance with Oracle®. This alliance distinguishes us as a premier integrator within Oracle's customer base as these federal enterprises continue their migration to commercial-off-the-shelf-based solutions and service-oriented architectures.

Advanced Web Portal Brings Online Support to DOJ Attorneys

CACI's OMEGA web portal integrates management and technical resources for Department of Justice (DOJ) and other federal government attorneys, experts, and case managers. They benefit from fast, secure, and easy access to large document repositories, shared calendars, project milestones, and associated tools. DOJ attorneys and staff can also use OMEGA's powerful search capabilities to quickly and effectively scan through vast repositories of evidentiary material.

Streamlining Travel for Three Million Federal Employees

Through its 24x7x365 Travel Assistance Center, CACI supports the Defense Travel System, a web-based, end-to-end travel system used by more than three million federal employees to plan and execute travel arrangements. Working in partnership with SPAWAR Atlantic and the Defense Travel Management Office, we leverage state-of-the-art technologies to decrease caller wait time, increase first-time call resolution, and monitor and improve the overall efficiency of the center's operations.

Speeding the Flow of Grant Funding to Provide Housing to the Nation

CACI provides information technology services and critical software applications support to help the U.S. Department of Housing and Urban Development (HUD) manage its extensive grant programs. We have modernized and streamlined key grant systems for HUD so that money can reach grantees. In one case, a paper-based system was replaced with electronic submissions, which has helped to facilitate the award of over \$1 billion in grants to local homeless assistance and prevention programs across the country.

Supplying the Foundation for Future Innovation

Our eyes are always on the future. We consistently answer the question, "What's next?" with fresh thinking and dynamic solutions.

As an early innovator and provider of new technologies, we help customers find the real value in everything from virtual recruiting to social networking. Our specialized labs conduct state-of-the-art research and development. Our combination of technical excellence, cutting-edge projects, and progressive human resource programs attracts the best talent.

CACI's strong customer focus keeps us abreast of emerging trends and challenges so we can take proactive steps today to ensure our readiness for the opportunities ahead. From IT solutions to increase healthcare efficiency, to biometric identification systems for combat zones, to training local public safety personnel to handle a wide array of threats, CACI is ready to meet any need.

Attracting Next-Generation Talent Through Virtual Recruitment

The National Security Agency and Department of Veterans Affairs contract with CACI to recruit top talent into government service using the latest in new media technology. From virtual meeting platforms that bring together thousands of professionals for live online events, to social networking platforms that encourage open dialogue and information sharing, we help government agencies recruit stellar performers.

Delivering Web 2.0 Community Power to eDiplomacy

CACI is working with the Department of State's Office of eDiplomacy to bring the value of Web 2.0 and social networking to U.S. foreign affairs. CACI staff have created and expanded Communities@State, which supports 60+ blog-based communities. Our team shepherded the development and meteoric growth of Diplopedia, the Department's wiki-powered encyclopedia. Initiatives like these are energizing a collaborative new culture in the foreign affairs community.

Creating a Dynamic Incubator for New Technologies at CRaDL

The 60,000-square-foot CACI Research and Development Labs (CRaDL) facility is a center of excellence for defense technology to support the warfighter and homeland security. Located at the Aberdeen Proving Ground, CRaDL serves as an R&D incubator for CACI's C4ISR capabilities as well as existing and developing resources. Created with a vision to accommodate all those whom we work with and support, CRaDL is open to clients and partners alike as a place to refine and develop their technologies.
